Ornament in Architecture San Francisco's Financial District
Reclaiming San Francisco is an anthology of fresh appraisals of the contrarian spirit of the city-a spirit "resistant to authority or control." The official story of San Francisco is one of progress, development, and growth. But there are

other, unofficial, San Francisco stories, often shrouded in myth and in danger of being forgotten, and they are told here: stories of immigrants and minorities, sailors and waterfront workers, and poets, artists, and neighborhood activists-along with the stories of speculators, land-grabbers, and the land itself that need to be told differently. Contributors include historians, geographers, poets, novelists, artists, art historians, photographers, journalists, citizen activists, an architect, and an anthropologist. Passionate about the city, they want San Francisco to be more itself and less like the city of office towers, chain stores, theme parks, and privatized public services and property that appears to be its immediate fate. San Francisco is not alone in being transformed according to the dictates of the global economy. But San Franciscans are unusual in their readiness to confront the corporate agenda for their city. Some call it "Wall Street West," while some just call it "downtown," but San Francisco's financial district is a long-running business powerhouse, home to scores of corporate headquarters, prominent law firms, restaurants, hotels, banks, the Pacific Stock Exchange, and striking waterfront views radiating outward from the landmark 1898 Ferry Building. The district was among the first areas to be settled, and many of the original 19th-century buildings still stand, along with streets and businesses named for early California business leaders like Mills, Sharon, Fair, and Flood. The district holds examples of nearly every type of commercial architecture and is arguably the city's most popular, as its population swells by tens of thousands of office

workers each day.
