Entrepreneurship* Springer

Sustainable Entrepreneurship stands for a business driven concept of sustainability which focusses on increasing both social as well as

business value - so called Shared Value. This book shows why and how this unique concept has the potential to become the most recognised strategic management approach in our times. It aims to point out the opportunities that arise from putting sustainable entrepreneurship into practice. At the same time, this book is a wake-up call for all those companies and decision

makers who underestimated Sustainable Entrepreneurship before or who are simply not aware of its greater dimension. Well structured chapters from different academic and business perspectives clearly outline how Sustainable Entrepreneurship contributes to solving the world's most challenging problems, such as Climate Change, Finance Crisis and Political Uncertainty, as well as to ensuring business success. The book provides a framework of orientation where the journey might go: What can a successful concept of SE look like? What are the key drivers for its realisation? What is the role of business in shaping the future of our society? The book also presents best practices and provides unique learnings as well as business insights

from the international Sustainable Entrepreneurship Award (www.se-award.org). The Sustainable Entrepreneurship Award (short SEA) is an award for companies today who are thinking about tomorrow by making sustainable business practices an integral part of their corporate culture. Companies that receive the SEA are being recognised for the vision they have shown in combining economic and sustainable responsibility.

Role of Entrepreneurial Universities, Research Centers and Economic Zones in Driving Entrepreneurship and Innovation in Cluster Ecosystems

Edward Elgar Publishing
Leading international scholars provide a timely reconsideration of how and why entrepreneurship matters for economic

development, particularly in emerging and developing economies. The book critically dissects the evolving relationship between entrepreneurs and the state.

Finance, Accounting and Law in the Digital Age Springer Science & Business Media

Business systems undergo a number of transitions as the needs and demands of society change. With heightened connectivity driven by the development of the Internet, new opportunities for venture development and creation have become available to business owners and entrepreneurs. Crowdfunding for Sustainable Entrepreneurship and Innovation is a pivotal reference source for the latest scholarly research and business practices on the opportunities

and benefits gained from the use of crowdfunding in modern society, discussing its socio-economic impact, in addition to its business implications. Featuring current trends and future directions for crowdfunding initiatives, this book is ideally designed for students, researchers, practitioners, entrepreneurs, and policy makers. New financing models such as crowdfunding are democratizing access to credit, offering individuals and communities the opportunity to support, co-create, contribute and invest in public and private initiatives. This book relates to innovation in its essence to anticipate future needs and in creating new business models without losing revenue. There are tremendous unexplored opportunities in crowdsourcing and

crowdfunding; two sides of the same coin that can lead to a revolution of current social and economic models. The reading of this book will provide insight on the changes taking place in crowdfunding, and offer strategic opportunities and advantages.

China is poised to gain global importance as a growth engine for the world economy on a par with Europe and the USA. Japanese multinational enterprises are increasingly active in relocating to China their R&D and capital- and knowledge-intensive production for both export-platform and target market reasons. It is at the juncture of the growing
Social Entrepreneurship IGI Global

Many social entrepreneurs struggle to take successful, innovative programs that address social problems on a local or limited basis and scale them up to expand their impact in a more widespread, deeper, and efficient way. In *Scaling Social Impact*, the editors address this issue with a comprehensive collection of original papers.

Values and Opportunities in Social Entrepreneurship Oxford University Press, USA

This book focuses on understanding Innovation in the Financial Services Sector. The collection of contributions gathered in the book highlights the importance of technology contexts that pertain to Finance, accounting, and the law arena. The respective chapters address topics such as Economic

development, social entrepreneurship, Online Behaviour, Digital entrepreneurship, and Islamic banks. All contributions are based on the latest empirical and theoretical research and provide key findings and concrete recommendations for scholars, entrepreneurs, organizations, and policymakers.

Creating Social Value Through Social Entrepreneurship IGI Global

By serving as a conduit for knowledge spillovers, entrepreneurship is the missing link between investments in new knowledge and economic growth. The knowledge spillover theory of entrepreneurship provides not just an explanation of why entrepreneurship has become more prevalent as the factor of knowledge has emerged as a crucial

source for comparative advantage, but also why entrepreneurship plays a vital role in generating economic growth. Entrepreneurship is an important mechanism permeating the knowledge filter to facilitate the spill over of knowledge and ultimately generate economic growth.

Entrepreneurship and Sustainable Development in Africa IMPACT OF PSYCHOLOGICAL AND SOCIOLOGICAL FACTORS ON SMALL SCALE ENTREPRENEURS

“The fourth sector” is a relatively new sector that consists of for-benefit organizations that combine market-based approaches of the private sector with the social and environmental aims of the public and non-profit sectors. This book examines trends of

entrepreneurship in the fourth sector, describes specific ecosystems fostering new ventures around the world, and characterizes the most common and innovative business models. It covers as well the main effects, among others, of technological change, innovation, and institutional behavior on the sector in the last years.

Global Entrepreneurial Trends in the Tourism and Hospitality Industry

Springer

Mission-driven ventures have the power to change the world and solve today's most pressing social problems. Social Entrepreneurship equips students with the theories, models, tools, and templates they need to generate ideas and shape opportunities into impactful social enterprises. Author Carole Carlson

uses a variety of real-world examples, cases, and profiles to illustrate how entrepreneurs around the world are changing their communities. Exercises allow students to practice developing their entrepreneurial skillset as they learn the fundamentals of structuring, financing, marketing, and scaling social ventures. Whatever social cause your students are passionate about, they will find Social Entrepreneurship a vital resource for making their vision a reality.

Social Entrepreneurship and Enterprises in Economic and Social Development Edward Elgar Publishing

This book takes an inside-out approach to examine the broad topic of social entrepreneurship. Instead of looking inward at what social entrepreneurship is, this book looks forward from the view

of successful social entrepreneurs to answer the important question, “Where is social entrepreneurship going next?” First, the volume looks at the essential qualities of social entrepreneurs, including the importance of humility as a trait in the social entrepreneur, the way in which social entrepreneurs define themselves as such, and if and how opportunity recognition differs in social and traditional entrepreneurs. Next, the volume looks at the impact of social entrepreneurial businesses on individuals but also on the supply chain, other businesses and the wider community. Next, the book explores social entrepreneurship and global change. This rare and compelling section, offers key insights and lessons in the development and promotion of

social entrepreneurship in the global economy. This volume addresses both theory and research, suggesting practical solutions. It engages scholars and practitioners across disciplines in an examination and debate about various methods and approaches of enacting programs of social change.

Social Innovation and Entrepreneurship in the Fourth Sector IGI Global

The study of elderly entrepreneurship and its potential impact on labor, Social Security funds and regional economic growth is of significant importance, particularly for the US economy where population aging coincidentally intersects with the economic shift to a OC knowledge economyOCO. On the one hand, aging, combined with a declining

average retirement age, is expected to result in labor force shortages and Social Security fund exhaustion; yet on the other hand, the OC knowledge economyOCO could elevate the value of elderly human capital as the OC knowledge economyOCO is less physically demanding and more human-capital- and knowledge-based. Building on the utility maximization theory, economic growth theories and social theories of aging, this timely book addresses the old-age effect on entrepreneurial propensity; the sources of seniors' entrepreneurship, including the social and policy variables affecting seniors' entrepreneurship; and the economic, fiscal and labor impacts of elderly entrepreneurship.

Socio-Economic Disparities, Vulnerable

Communities, and the Future of Work and Entrepreneurship Springer

This volume explores the links between the rapidly growing phenomenon of social entrepreneurship (SE) and the international tourism and hospitality industry. This unique industry is particularly ripe for transformation by SE and the book's authors delve deeply into the reasons for this. The book has three parts. The first creates a conceptual and theoretical framework for understanding the uniqueness of SE in the tourism context. The second examines different communities of practice where SE is being applied in tourism. The third is a rich collection of case studies from eight countries where tourism SE is already having an impact. The book's authors address the topic from many different

angles, disciplinary backgrounds and geographic areas. Many case study authors are practicing social entrepreneurs who share their successes, challenges and experience with tourism-related projects. The book also proposes a research agenda and educational programmatic changes needed to support tourism SE. As these are developed, tourism SE will bring innovation to destinations, transformation of their economic and social structures, and contribution to a better world. The book has many insights and resources for scholars and practitioners alike to usher in this transformation.

Entrepreneurship and Culture

BlueRose Publishers

While many scholars, governments, and

corporations have expressed that they would like to play a hand in developing an inclusive and equitable society, few have achieved the goal. Vulnerable communities around the world have suffered systemically and have been left on their own to succeed economically despite decades of disadvantage. It is essential to consider these communities and their sociological and systemic factors when considering the future of work in order to succeed in developing a truly sustainable and equitable society. *Socio-Economic Disparities, Vulnerable Communities, and the Future of Work and Entrepreneurship* discusses the journey of vulnerable communities in the pursuit of entrepreneurship. It further investigates the strategies and action that governments and organizations can

take to cultivate an inclusive environment within the future of work. Covering topics such as economic agency, equitable access, and affirmative action, this premier reference source is an excellent resource for policymakers, government officials, non-profit organizations, business leaders and executives, human resource managers, economists, students and faculty of higher education, researchers, and academicians.

Sustainable Entrepreneurship Kokila Negi

Social Entrepreneurship is a global phenomenon that impacts the lives of citizens by using innovative approaches to solving social problems. This book offers a comprehensive examination of this growing area of research and

provides an excellent introduction to social entrepreneurship theory and a framework for future research.

Wicked Entrepreneurship: Defining the Basics of Entrepreneurology Oxford University Press

With today's current problems, including forced migrations, inadequate education and healthcare systems, environmental threats, economic crises, poverty, etc., it has become evident that systemic social change is needed. Unfortunately, creating, maintaining, and fostering sustainable social value is not easy. In this respect, social entrepreneurs can act as change agents with their social missions. Yet, the role of social entrepreneurship in creating sustainable social value is still in an embryonic state. Creating Social Value Through Social

Entrepreneurship contains expert research that links social entrepreneurship and social value in order to further understand the role of social entrepreneurship in creating social value and to highlight the importance of social entrepreneurs in emerging economies. While covering topics that include crowdfunding, social enterprise, social entrepreneurship ecosystems, and the triggers and challenges of social entrepreneurship, this book seeks to extend the social entrepreneurship contribution to social impact. The book is of value to entrepreneurs, managers, academicians, researchers, and students in various fields that include economics, management, and entrepreneurship. Entrepreneurship and Economic Growth Routledge

This book explores 'wicked entrepreneurship', or the proliferation of evil that harms our economic and social transactions, as the greatest socio-economic problem of our time and offers strategies to identify and address this phenomenon.

Entrepreneurship in the Fourth Sector Routledge

Women were the first humans to taste bondage. On the contrary, the overall growth of women remained stunted". Women were denied the benefit of education. Economically women became completely dependent upon men. entrepreneurs have emerged. Women entrepreneurs in India have to cope with various socio-economic problems. Women become entrepreneurs due to several factors which may be grouped

under “Pull factors” and “Push factors”. The hidden entrepreneurial potentials of women have gradually been changing with the growing sensitivity to the role and economic status in society. Women are increasingly being conscious of their existence, their rights and their work situation. And yet, the middle-class strata women have accepted their role and are not ready to alter for fear of a social backlash. Today, women entrepreneurs represent a group of women who have broken away from the beaten track and are exploring new avenues of economic participation. In the Present world women are now rapidly coming forward as successful leader and this demand increase more in future too. This book tried to highlight such issues in all possible manners. The

book has eight chapters which envoy innovative leadership, entrepreneurship and social as well as economic growth. *Socio-economics* Springer
Economic zones are recognized as contributors of entrepreneurship and innovation and key elements of national development strategy. This paper empirically evaluates and answers questions like - is there an impact of entrepreneurial universities and research centers on the performance of clusters? why and how this happens? do economic zones affect cluster outputs to the host economy? can there be enhancement of entrepreneurship and innovation in clusters if economic zones are bundled along with entrepreneurial universities and research centers? This study builds up on the dataset of

top-100 clusters of innovation, presented by World Intellectual Property Organization (WIPO), refining it and adding five socio-economic output indicators, testing for three independent variables (entrepreneurial universities, research centers and economic zones) to reveal, quantify the relationships and evaluate the impact of these variables on cluster performance. The results show there is a strong effect of all three independent variables but with varying degrees on different socio-economic output indicators, implying that a hybrid or collaborative model with entrepreneurial universities, research centers and economic zones will be the most emphatic alliance to deliver the socio-economic benefits expected out of clusters.

Asia's Social Entrepreneurs Cognitione Foundation for the Dissemination of Knowledge and Science

A three-country case study was used to analyze the economic, political, and social impacts of entrepreneurship, and the development of entrepreneurship in Sub-Saharan Africa was studied through the lens of five entrepreneurial factors (freedom, labor, infrastructure, governance, and business environment). An increase of foreign direct investments, growing economic freedom for citizens, and a higher gross domestic product per capita were among the economic benefits of entrepreneurship. Politically, stronger democracy, political rights, and civil liberties can be obtained from a growing level of entrepreneurship. Reduced

unemployment, better education, higher health expenditures per capita, and development of the communications infrastructure were some of the social benefits. Lower cost for starting a new business and easier access to capital were the chief reasons behind Botswana's greater level of entrepreneurship. Better governance, regulatory quality, infrastructure, and trade freedom have also helped to attract entrepreneurs for Botswana. For Zambia and Malawi, the coordination of entrepreneurial programs, business freedom, and the amount of corruption are better indicators to predict their levels of entrepreneurship instead of their measures of the rule of law or the regulatory quality. Botswana and Zambia are expected to march toward a virtuous

cycle while Malawi appears to be in a vicious cycle. The first chapter introduces the significance of the research question and the proposed hypostudy, which claims entrepreneurship as a viable tool to improve GDP per capita, and political and social sectors in SSA. The second chapter discusses the background of entrepreneurship and entrepreneurs, the relationship between entrepreneurship and economic growth, and the causes for entrepreneurship. Chapter III elaborates the five vital entrepreneurship factors in the developing world. Chapter IV assesses the status of the five key entrepreneurship facts in each of the three African countries to understand the limiting cause for the expansion of

entrepreneurship in Africa. It also evaluates the economic, political, and social impacts of entrepreneurship in each of the three African countries discussed in the case studies. Finally, the fifth chapter discusses the dynamics of entrepreneurship development in Africa using the findings from Chapter IV, and delivers potential policy recommendations to address the shortcomings in each country type as conclusion.

CHAPTER I - INTRODUCTION
 * A. MAJOR RESEARCH QUESTION * B. SIGNIFICANCE OF THE RESEARCH QUESTION * C. HYPOSTUDY * D. METHODOLOGY * E. STUDY OVERVIEW *

CHAPTER II - ENTREPRENEURSHIP AND ECONOMIC GROWTH IN THE DEVELOPING WORLD * A. ENTREPRENEURSHIP AND

AND MALAWI

Elderly Entrepreneurship in an Aging Us Economy IGI Global

Written by a team of researchers based in prestigious business schools and universities on almost every continent, this important book begins the process of discovering why and how female driven business start-ups often seem to spontaneously emerge in adverse environments. Is it randomness, luck, or

chance that determines success or failure, or vital critical forces and the inherent qualities of the women involved? The research emerging from the Female Immigrant Entrepreneurship (FIE) project discusses the integration of immigrant communities, their interaction with host economic and business environments, and the role of women in that interaction.
