Focusing on more than 30,000 years of Alaskan prehistory, *The Ice-Age History of Alaskan National Parks* vividly describes the geology, climate, ancient plant and animal life, and human presence in four of Alaska's national parks and preserves - Denali, Kenai Fjords, Glacier Bay, and Bering Land Bridge. Scott A. Elias uncovers a time when glaciers shaped the landscape, gouging out valleys, carving cirques and peaks, and leaving moraines that blocked rivers and formed lakes. Using fossils as "witnesses" of past environments, he recreates the bogs and steppe tundra where caribou, moose, saber-toothed cats, and mammoths reigned 35,000 years ago. This guidebook presents a unique perspective for the modern traveler. Geared toward the general reader, it is the first in a series that will also survey the prehistory of the Rocky Mountain and Southwest national parks.

Updated as of May 29, 2018 The U.S. Department of Agriculture (USDA or Department) is implementing regulations under the Omnibus Public Land Management Act of 2009 paleontological resources preservation subtitle (the Act). This rule provides for the preservation, management, and protection of paleontological resources on National Forest System lands (NFS), and insures that these resources are available for current and future generations to enjoy as part of America's national heritage. The rule addresses the management, collection, and curation of paleontological resources from NFS lands including management using scientific principles and expertise, collecting of resources with and without a permit, curation in an approved repository, maintaining confidentiality of specific locality data, and authorizing penalties for illegal collecting, sale, damaging, or otherwise altering or defacing paleontological resources. Richard L. Proenneke--a modern-day Henry David Thoreau--built a cabin in Twin Lakes, Alaska, during the spring of 1968, sparking thirty years of personal growth in which he spent the majority of his time strengthening his relationship with the wilderness around him.

Following in the footsteps of *One Man's Wilderness*, a classic book compiling some of the mountain man's journals, *More Readings from One Man's Wilderness* chronicles Proenneke's experiences with animals, the elements, park visitors, and observations he made while hiking in Lake Clark National Park and Preserve. A master woodcraftsman, a mechanical genius, a tireless hiker with a keen eye, and a journalist, Proenneke's life at Twin Lakes has inspired thousands of readers for decades. Editor John Branson--a longtime friend of Proenneke's and a park historian--ensures that Proenneke's journals from 1974-1980 are kept entirely intact. His colloquial writing is not changed or altered, but Branson's footnotes make his world more approachable by providing a background for names and places that may have otherwise been unknown. Any reader with a love for conservation and true-life wilderness narratives will undoubtedly admire and relish Proenneke's tales of living in the wild. Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports--books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team. In addition to books on popular team sports, we also publish books for a wide variety of athletes and sports enthusiasts, including books on running, cycling, horseback riding, swimming, tennis, martial arts, golf, camping, hiking, aviation, boating, and so much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other

publishers and to authors whose work might not otherwise find a home. [Paleontological Resources Preservation \(Us Forest Service Regulation\) \(Fs\) \(2018 Edition\)](#) Skyhorse Publishing Inc.

The Kenai Fjords National Park, Alaska National Park series book, provides insight into this rare jewel. Whales, sea otters, and sea birds flock to the bountiful coastal fjords shaping the Kenai Fjords National Park's 400 miles of shoreline, where glaciers retreat, forests rebound and wildlife thrives in evergreen forests. The lyrical writing and stunning photographs in this 64-page book reveal the geological, natural and cultural histories that make this park one of the most ancient and pristine places that you'll ever see. Kenai Fjords National Park is first in a series of books about Alaska's fifteen national parks.

On January 1 of 2016, Stefanie Payne, a creative professional working at NASA Headquarters, and Jonathan Irish, a photographer with National Geographic, left their lives in Washington, D.C. and hit the open road on an expedition to explore and document all 59 of America's national parks during the centennial celebration of the U.S. National Park Service - 59 parks in 52 weeks - the Greatest American Road Trip. Captured in more than 300,000 digital photographs, written stories, and videos shared by the national and international media, their project resulted in an incredible view of America's National Park System seen in its 100th year. 'A Year in the National Parks, The Greatest American Road Trip' is a gorgeous visual journey through our cherished public lands, detailing a rich tapestry of what makes each park special, as seen along an epic journey to visit them all within one special

celebratory year.

The 49th state is home to magnificent mountains, immense glaciers, and massive stretches of wilderness. Alaska is a unique place where people live in close proximity to the natural world, and where humans and wildlife coexist, albeit very carefully. In *100 Things to Do in Alaska Before You Die*, readers will find inspiration for experiences that will draw you to the Last Frontier. Watch a glacier calve thunderously into the sea in Glacier Bay National Park and Preserve.

Spy moose in Denali National Park and Preserve, or trek on sand dunes in Kobuk Valley National Park. Whether your activity of choice is paddling through the quiet, riding a dogsled on top of a glacier, reeling in a trophy halibut, snorkeling, or yoga with reindeer, Alaska is always ready for the adventurous in heart and spirit. Local travel enthusiasts Fran Golden and Midgi Moore consider this their love letter to Alaska. Come along with them for inspiration for dining, imbibing, and otherwise having a good time in their favorite state.

- Chronicles the first all-African American summit attempt on Denali, the highest point in North America
- Part adventure story, part history, and part argument for the importance of inspiring future generations to value nature The nation's wild places—from national and state parks to national forests, preserves, and wilderness areas—belong to all Americans. But not all of us use these resources equally. Minority populations are much less likely to seek recreation, adventure, and solace in our wilderness spaces. It's a difference that African American author James Mills addresses in his new book, *The Adventure Gap: Changing the Face of the Outdoors*. Bridging the so-called "adventure gap" requires role models who can inspire the uninitiated to experience and enjoy wild places. Once

new visitors are there, a love affair often follows. This is important because as our country grows increasingly multicultural, our natural legacy will need the devotion of people of all races and ethnicities to steward its care. In 2013, the first all-African American team of climbers, sponsored by the National Outdoor Leadership School (NOLS), challenged themselves on North America's highest point, the dangerous and forbidding Denali, in Alaska. Mills uses Expedition Denali and its team members' adventures as a jumping-off point to explore how minority populations view their place in wild environments and to share the stories of those who have already achieved significant accomplishments in outdoor adventures—from Mathew Henson, a Black explorer who stood with Peary at the North Pole, to Kai Lightner, a teenage sport climber currently winning national competitions. The goal of the expedition, and now the book, is to inspire minority communities to look outdoors for experiences that will enrich their lives, and to encourage them toward greater environmental stewardship.
