The Science Fair Is Freaky!: #4 John Wiley & Sons

* pick a project you'll enjoy * create a great experiment * organize your data * design a winning backboard * and more! Your all-in-one resource for science fair success Gearing up for your first science fair project? Looking for the perfect science fair survival guide? Well, now your search is over. So You Have to Do a Science Fair Project, written by an experienced science fair judge and an international science fair winner, walks you through the science fair process, one step at a time. Filled with lots of solid, practical advice and troubleshooting tips, this easy-to-use handbook covers: * The basics of the scientific method * How to find a good topic * How to do thorough research * How to create a successful experiment * How to organize your data * And much more! There are also lots of helpful suggestions for polishing your final presentation, including putting the finishing touches on your display, dressing to impress on science fair day, and knowing how to talk with the judges. Whether you're a first-time participant or a science student looking to excel, you'll find yourself turning to this invaluable resource again and again for years to come.

Water Science Fair Projects, Revised and Expanded Using the Scientific Method Simon & Schuster/Paula Wiseman Books

What is water made of? Why does ice float? What is a soap bubble? Using easy-to-find materials and the scientific method, student scientists can learn the answers to these questions and more. For students interested in competing in science fairs, the book contains lots of great suggestions and ideas for further experiments.

What Flavor is Your Personality? Experiland science books

Science certainly does not need to be complicated formulas, heavy text books and geeky guys in white lab coats with thick glasses. Science can be really simple and is actually only about understanding the world you live in! Science experiments are an awesome part of science that allows you to engage in cool and exciting hands on learning experiences that you are sure to enjoy and remember! By working through the science projects in this book, you will learn about science in the best possible way – getting your hands dirty & doing things yourself! Specially chosen to appeal to kids in grade 7, each experiment answers a particular question about a specific category of science and includes an introduction, list of the materials you need, easy-to-follow steps, an explanation of what the experiment demonstrates as well as a learn more and science glossary section! Each of these easy-to-understand sections helps explain the underlying scientific concepts to kids and will inspire them to create their own related experiments and aid in developing an inquisitive mind. Amongst many others, you will use iodine to test for the presence of starch in foods to understand how chemical analysis works, make a 'Berlese' funnel to catch soil-burrowing insects, make a depth indicator similar to the gauges used on ships, and make an electrical light bulb to learn about the resistance in electrical conduits! Other fun experiments include using chromatography to predict the 'fall' colour of a green leaf tree, make your own barometer to measure the air pressure and predict the weather, study what effect high or low temperatures have on a magnet, build your own rain alarm and many, many more! The 40 projects contained in this science experiment e-book cover a wide range of scientific topics; from Chemistry and Electricity to Life Sciences and Physics... there are even experiments on earth science, astronomy and geology all designed for young students in grade 7! With this book, you are sure to find a project that interests you. When you are interested in a certain science topic, you will have more fun, and learn more, too! Designed with safety in mind, most of the items you will need for the experiments, such as jars, aluminium foil, scissors and sticky tape, you can find around your home. Others, such as magnets, lenses or a compass, you will be able to buy quite cheaply at a hobby shop or hardware store.

Science Fair Warm-up Chapter Books

Explore the wonders of science with the very best of guides! Have you ever wished that you could observe underwater creaturesundetected? Or watch the very moment a caterpillar becomes a butterfly? Or create your own rain? Well, with Scientific AmericanGreat Science Fair Projects, you can! Enter the fascinating worldof Scientific American--the ultimate science authority--and learnhow to build an underwater periscope, photograph a lunar eclipse,grow hydroponic plants, and much, much more! From creating your ownnon-newtonian fluids (slime, putty, and goop!) to teaching a sowbug how to run through a maze, you'll be astounded at the number ofincredible things you can do with Scientific American Great ScienceFair Projects. Based on the long-standing and well-respected"Amateur Scientist" column in Scientific American, each experimentcan be done with ordinary materials found around the house or thatare easily available at low cost. Whether you're looking for a great idea for your next science fair project, want to astonishyour friends and family with your discoveries, or are justintrigued by the world around you, you'll find endless hours ofscientific \fun in this one-of-a-kind project book! ScientificAmerican magazine reaches more than three million readers globallyby subscription, on newsstands, and online at www.sciam.com. The company also publishes Scientific American Explorations, aquarterly family magazine, and the Scientific American Archive, anonline archive of issues from 1993 to the present atwww.sciamarchive.com

Ideas for Science Projects Scholastic Inc.

A great way to prepare for any science fair This comprehensive workbook from Janice VanCleave promotes science success in school and at science fair time. It features 50 complete experiments from all areas of the science curriculum, supplemented with notebook pages and a personal project journal. Middle and high school students will find plenty of suggestions for changing the experiments and designing their own, along with unique projects on related topics. With lots of illustrations and explanations that make the subject matter easy to understand, the experiments can be done at home or in the classroom and require only easy-to-find materials.

Great Science Fair Projects The Complete Handbook of Science Fair Projects

Join Bartholomew Cubbins in Dr. Seuss's Caldecott Honor-winning picture book about a king's magical mishap! Bored with rain, sunshine, fog, and snow, King Derwin of Didd summons his royal magicians to create something new and exciting to fall from the sky. What he gets is a storm of sticky green goo called Oobleck—which soon wreaks havoc all over his kingdom! But with the assistance of the wise page boy Bartholomew, the king (along with young readers) learns that the simplest words can sometimes solve the stickiest problems.

Science Fair Projects John Wiley & Sons

A fabulous collection of science projects, explorations, techniques, and ideas! Looking to wow the judges at the science fair this year? Everyone's favorite science teacher is here to help. Janice VanCleave's A+Science Fair Projects has everything you need to put together a winning entry, with detailed advice on properly planning yourproject, from choosing a topic and collecting your facts to designing experiments and presenting your findings. Featuring all-new experiments as well as time-tested projectscollected from Janice VanCleave's A+ series, this easy-to-followguide gives you an informative introduction to the science fairprocess. You get thirty-five complete starter projects on varioustopics in astronomy, biology, chemistry, earth science, andphysics, including explorations of: * The angular distance between celestial bodies * The breathing rate of goldfish * Interactions in an ecosystem * Nutrient differences in soils * Heat transfer in the atmosphere * Magnetism from electricity * And much more! You'll also find lots of helpful tips on how to develop your ownideas into unique projects. Janice VanCleave's A+ Science FairProjects is the ideal guide for any middle or high school studentwho wants to develop a stellar science fair entry.

Last-minute Science Fair Projects Sterling Publishing (NY)

Pete and his friends have a blast at the school science fair! In Pete the Cat's Supercool Science Fair from New York Times bestselling author-illustrator team Kimberly and James Dean, Pete the Cat and

his friends are excited to build the coolest volcano ever for their school's science fair. After a few unexpected mishaps, the team is finally ready. Yet after seeing their other classmates' creations, they can't help but wonder: is their volcano good enough to win first place? Thankfully, Pete has a sparkly surprise up his sleeve!

The Magic School Bus and the Science Fair Expedition HarperCollins

School is always fun in Ms. Colman's class! The kids in Ms. Colman's class are working on science projects. Bobby's group is studying a mouse named Harriet. Harriet is about to have babies. But then Harriet disappears. The science project is a big mess! And everyone thinks it is Bobby's fault.

The Secret Science Project That Almost Ate the School RH Childrens Books

New in Paper It's coming sooner than you think--the time to prepare for the next science fair! For projects, for presentation, for blue-ribbon winning ideas, there's no better place to come than here. From thinking of a unique science fair experiment to putting fabulous finishing touches on the display, this cool collection of smart and illustrated projects gives budding scientists everything they need to put together a winner--and have fun doing it, too. Kids have seen all the tricks, and they're tired of science fair books that show them (yawn) how to make the "been there, done that" volcano or another boring model of the solar system. Here are experiments they really want to do, on subjects such as slime, magic sand, video games, mummies, dog germs, horoscopes, bicycles, and more. The whole science fair experience is broken down into small, manageable steps, so youngsters won't feel overwhelmed. All safety precautions are taken, with notes on parental supervision, when necessary.

Bartholomew and the Oobleck Sandbox Publishing LLC

Meet Kylie Carson. She's a fourth grader with a big problem. How will she make friends at her new school? Should she tell her classmates she loves monster movies? Forget it. Play the part of a turnip in the school play? Disaster! Then Kylie comes up with a delicious idea: What if she starts a cupcake club? Soon Kylie's club is spinning out tasty treats with the help of her fellow bakers and new friends. But when Meredith tries to sabotage the girls' big cupcake party, will it be the end of the Cupcake Club? Includes recipes and tips to try at home! "Kids and cupcakes are the perfect recipe!"- Sophie and Katerine, stars of TLC's DC Cupcakes

Home Run! Science Projects with Baseball and Softball Sourcebooks, Inc.

Even science fair enthusiasts may dread grappling with these two questions: How can you organize many students doing many different projects at the same time? and How can you help students while giving them the freedom of choice and independence of thought that characterize genuine inquiry? Answer the questions and face science fairs without fear with help from this book.

Science Teaching in the Public Junior High School Lark Books

Pleskit and Tim's last-minute project for the science fair leads to disaster in this fifth book in the

hilarious, fast-paced, and accessible sci-fi series Sixth-Grade Alien from the bestselling author of Aliens Ate My Homework, Bruce Coville. It's science fair time again, and Tim Tomkins is in trouble. It's only two days until the big event, and he hasn't finished his project! In fact, he hasn't even started it. Given Tim's track record with homework, this is no big surprise. But this year Tim has a new resource—his alien best friend, Pleskit Meenom! Surely with his super science Pleskit can help Tim come up with a knockout project for the science fair. Pleskit makes his own science project out of helping Tim, but his solution turns out to have side effects that not even an alien could have expected! Soon Pleskit is left desperately trying to answer the question, "What do you do when you've just amputated your best friend's personality?"

Zombies of the Science Fair Brighter Child

Suggestions for science fair projects, with information on collecting data and displaying the final result.

The Cupcake Club John Wiley & Sons

Curlee Girlee's hair makes her mad! She wants it to grow down her back like spaghetti, not sideways and all curly-whirly. Curlee Girlee wants to look like everybody else- and she'll try anything to solve her problem. Then one day she discovers that her curly hair is perfect just the way it is. Curlee Girlee doesn't need to look like everyone else to be beautiful.

Science Fair Projects, Grades 5 - 8 John Wiley & Sons

"Provides several science experiments using physics and baseball or softball"--Provided by publisher.

First Place Science Fair Projects for Inquisitive Kids Scholastic Paperbacks

"This book is a good starting place for finding successful science-fair projects."--School Library Journal "Can provide needed direction to parents and students facing looming classroom deadlines."--The Los Angeles Times "Offers a real variety to young scientists."--Parent Council(R), Selected as Outstanding Any kid can be a winner, and take top honors at the school science fair, by picking one of these 100 proven first-place projects. Among the cool ideas: demonstrate the action of magnetic fields, make a moon box, build "ant architecture," and measure static electricity. Plus, there's plenty of fun in creating homemade perfume and erupting volcanoes; doing a bubble gum plant graft; and building a big green solar machine. Youngsters will find plenty of hints for crafting eye-catching displays, too.
