Out with the old and in with the new! Family physician Dr. Todd Spector presents a fresh and outrageously fun way to encourage little girls to give up their diapers. They can try it fresh-air style (in the backyard!), or use the potty with the help of a few props and plenty of imagination. Peeing in the potty is a lot more fun if you do it princess style, dance-party style, or gymnast style! Come along for a crazy ride through Potty Training Boot Camp for Twins, as you prepare to conquer and celebrate the transition to a diaper-free world! Author Dianne DeLongchamps shares her proven system for potty training twins in four days and before the age of two. The key ingredients for successful potty training are humor, patience, and an "I won't give up" attitude! Potty Training Boot Camp for Twins is a program based on loving and consistent potty training that takes the needs of twins into account. The key to this step-by-step process is the use of the American Sign Language

"potty" sign to enable your twins to effectively communicate their needs and learn the training steps quickly. Research shows that eighteen to twenty-four months is the perfect age to successfully potty train because toddlers are starting to realize their bodily functions. They can walk

themselves to and from the potty, they can pull their pants down, and they understand simple requests. When this program is complete, your twins will be in underwear during their waking hours and possibly the nap hours-and you will never have to use a diaper again.

TEACHING IS A GIFT, a very special gift. I believe it is a part of a person's DNA. There are a lot of very smart people who cannot teach because they lack this genetic part of their DNA profile. These people make great doctors, business leaders, lawyers, carpenters, etc., but not teachers. Teachers are people who can create magic and excitement in the lives of children, making them want to learn. Once a child wants to learn, a teacher's job is almost over. I taught in the inner-city. Inner-city teachers go where most teachers do not want to go. However, I loved every day. This book, with just a few exceptions, is a true story of my journey. I couldn't make up stories this good, this funny, or this sad. So, follow me to the other side.

Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man's best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.
