State by State Guide to Budget Motels, 1994 Routledge

The encyclopedia of the newspaper industry.

Billboard Open Road Media

The city of Athens is a picturesque, quintessential southern town in north central Alabama, full of folklore and history. The town may also have more ghost stories per capita than any other town in the South. This book collects, for the first time, the best ghost stories that Athens has to offer. You'll read about: \* the frenzied spirits that beat on the windows of town square buildings in their attempt to escape an 1893 inferno; \* the phantom grandfather clock in the George S. Houston Library and House that chimes but cannot be found; \* the lonely ghost of Founders Hall whose lantern light travels from window to window as she searches for her lost love; \* the forlorn spirit of the Vasser-Lovvorn Home whose recurring screams from the attic pierce the night; \* the ghost child of the Donnell House who was frightened to death by Union soldiers during the Civil War invasion of the town; \* and many more.

Issues

Technology is meant to make life easier and to raise its quality.

Our interaction with technology should be designed according to human needs instead of us being required to adapt to technology. Even so, technology may change quickly and people and their habits change slowly. With the aim of supporting user acceptance of iTV, the focus of this book is on the usability of iTV applications. A method for developing interaction design patterns especially for new technologies is presented for the first time. The main characteristics covered in this new approach are: systematic identification of recurrent design problems; usability as a quality criterion for design solutions; integration of designers into the pattern development process including identification of designers' needs, and iterative evaluation and optimisation of patterns to encourage designers to accept and use them; usability testing to identify proven design solutions and their trade-offs; presentation of specific design guidelines.

Cablefile Omnigraphics

"A biography of great immediacy. . . . There are many sections of great poignancy, many funny things, many of electric intimacy and candor . . . there is spellbinding power, never more so than in describing Cheever's death, pages that are both terrible and deeply moving; one is losing an old, beloved friend." —James Salter, Los Angeles Times Book Review "John Cheever: A Biography is clearly an indispensable book. Donaldson moves gracefully from the personal to the literary. . . . Solidly researched and entirely readable, admiring of the writer and knowing about the man. Stuffed with fascinating anecdotes. It's a gut-wrenching story. Donaldson tells it straight, without embellishment, and our attention never strays." —Dan Cryer, Newsday "A coup of investigative reporting." —Publishers Weekly "Both erudite and earthy. What emerges is a rich tapestry that gives the reader extraordinary insight into the workings of a master storyteller's mind." —Jean Graham, New York Daily News "John Cheever: A Biography by Scott Donaldson is as readable and 'unputdownable' as any thriller." —T. Coraghessan Boyle "A revelation. What a triumph." —Frederick Exley "Donaldson has set a high standard that other biographers will find difficult to equal." —John Blades, Chicago Tribune

Subject Guide to Forthcoming Books Libraries Unlimited

A deep dive into the world of online and multimedia longform

storytelling, this book charts the renaissance in deep reading, viewing and listening associated with the literary mind, and the resulting implications of its rise in popularity. David O. Dowling argues that although developments in media technology have enabled the ascendance of nonfictional storytelling to new heights through new forms, it has done so at the peril of these intensely persuasive designs becoming deployed for commercial and political purposes. He shows how traditional boundaries separating genres and dividing editorial from advertising content have fallen with the rise of media hybridity, drawing attention to how the principle of an independent press can be reformulated for the digital ecosystem. Immersive Longform Storytelling is a compelling examination of storytelling, covering multimedia features, on-demand documentary television, branded digital documentaries, interactive online documentaries, and podcasting. This book's focus on both form and effect makes it a fascinating read for scholars and academics interested in storytelling and the rise of new media.

In *Upscaling Downtown*, anthropologist Brett Williams provides an ethnography of a changing urban neighborhood that she calls "Elm Valley." Located in Washington, D.C., Elm Valley was one of the first neighborhoods to draw middle-class property owners back to the inner city, but a faltering housing industry halted what might have been the rapid displacement of the poor. As a result, Elm Valley experienced several years of stalled gentrification. It

was a period when very unlikely people lived side by side: black families who had migrated to the nation's capital from the Carolinas decades earlier, newly arrived refugees from Central America and Southeast Asia, and more prosperous whites. For Williams, a ten-year resident of Elm Valley, stalled gentrification offered a rare opportunity to observe how people 'with varied cultural traditions and economic resources saw and used the neighborhood in which they lived.

Arts & Humanities Citation Index New York : Ballantine Books  
 Animal abuse has been an acknowledged problem for centuries, but only within the past few decades has scientific research provided evidence that the maltreatment of animals often overlaps with violence toward people. The variants of violence, including bullying or assaults in a schoolyard, child abuse in homes, violence between adult intimate partners, community hostility in our streets and neighborhoods, and even the context of war, are now the subject of concerted research efforts. Very often, the association of these forms of violence with cruelty to animals has been found. The perpetrators of such inhumane treatment are often children and adolescents. How common are these incidents? What motivates human maltreatment of animals? Are there cultural, societal, neighborhood, and family contexts that contribute to cruelty to animals? How early in a child's life does cruelty to animals emerge and are these incidents always a sign of future interpersonal violence? Are there ways of preventing such cruelty? Can we intervene effectively with children who already have a history of abuse and violence?  
 Children and Animals: Exploring the Roots of Kindness and Cruelty presents the current scientific and professional wisdom about the relation between the maltreatment of animals and interpersonal violence directed toward other human beings. However, the author, Frank R. Ascione, a noted expert in these areas, writes in a style and presents the findings in a language that will be understandable to parents, teachers, counselors, clergy, animal welfare professionals, foster parents, mental health professionals, youth workers, law enforcement professionals, and anyone else whose work or interest crosses into the lives of children and adolescents.

**Immersive Longform Storytelling** iUniverse

The throngs at Woodstock, Jane Fonda in Hanoi, I Have a Dream, burning draft cards, fire in the streets--these images of the 1960s are still very much alive today. What happened to the people and principles that dominated that decade? Which leaders from those turbulent years had the most lasting effect on our lives today? How well have the principles for which those leaders fought so strongly withstood the test of time? This thought-provoking biographical dictionary allows the reader to study the leaders, both conservative and liberal, their ideals, and their enduring influence. With major sections on racial democracy, peace and freedom, sexuality and gender, the environment, radical culture, and visions of alternative societies, Leaders from the 1960s includes entries on a wide selection of nationally prominent activists of the 1960s. In addition to those who dominated only the sixties, the volume includes earlier activists who came into

prominence in the 1960s and activists of the era who came into prominence since the 1960s. Each entry provides a biographical sketch, but the focus of the entries is on the person's basic concepts or the essence of his or her work and the public response it generated. Included are extensive bibliographies on the individuals and the period.
