A.E.A. Technical Training Manual Unesco

"This manual has been designed to supplement classroom instruction and in-field training procedures in cable technology. It will prove a handy reference tool throughout your career in cable communications. The manual will provide a handy reference tool throughout your career in cable communications. The manual will provide a strong foundation in cable television basics through its careful explanations of cable theory, terminology, and the tools and paperwork you will utilize on a regular basis as an ATC installer."-- Introduction.
Technical Training Manual

The toolkit consists of two companion volumes - Solar Photovoltaic Systems: Technical Training Manual and Solar Photovoltaic Project Development. The overall objective of this toolkit is to provide comprehensive training material on the innovation, application, installation, operation, monitoring and

evaluation, management maintenance and rehabilitation of PV systems as well as providing useful information for advocacy, awareness raising, innovation, policy and planning. It contains comprehensive technical, educational and geographical coverage. It provides a complete course in PV applications for rural electrification at three levels: instructor, senior technician and field technician. This toolkit is based on experience gained in the Pacific, where solar photovoltaics and rural electrification were pioneered in the 1970s and 1980s. Solar Photovoltaic Systems Technical Training Manual contains detailed descriptive texts and graphics.
