Michael Flynn has written the best SF in the tradition of Robert A. Heinlein of the last decade. His major work was the Firestar sequence, a four-book future history. "As Robert A. Heinlein did and all too few have done since, Michael Flynn writes about the near future as if he'd been there and was bringing back reports of what he'd seen," said Harry Turtledove. Now, in this sweeping stand-alone epic of the spaceways, Flynn grows again in stature, with an SF novel worthy of the master himself. Indeed, if Heinlein's famous

character, the space-faring poet Rhysling, had ever written a novel, this would be it. This is a compelling tale of the glory that was. In the days of the great sailing ships, in the mid-twenty-first century, when magnetic sails drew cargo and passengers alike to every corner of the solar system, sailors had the highest status of all spacemen, and the crew of the luxury liner the River of Stars, the highest among all sailors. But development of the Farnsworth fusion drive doomed the sailing ships, and now the River of Stars is the last of its kind, retrofitted with engines, her mast vestigial, her sails unraised for years. An ungainly hybrid, she operates in the late

years of the century as a mere tramp freighter among the outer planets, and her crew is a motley group of misfits. Stepan Gorgas is the escapist executive officer who becomes captain. Ramakrishnan Bhattejri is the chief engineer who disdains him. Eugenie Satterwaithe, once a captain herself, is third officer and, for form's sake, sailing master. When an unlikely and catastrophic engine failure strikes the River, Bhattejri is confident he can effect repairs with heroic engineering, but Satterwaithe and the other sailors among the crew plot to save her with a glorious last gasp for the old ways, mesmerized by a vision of arriving at Jupiter proudly under sail. The

story of their doom has the power, the poetry, and the inevitability of a Greek tragedy. This is a great science fiction novel, Flynn's best yet. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

A deeply researched and engaging account of the use of U-Boats in the First World War.

The focus touches on both diplomatic and economic aspects as well as the tactical and strategic use of the U-boats. The book also examines the role played by US president Woodrow Wilson and his response to American shipping being sunk by U-boats and how that ultimately forced his

hand to declare war on Germany.

In December 1913, the New York World newspaper published the first crossword in history. It appeared in their Sunday supplement, "Fun." A century later, this absorbing puzzle continues to attract (and infuriate) millions of devotees every day. But the world's most popular--and seemingly mundane--pastime has a surprising history, filled with intrigue and adventure. Paolo Bacilieri's FUN transports us from turn-of-the-century New York to present-day Milan, taking in stories of ingenious puzzle makers, ardent solvers, and intellectual luminaries.

Part detective story, part docudrama, and interlaced with a fiction of Bacillieri's own imagining, FUN questions the crossword's "harmless" status. Sure, it's fun-- but could it also be a form of resistance, of cryptic communication, of espionage?
