In a global context in which phenomena of migration play an ever more important role, the ways individual and collective experiences of migration are covered in the media, represented in culture, and interpreted are coming under increasing scrutiny. This book explores the complex relationship between creative engagements with migration on the one hand, and forms of knowledge about migration on the other, inquiring into the ways aesthetic practices are intertwined with knowledge structures. The book responds to three pressing research questions. First, it analyses how fictional texts, plays, images, films, and autobiographical accounts mediate forms of knowledge about migration. Second, it identifies the ways in which specific media approaches and aesthetic practices influence people's ideas about and awareness of migratory experiences in a globalized world. Finally, it delineates how historical perspectives help us compare epistemological approaches to migration in the nineteenth, twentieth, and early twenty-first centuries, and how these approaches affect the way critics and the public responded to and thought about different forms of (forced) migration. Bringing together renowned scholars working across disciplines, it investigates the possibilities and limitations that different media present when it comes to reflecting on, communicating, and imagining experiences of migration, and how these representations in turn create ways of knowing and understanding migration.

This multidisciplinary book brings together a series of critical engagements regarding the notion of ethical practice. As a whole, the book explores the question of how the current neo-liberal, socio-political moment and its relationship to the historical legacies of colonialism, white settlement, and racism inform and shape our practices, pedagogies, and understanding of encounters in diverse settings. The contributors draw largely on the work of Sara Ahmed's *Strange Encounters: Embodied Others in Post-Coloniality*, each chapter taking up a particular encounter and unravelling the elements that created that meeting in its specific time and space. Sites of encounters included in this volume range from the classroom to social work practice and from literary to media interactions, both within Canada and internationally. Paramount to the discussions is a consideration of how relations of power and legacies of oppression shape the self and others, and draw boundaries between bodies within an encounter. From a social justice perspective, *Unravelling Encounters* exposes the political conditions that configure our meetings with one another and inquires into what it means to care, to respond, and to imagine oneself as an ethical subject.

There is probably no set of issues of greater importance in the contemporary world than those that are to do with the Earth on which we live and depend. The more alienated we become from it the more we contribute to our own destruction. Christianity's complicity in this destruction is well-documented and hotly debated. Africa can ill afford to fall into the same trap that Western Christianity has in this regard. One senses the urgency of these concerns in Blasus's *African Theocology: Studies in African Religious Creation Care*. Extremely well-informed in the field, Blasus not only draws on the three major religions in Africa—Christianity, Islam, and African traditional religion—but demonstrates familiarity with the most important recent contributions in the field from

Western scholarship. With its emphasis on pedagogics, African Theocology will play a seminal role in the construction of curricula for an African Christian theology of the environment and is sure to be an essential contribution to all libraries in institutions of higher learning.

"The Oxford Handbook of Economic Imperialism examines unequal commercial, trade, and investment gains at the international level and explores how countries and nations can have exploitative relations. The book contains thirty-four chapters written by academics and experts in the field of international political economy. The chapters in the Handbook look at the history of economic imperialism from the early modern age to the present. They demonstrate the persistence of economic imperialism in today's postcolonial world and the enduring control wielded by great powers even after the end of formal empire. The book reveals how emerging powers are expanding economic control in new geographic and geopolitical contexts. The Handbook highlights the significance of economic imperialism in the structures, relations, processes, and ideas that help sustain poverty and conflict worldwide"--

The contributions to this volume cover a broad range of issues in language policy that are hotly debated in every corner of the globe. The articles included investigate the implications of language policies on the notion of language rights as the issues are played out in very specific circumstances □ from the courtroom in Australia to the legislature in California to the educational system in England to the administrative practices of the European Commission. The authors explore conflicts between basic conceptions of fairness in justice, administration and education on the one hand, and political and economic realities on the other. Articles focus on language issues in the United States, Canada, Brazil, England, France, Slovakia, Russia, Sri Lanka, Australia and several African states. Other articles consider the implications of new supernational agreements □ the European Union, NAFTA, GATT, the OAU □ on language issues in the signatory states. In sum the volume offers an extensive presentation of current issues and practices in language policy and linguistic human rights.

The global consensus in academic, specialist and public realms is that North Korea is a problem: its nuclear ambitions pose a threat to international security, its levels of poverty indicate a humanitarian crisis and its political repression signals a failed state. This book examines the cultural dimensions of the international problem of North Korea through contemporary South Korean and Western popular imagination's engagement with North Korea. Building on works by feminist-postcolonial thinkers, in particular Trinh Minh-ha, Rey Chow and Gayatri Spivak, it examines novels, films, photography and memoirs for how they engage with issues of security, human rights, humanitarianism and political agency from an intercultural perspective. By doing so the author challenges the key assumptions that underpin the prevailing realist and liberal approaches to North Korea. This research attends not only to alternative framings, narratives and images of North Korea but also to alternative modes of knowing, loving and responding and will be of interest to students of critical international relations, Korean studies, cultural studies and Asian studies.

The How and Why of UFOs is the much anticipated sequel to Kenneth W. Behrendt's previous groundbreaking work on the subject, *Secrets of UFO Technology*. The present work begins with a detailed review of the revolutionary anti-mass field theory explanation for UFO propulsion and its secondary effects which is critical to understanding how these craft can easily overcome the usual limitations imposed by gravity and inertia upon our present massive earthly air and spacecraft. This cutting edge theory is then applied to several classic UFO cases to provide previously unsuspected insights into them. Even the often overlooked topic of small automated alien probes is explored as a highly detailed probe case, personally investigated by the author, is presented and analyzed in order to reveal the amazing interior structures of the object sighted. After providing an analysis of the planets of origin of advanced spacefaring extraterrestrial beings, the possible reasons for their visitations to our Earth are considered. The author then goes on to describe the most likely biological mechanism behind the mental telepathy process that is the principle mode of communication for most extraterrestrial beings and even suggests a variety of simple methods that might actually allow human researchers to communicate with the alien pilots of the UFOs now operating in Earth's atmosphere! All of this is only a small sample of the many intriguing topics awaiting the reader in this abundantly illustrated volume. The many revelations found in *The How and Why of UFOs* are sure to delight and intrigue any student of ufology who wishes to explore this fascinating subject at its very deepest level.

Two unprecedented, striking developments form part of the reality of many Latin Americans. Recent decades have seen the dramatic rise of a new religious pluralism, namely the spread of Pentecostal Christianity - Catholic and Protestant alike - and the growth of indigenous revitalization movements. This study analyzes these major transitions, asking what roles ethnicity and ethnic identities play in the contemporary process of religious pluralism, such as the growth of the Protestant Pentecostal and neo-Pentecostal movements, the Catholic Charismatic Renewal, and the indigenous Maya movement in Guatemala. This book aims to provide an understanding of the agenda of religious movements, their motivations, and their impact on society. Such a pursuit is urgently needed in Guatemala, a postwar country experiencing acrimonious religious competition and a highly contentious debate on religious pluralism. This volume is relevant to scholars and students of Latin American Studies, Sociology of Religion, Anthropology, Practical Theology, and Political Sciences.
