By most measures, Daniel Olmes is an ordinary guy—but he’s learned how to live an extraordinary life. In *Memoirs of an Ordinary Guy*, Daniel asserts that we are all capable of being extraordinary and redefines what it means to be just another ordinary person. He is living proof that extraordinary is there for all of us. It doesn’t mean rich or famous. It doesn’t mean better. To Daniel, “extraordinary” means grateful, honest, happy, loving, fearless, and faithful. Doing extraordinary things is not what makes us extraordinary. Being extraordinary is having an extraordinary perspective on our lives and the things that happen to us. Daniel’s narrative will inspire everyone to view their lives differently, remind us of the stories that we all share, and spark a renewed curiosity about a world that’s anything but ordinary.

Young adulthood - ages approximately 18 to 26 - is a critical period of development with long-lasting implications for a person's economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. *Investing in The Health and Well-Being of Young Adults* describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. *Investing in The Health and Well-Being of Young Adults* makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. *Investing in The Health and Well-Being of Young Adults* will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

In every major city in the world there is a housing crisis. How did this happen and what can we do about it? Everyone needs and deserves housing. But today our homes are being transformed into commodities, making the inequalities of the city ever more acute. Profit has become more important than social need. The poor are forced to pay more for worse housing. Communities are faced with the violence of displacement and gentrification. And the benefits of decent housing are only available for those who can afford it. *In Defense of Housing* is the definitive statement on this crisis from leading urban planner Peter Marcuse and sociologist David Madden. They look at the causes and consequences of the housing problem and detail the need for progressive alternatives. The

housing crisis cannot be solved by minor policy shifts, they argue. Rather, the housing crisis has deep political and economic roots—and therefore requires a radical response.

What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read *Amusing Ourselves to Death*, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. *Amusing Ourselves to Death* is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." -Jonathan Yardley, *The Washington Post Book World*

As insightful and wise today as it was when originally published in 1954, Jacques Ellul's *The Technological Society* has become a classic in its field, laying the groundwork for all other studies of technology and society that have followed. Ellul offers a penetrating analysis of our technological civilization, showing how technology—which began innocuously enough as a servant of humankind—threatens to overthrow humanity itself in its ongoing creation of an environment that meets its own ends. No conversation about the dangers of technology and its unavoidable effects on society can begin without a careful reading of this book. "A magnificent book . . . He goes through one human activity after another and shows how it has been technicized, rendered efficient, and diminished in the process."—Harper's "One of the most important books of the second half of the twentieth-century. In it, Jacques Ellul convincingly demonstrates that technology, which we continue to conceptualize as the servant of man, will overthrow everything that prevents the internal logic of its development, including humanity itself—unless we take necessary steps to move human society

out of the environment that 'technique' is creating to meet its own needs."—The Nation "A description of the way in which technology has become completely autonomous and is in the process of taking over the traditional values of every society without exception, subverting and suppressing these values to produce at last a monolithic world culture in which all non-technological difference and variety are mere appearance."—Los Angeles Free Press

One-of-a-kind cultural critic and New York Times bestselling author Chuck Klosterman "offers up great facts, interesting cultural insights, and thought-provoking moral calculations in this look at our love affair with the anti-hero" (New York magazine). Chuck Klosterman, "The Ethicist" for The New York Times Magazine, has walked into the darkness. In *I Wear the Black Hat*, he questions the modern understanding of villainy. When we classify someone as a bad person, what are we really saying, and why are we so obsessed with saying it? How does the culture of malevolence operate? What was so Machiavellian about Machiavelli? Why don't we see Bernhard Goetz the same way we see Batman? Who is more worthy of our vitriol—Bill Clinton or Don Henley? What was O.J. Simpson's second-worst decision? And why is Klosterman still haunted by some kid he knew for one week in 1985? Masterfully blending cultural analysis with self-interrogation and imaginative hypotheticals, *I Wear the Black Hat* delivers perceptive observations on the complexity of the antihero (seemingly the only kind of hero America still creates). As the Los Angeles Times notes: "By underscoring the contradictory, often knee-jerk ways we encounter the heroes and villains of our culture, Klosterman illustrates the passionate but incomplete computations that have come to define American culture—and maybe even American morality." *I Wear the Black Hat* is a rare example of serious criticism that's instantly accessible and really, really funny.

Never before has the everyday soundtrack of urban space been so cacophonous. Since the 1970s, sound researchers have attempted to classify noise, music, and everyday sounds using concepts such as Pierre Shafer's sound object and R. Murray Schafer's soundscape. Recently, the most significant team of soundscape researchers in the world has been concerned with the effects of sounds on listeners.

Americans have long recognized that investments in public education contribute to the common good, enhancing national prosperity and supporting stable families, neighborhoods, and communities. Education is even more critical today, in the face of economic, environmental, and social challenges. Today's children can meet future challenges if their schooling and informal learning activities prepare them for adult roles as citizens, employees, managers, parents, volunteers, and entrepreneurs. To achieve their full potential as adults, young people need to develop a range of skills and knowledge that facilitate mastery and application of English, mathematics, and other school subjects. At the same time, business and political leaders are increasingly asking schools to develop skills such as problem solving, critical thinking, communication, collaboration, and self-management - often referred to as "21st century skills." *Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century* describes this important set of key skills that increase deeper learning, college and career readiness, student-centered learning, and higher order thinking. These labels include both cognitive and non-cognitive skills- such as critical thinking, problem solving, collaboration, effective communication, motivation, persistence, and learning to learn. 21st century skills also include creativity, innovation, and ethics that are important to later success and may be developed in formal or informal learning environments. This report also describes how these skills relate to each other and to more traditional academic skills and content in the key disciplines of reading, mathematics, and science. *Education for Life and Work: Developing Transferable Knowledge and Skills in the 21st Century* summarizes the findings of the research that investigates the importance of such skills to success in education, work, and other areas of adult responsibility and that demonstrates the importance of developing these skills in K-16 education. In this report, features related to learning these skills are identified, which include teacher professional development, curriculum, assessment, after-school and out-of-school programs, and informal learning centers such as exhibits and museums.

After Marcus Mumford of Mumford & Sons gave Kevin Alan Lamb a shoutout in front of 30k people, he realized it was time to stop covering professional sports, and become a music journalist. When *The Head and the Heart* credited him for nailing what their hit song "Rivers and Roads" means to them, he knew he had found his calling. Lamb spent the first 18 years of his life believing that he would pitch a baseball for a living, but fate intertwined when he tore his rotator cuff for the second time. Once you go all in on a dream - then witness it crumble - there's no telling how, or where we begin again. Living without passion is no way to live at all. Lamb carried this burden until he allowed the lyrics of a song from his favorite band to change his life. "Decide what to be and go be it." The Avett Brothers Seven years later he found himself in the photo bay at The Fillmore Detroit after interviewing The Avett Brothers, where they opened the evening with his song, just a few days after sharing the story he wrote with their 785K Facebook fans. Music is the vehicle that built his love into his life, what is yours? For nearly a decade Lamb has worked in live music - building community, interviewing bands, writing, photographing, managing artists, booking, and promoting shows. What is your guiding light? Which direction is it calling you in? Are you listening? Isn't it time? *Your Daily Guide to Shine* offers a hopeful glimpse into the soul of humanity through its relationship with music, dreams, and home. This collection of lyrical poetry, prose, and musician interviews will help tune your inner voice, and guide you in the direction of your joy. Your joy is your light; walk in its direction to discover your true calling and help others to do the same.
