This book should be read by everyone who sets foot in a casino --- average casino patrons, skilled players, casino employees, and anyone else. It should be required reading for police officers, regulators, other public officials, and attorneys who may represent any of the aforementioned. Bob Nersesian is an attorney who represents victims of casino wrongdoing against patrons. In an enjoyable writing style, he takes a look at the often too-cozy relationship between casinos, police, and regulators. He discusses specific cases and dispenses sound, practical advice that patrons, casinos and public officials would be wise to heed. Cases discussed include Nevada and other jurisdictions.

Urban Watershed Forestry Manual Lund Humphries Publishers Limited

For undergraduate/graduate-level courses in Hospitality Information Systems, and Hospitality Technology. This text examines technology strategies for the hospitality industry. Exceptionally practical in approach, this edition includes a new chapter on technology in the casino industry and a new chapter on technology for meetings and events. A separate chapter is devoted to planning and investment as students learn what technology exists and how to use it to succeed in the hospitality business.

Atlanta Business Chronicle Assn for Consumer Research Marketing for Hospitality and Tourism, 7/e is the definitive source for hospitality marketing. Taking an integrative approach, this highly visual, four-color book discusses hospitality marketing from a team perspective, examining each hospitality department and its role in the marketing mechanism. These best-selling authors are known as leading marketing educators and their book, a global phenomenon, is the leading resource on hospitality and tourism marketing. The Seventh Edition of this popular book includes new and updated coverage of social media, destination tourism and other current industry trends, authentic industry cases, and hands-on application activities. New to the Seventh Edition: Shows readers the importance of social media. Provides a contemporary overview of destination marketing. Reflects current

industry trends. Uses interesting industry examples to entertain and engage students. Provides hands-on application assignments. Supports teaching with comprehensive instructor supplements. *Passenger Train Emergency Preparedness (Us Federal Railroad Administration Regulation) (Fra) (2018 Edition)* Springer
'TRB's Airport Cooperative Research Program (ACRP) Report 54: Resource Manual for Airport In-Terminal Concessions provides guidance on the development and implementation of airport concession programs. The report includes information on the airport concession process; concession goals; potential customers; developing a concession space plan and concession mix; the Airport Concessions Disadvantaged Business Enterprise (ACDBE) program; and concession procurement, contracting, and management practices"--Publisher's description.

Innovative Methods in Logistics and Supply Chain Management Improving the Airport Customer Experience"TRB's Airport Cooperative Research Program (ACRP) Report 157: Improving the Airport Customer Experience documents notable and emerging practices in airport customer service management that increase customer satisfaction, recognizing the different types of customers (such as passengers, meeters and greeters, and employees) and types and sizes of airports. It also identifies potential improvements that airports could make for their customers." -- Publisher's description

Post-Tensioned Concrete Floors Transportation Research Board

The first significant history of human intervention on the landscape since Geoffrey Jellicoe's *Landscape of Man*, originally published in 1975 In many ways the history of civilization is a history of humans' relationship with nature. Starting from the dual inclination to clear land for cultivation and to enclose space for protection—the forest clearing and the walled garden—there emerges a vital and multifaceted narrative that describes our cultural relationship to, and dependence on, the landscape. Christophe Girot sets out to chronicle this history, drawing on all aspects of mankind's creativity and ingenuity. In twelve chapters, he brings together the key stories that have shaped our man-made landscapes. Each chapter consists of a thematic essay that ties together the central developments, as well as a case study illustrated with specially commissioned photographs and

meticulously detailed 3D re-creations showing the featured site in its original context. The result of over two decades of teaching experience and academic research at one of the world's leading universities, *The Course of Landscape Architecture* will reach international students and professionals. But its wealth of visual material, the wide range of its cultural references and the beauty of the landscapes it features will attract the interest of all who desire to enrich their understanding of how our landscapes have been formed, and how we relate to them.

Superconnector National Geographic Books

Abandon the networking-for-networking's-sake mentality in favor of a more powerful and effective approach to creating and enhancing connections. STOP NETWORKING. Seriously, stop doing it. Now. It is time to ditch the old networking-for networking's-sake mentality in favor of a more powerful and effective approach to creating and enhancing connections. In *Superconnector*, Scott Gerber and Ryan Paugh reveal a new category of professionals born out of the social media era: highly valuable community-builders who make things happen through their keen understanding and utilization of social capital. Superconnectors understand the power of relationship-building, problem-solve by connecting the dots at high levels, and purposefully cause different worlds and communities to interact with the intention of creating mutual value. How can you become a Superconnector? Gerber and Paugh share instructive anecdotes from a who's who roster of high achievers, revealing how to systematically manage a professional community and maximize its value. Of utmost importance is practicing Habitual Generosity, acting on the knowledge that your greatest returns come when you least expect them, and that by putting others' needs first the good karma will flow back to you tenfold. Gerber and Paugh also explore winning strategies such as *The Art of Selectivity*, a well-honed ability to define which relationships matter most for you and decide how you will maintain them over time. Full of helpful advice on how to communicate with anyone about anything, Google-proof your reputation, and much more, *Superconnector* is a must-read for those seeking personal and business success.

Integrated Science in Digital Age CRC Press

Democracy means rule by the people, but in practice even the most robust democracies delegate most rule making to a political class The gap between the public and its representatives might

seem unbridgeable in the modern world, but *Legislature by Lot* examines an inspiring solution: a legislature chosen through “sortition”—the random selection of lay citizens. It’s a concept that has come to the attention of democratic reformers across the globe. Proposals for such bodies are being debated in Australia, Belgium, Iceland, the United Kingdom, and many other countries. Sortition promises to reduce corruption and create a truly representative legislature in one fell swoop. In *Legislature by Lot*, John Gastil and Erik Olin Wright make the case for pairing a sortition body with an elected chamber within a bicameral legislature. Gastil is a leading deliberative democracy scholar, and Wright a distinguished sociologist and editor of the *Real Utopias* series, of which this is a part. In this volume, they bring together critics and advocates of sortition who have studied ancient Athens, deliberative polling, political theory, social movements, and civic innovation. Without obscuring its limitations, the contributors offer a wide variety of ideas for how to implement sortition and examine its potential for reshaping modern politics. *Legislature by Lot* includes sixteen essays that respond to Gastil and Wright’s detailed proposal. Essays comparing sortition to contemporary reforms see it as a dramatic extension of deliberative “minipublics,” which gather random samples of citizens to weigh public policy dilemmas without being empowered to enact legislation. Another set of essays explores the democratic principles underlying sortition and elections and considers, for example, how a sortition body holds itself accountable to a public that did not elect it. The third set of essays considers alternative paths to democratic reform, which limit the powers of a sortition chamber or more quickly establish a pure sortition body. With contributions by Arash Abizadeh, Tom Arnold, Terrill Bouricius, Deven Burks, Lyn Carson, Dimitri Courant, Donatella della Porta, David M. Farrell, Andrea Felicetti, James S. Fishkin, Brett Hennig, Vincent Jacquet, Raphaël Kies, Tom Malleson, Jane Mansbridge, Christoph Niessen, David Owen, John Pitseys, Min Reuchamps, Yves Sintomer, Graham Smith, Jane Suiter, and Pierre-Étienne Vandamme.

European Advances in Consumer Research Springer
 Passenger Train Emergency Preparedness (US Federal Railroad Administration Regulation) (FRA) (2018 Edition) The Law Library presents the complete text of the Passenger Train Emergency Preparedness (US Federal Railroad Administration Regulation) (FRA) (2018 Edition). Updated as of May 29, 2018 FRA is amending its existing regulation entitled Passenger Train Emergency Preparedness by revising or clarifying various provisions. The final rule clarifies that railroad personnel who communicate or coordinate with first responders during emergency situations must receive certain initial and periodic training and be subject to operational tests and inspections related to the railroad's emergency preparedness plan. The final rule also clarifies that railroads must develop procedures in their emergency preparedness plans that specifically address the safety of passengers with disabilities during actual and simulated emergency situations, such as during train evacuations. The rule also limits the need for FRA to formally approve certain purely administrative changes to approved emergency preparedness plans. In addition, the final rule requires that operational tests and inspections be conducted in accordance with a program that meets certain minimum requirements. Finally, the rule removes as unnecessary the provision discussing the preemptive effect of the regulations. This book contains: - The complete text of the Passenger Train Emergency Preparedness (US Federal Railroad Administration Regulation) (FRA) (2018 Edition) - A table of contents with the page number of each section
Beat the Players Verso Books
 "This inspiring collection compiles the most essential papers encompassing agglomeration economies. Agglomeration economies are manifested in cities and industry clusters shaping the neighborhoods and the regions that contain them. The literature is unified around several themes: Improvements in econometric methods and data, geographic scales at which agglomeration economies operate, micro-neighborhoods and mega-regions. The volume also uncovers the forces driving the field including labor markets, input markets and dynamic

phenomena such as innovation, technology change and growth. Prefaced by an original introduction from the editor, this collection promises to be a useful tool for scholars as well as a fascinating read to those interested in the subject area"--

What will the world look like in 2050? How secure is your water supply? Can we all be consumers? When does waste become a resource? These are just some of the provocative questions posed by this collection of cards focused on why and how our world is changing. Conceived and designed by the Foresight, Innovation and Incubation team at Arup, the influential consulting firm that advises on all aspects of the built environment, this card set features seven topics that have been chosen as headings for further discussion: energy, waste, climate change, water, demographics, urbanization and poverty. The 189 cards are divided into five domains known as the STEEP framework: societal, technological, economic, environmental, and political. Each card represents a single driver of change—for instance urban migration, ageing population, austerity—along with a challenging and thought-provoking question. The flip side of the card provides pertinent data to expand on the question, as well as maps, graphs, and other illustrations. An accompanying booklet offers tips on how to use these cards independently or in a group setting. Whether brainstorming for new ideas or facilitating a discussion, these graphically sophisticated cards are an excellent resource for anyone interested in the future of technology, design and sustainability or indeed the way we might live in the years to come.

Twelve Years A Slave, Illustrated Edition Prentice Hall

This college-level textbook summarizes the state of current knowledge in the rapidly expanding field of agroforestry. The book, organized into 25 chapters in six sections, reviews the developments in agroforestry during the past 15 years and describes the accomplishments in the application of biophysical (plant and soil related) and socioeconomic sciences to agroforestry. Although the major focus of the book is on the tropics, where the practice and potential of agroforestry are particularly promising, the developments in temperate zone agroforestry are also discussed. This text is recommended for students, teachers, and researchers in agroforestry, farming systems, and tropical land use.

For use in events and convention management courses

Experience the World of Meetings, Expositions, Events, and Conventions Meetings, Expositions, Events, and Conventions: An Introduction to the Industry acquaints readers with the burgeoning field of event planning. Constructed with the Delphi method based on the opinions of experts and educators, the text is divided into the most up-to-date and relevant topics of the MEEC world. A comprehensive overview of all aspects of the MEEC industry, the Fourth Edition is the ideal text with which to introduce newcomers to this broad field. The text features case studies and examples that help readers relate the material to a future career in Event Planning, as well as major trends in this fast-growing field.

The Economics of Agglomeration Harvard Business Press

Former NFL general manager and three-time Super Bowl winner Michael Lombardi reveals what makes football organizations tick at the championship level. From personnel to practice to game-day decisions that win titles, Lombardi shares what he learned working with coaching legends Bill Walsh of the 49ers, Al Davis of the Raiders, and Bill Belichick of the Patriots, among others, during his three decades in football. Why do some NFL franchises dominate year after year while others can never crack the code of success? For 30 years Michael Lombardi had a front-row seat and full access as three titans--Bill Walsh, Al Davis, and Bill Belichick--reinvented the game, turning it into a national obsession while piling up Super Bowl trophies. Now, in *Gridiron Genius*, Lombardi provides the blueprint that makes a successful organization click and win--and the mistakes unsuccessful organizations make that keep them on the losing side time and again. In reality, very few coaches understand the philosophies, attention to detail, and

massive commitment that defined NFL juggernauts like the 49ers and the Patriots. The best organizations are not just employing players, they are building something bigger. *Gridiron Genius* will explain how the best leaders evaluate, acquire, and utilize personnel in ways other professional minds, football and otherwise, won't even contemplate. How do you know when to trade a player? How do you create a positive atmosphere when everyone is out to maximize his own paycheck? And why is the tight end like the knight on a chessboard? To some, game planning consists only of designing an attack for the next opponent. But Lombardi explains how the smartest leaders script everything: from an afternoon's special-teams practice to a season's playoff run to a decade-long organizational blueprint. Readers will delight in the Lombardi tour of an NFL weekend, including what really goes on during the game on and off the field and inside the headset. First stop: Belichick's Saturday night staff meeting, where he announces how the game will go the next day. Spoiler alert: He always nails it. Football dynasties are built through massive attention to detail and unwavering commitment. From how to build a team, to how to watch a game, to understanding the essential qualities of great leaders, *Gridiron Genius* gives football fans the knowledge to be the smartest person in the room every Sunday.

Environmental Impacts of Traditional and Innovative Forest-based Bioproducts Lyons Press

Post-tensioning is the most versatile form of pre-stressing, a technique which enables engineers to make the most effective use of the material properties of concrete, and so to design structural elements which are strong, slender and efficient. Design in post-tensioned concrete is not difficult and, if done properly, can contribute significantly to the economy and the aesthetic qualities of a building. Post-tensioned floors have found widespread use in office buildings and car park structures, and are also frequently employed in warehouses and public buildings. However, in spite of this, most prestressed concrete texts devote comparatively little attention to floors, concentrating instead on beam elements. This book answers the need for a comprehensive

treatment of post-tensioned floor design.

Going Green Pearson

This book gathers selected papers presented at the 2019 International Conference on Integrated Science in Digital Age (ICIS 2019), which was jointly supported by the Institute of Certified Specialists (ICS), Russia and Springer and held in Batumi, Georgia on May 10-12, 2019. The ICIS 2019 received roughly 50 contributions, by authors hailing from six countries. Following a peer-review process, the Scientific Committee - a multidisciplinary group of 110 experts from 38 countries around the globe - selected roughly 60% for publication. The main topics covered include: Artificial Intelligence Research; Digital Business & Finance; Educational Sciences; Health Management Informatics; Public Administration in the Digital Age; and Social Problem-solving.

Information Systems for Managers Springer Science & Business Media

This report has been developed in response to widespread interest for improving both mobility choices and community character through a commitment to creating and enhancing walkable communities. Many agencies will work towards these goals using the concepts and principles in this report to ensure the users, community and other key factors are considered in the planning and design processes used to develop walkable urban thoroughfares.

Designing Walkable Urban Thoroughfares Springer Science & Business Media

Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.
