It is a little known fact that reading was taught by means of spelling for over 200 years. Today the impact of spelling on reading achievement is not as well appreciated as it once was. The late Dr. Ronald P. Carver did extensive research into the causal relationships between spelling instruction and reading ability. Carver concluded, "One very important way to learn how to pronounce more words accurately is sometimes overlooked, that is, learning to spell more words accurately." (Causes of High and Low Reading Achievement, p. 178). He also notes that "spelling was used to teach reading for almost 200 years, but by the beginning of the 20th century, the tide had so turned that learning to spell was largely seen as incidental to learning to read." Quoting C. A. Perfetti, Carver observed, "practice at spelling should help reading more than practice of reading helps spelling." (p. 179. In June of 2004 Miss Geraldine Rodgers sent me her essay, "Why Noah Webster's Way Was the Right Way." She argued from the history of reading and the psychology of reading that Webster's spelling book method of teaching reading and spelling was superior to all other methods. I was surprised to learn that that Webster, in his 1828 American Dictionary of the English Language, defined a Spelling Book as, " A book for teaching children to spell and read." He also wrote under the entry, Spelling, "To tell the name of letters of a word, with a proper division of syllables, for the purpose of learning the pronunciation. In this manner children learn to read by first spelling the words." You can see that Webster was quite clear about the dual purpose of the spelling books in his day. You can imagine my surprise at the improvement I began to get with my tutoring students when they started working through Webster's Spelling Book. I decided to type up my own edition to use in my private tutoring and my tutoring work at the Odessa Christian School in Odessa, TX, where I teach remedial reading and Spanish. In this edition, I have retained everything in the original 1908 (descendant from the 1829 edition). The only differences

relate to formatting. I chose to list the words in rows instead of columns. I also allow the words to divide at the ends of lines. I have found that this works fine for all students. We are teaching students to read and spell by syllables and not by word shapes or context. When reading and spelling are taught by the Spelling Book Method, all guessing at words from shape or context is completely eliminated. The student's total focus is on pronouncing the words correctly, high levels of comprehension are a natural result.

For increasingly data-savvy clients, lawyers can no longer give "it depends" answers rooted in anecdotal evidence. Clients insist that their lawyers justify their reasoning, and with more than a limited set of war stories. The considered judgment of an experienced lawyer is unquestionably valuable. However, on balance, clients would rather have the considered judgment of an experienced lawyer informed by the most relevant information required to answer their questions. *Data-Driven Law: Data Analytics and the New Legal Services* helps legal professionals meet the challenges posed by a data-driven approach to delivering legal services. Its chapters are written by leading experts who cover such topics as: Mining legal data Computational law Uncovering bias through the use of Big Data Quantifying the quality of legal services Data mining and decision-making Contract analytics and contract standards In addition to providing clients with data-based insight, legal firms can track a matter with data from beginning to end, from the marketing spend through to the type of matter, hours spent, billed, and collected, including metrics on profitability and success. Firms can organize and collect documents after a matter and even automate them for reuse. Data on marketing related to a matter can be an amazing source of insight about which practice areas are most profitable. Data-driven decision-making

requires firms to think differently about their workflow. Most firms warehouse their files, never to be seen again after the matter closes. Running a data-driven firm requires lawyers and their teams to treat information about the work as part of the service, and to collect, standardize, and analyze matter data from cradle to grave. More than anything, using data in a law practice requires a different mindset about the value of this information. This book helps legal professionals to develop this data-driven mindset.

ISIS closing in...An ancient middle eastern city. Two Kurdish women take up arms to defend those they love. Kobane, Syria, 2014. Chaos reigns in the streets of Kobane as the ominous sounds of mortar fire, grenades and explosions ricochet off the surrounding hills. Despite ISIS closing in, Karin and Roza's families remain to defend their homeland. When Karin's brother and Roza's husband are killed, these two best friends face the dilemma of whether to fight. Karin and Roza take up arms and face death daily to defend their families. When they find out their friend's sister has been captured, they find themselves bonded together on a dangerous rescue mission. In the end, Karin and Roza learn what courage, friendship, self-sacrifice and love for their homeland may really cost them. If you liked *The Kite Runner* by Khaled Hosseini then you will love this novel. It is a story of feminine courage, sacrifice and friendship. This Hemingwayesque novel shows the conflict with ISIS through the eyes of two strong female Kurdish soldiers. "A powerful, compassionate novel." "A strong, poignant and powerful exploration of women fighting the most terrifying enemy."

Linnea Vul Kane is looking forward to a long, lazy summer on Grandpa Heph's farm, watching newborn kittens grow up and helping out with chores. That all goes out the window the night Mars, god of war, demands her grandfather abandon her and return to Olympus for the brewing war. Now Old Vulcan is racing around the world and across higher planes with Sehmet to gather allies, leaving Linn and an old immortal friend to protect the farm and the very special litter. But even the best wards won't last forever, and when the farm goes up in flames, she is on the run with a daypack, a strange horse, a sword, and an armful of kittens. Linn needs to grow up fast and master her powers, before

the war finds the unlikely refugees... Snippet from inside the story: Linn could see a grimace pass over the man's face. In the firelight his skin was unusually red, as was his hair. She wondered why Grampa hadn't lit a lamp. "I cannot and will not leave here." The woman on the couch declared, sitting up suddenly. Linn startled as she realized that the woman was a cat... This was her grandfather's barn cat, talking and sitting on the couch. The big man stepped toward her, casting his face into shadow. Linn could still hear the sneer in his voice. "Bastet's Daughter, you are the least of our concerns. Vulcan may take on strays and broken... beings, but we do not." "I would not go with you, even without my obligations here." Grampa interjected. "Oh, the child." The man's dismissive tone made Linn's blood boil. "Not just a child. Blood of my blood." "Which I'm sure she knows nothing about. To her, you are just a broken down old smith." "Her mother has told her what we are, I am certain." "She could not even see me if she were able to wake from the spell I cast over her." Linn blinked in surprise. Not only was she wide awake, riveted to the conversation below, but she could see the red man, the cat woman, and the bulk of something else (she was no longer sure it was a man) near the door in the shadows. And as for 'what she was'... she was a human being. Wasn't she?

National literary histories based on internally homogeneous native traditions have significantly contributed to the construction of national identities, especially in multicultural East-Central Europe, the region between the German and Russian hegemonic cultural powers stretching from the Baltic states to the Balkans. *History of the Literary Cultures of East-Central Europe*, which covers the last two hundred years, reconceptualizes these literary traditions by de-emphasizing the national myths and by highlighting analogies and points of contact, as well as hybrid and marginal phenomena that traditional national histories have ignored or deliberately suppressed. The four volumes of the *History* configure the literatures from five angles: (1) key political events, (2) literary periods and genres, (3) cities and regions, (4) literary institutions, and (5) real and imaginary figures. The first

volume, which includes the first two of these dimensions, is a collaborative effort of more than fifty contributors from Eastern and Western Europe, the US, and Canada. The four volumes of the History comprise the first volume in the new subseries on Literary Cultures.

The troubled-teen industry, with its scaremongering and claims of miraculous changes in behavior through harsh discipline, has existed in one form or another for decades, despite a dearth of evidence supporting its methods. And the growing number of programs that make up this industry are today finding more customers than ever. Maia Szalavitz's *Help at Any Cost* is the first in-depth investigation of this industry and its practices, starting with its roots in the cultlike sixties rehabilitation program Synanon and Large Group Awareness Training organizations likeest in the seventies; continuing with Straight, Inc., which received Nancy Reagan's seal of approval in the eighties; and culminating with a look at the World Wide Association of Specialty Programs-the leading force in the industry today-which has begun setting up shop in foreign countries to avoid regulation. Szalavitz uncovers disturbing findings about these programs' methods, including allegation of physical and verbal abuse, and presents us with moving, often horrifying, first-person accounts of kids who made it through-as well as stories of those who didn't survive. The book also contains a thoughtfully compiled guide for parents, which details effective treatment alternatives. Weaving careful reporting with astute analysis, Maia Szalavitz has written an important and timely survey that will change the way we look at rebellious teens-and the people to whom we entrust them. *Help at Any Cost* is a vital resource with an urgent message that will draw attention to a compelling issue long overlooked.

The efforts of college and university student affairs professionals, who aim to improve student life, integrate new student groups, and attract and retain students, are becoming critical to institutions attempting to maintain enrollments of qualified students, ensure academic achievement, place graduates, and develop supportive alumni. Changes in student affairs contexts and clientele are evidenced in uneven success with students from underrepresented groups, demographic shifts, expanding use of information technologies, increasing violence, the burden of debt, and new emphasis on accountability. An expanded role for student affairs is demanded, which would require creatively and collaboratively integrating the theory and practice of student affairs, integrating the academic and student affairs communities, and integrating campus and society. Challenges for the student affairs professional in this new role include developing vision, streamlining the administrative decision making process, developing comprehensive strategies, and recommitting to student development. The new role for student affairs calls for changes in the programs and services offered, the professional skills employed by student affairs professionals, and the content of the preparation and continuing development of professionals. Education abroad is an essential part of the university student experience. Initiatives such as IIE's Generation Study Abroad

encourage more U.S. undergraduate and graduate students to study abroad. According to the Open Doors 2019 Report by the Institute for International Education (IIE), 341,751 students participated in post-secondary education abroad programs during the 2017/2018 academic year. This figure represents an increase of 2.7% of U.S. students studying abroad from the previous year. Research shows that education abroad provides students with opportunities not only to see the world but also to develop intercultural competence, which is increasingly crucial in the 21st century workplace. There are also numerous studies that show gains in autonomy, confidence, and tolerance for ambiguity in students who complete some type of study abroad experience. In sum, the education abroad experience in itself represents a powerful learning environment that continues to support personal and professional development long after returning home. Nonetheless, these learning environments must be cultivated along with faculty who develop and lead programs, as well as university partners and providers. Furthermore, education abroad programming and assessment is complex and must take into consideration many factors including academic goals, purposeful curricular development, and a balance between academics and leisure activities on site. This book explores the many aspects of education abroad as a learning environment, such as student learning outcomes, faculty development, and program assessment and evaluation. In addition, several chapters present education abroad experiences as a model for community engagement and activism. The authors represent a diverse range of institutions and perspectives and discuss programs around the globe. The book represents the voices of faculty that lead education abroad programs, students who participate in them, and also those of international students on a U.S. campus reflecting on their personal experiences abroad. Furthermore, this book contributes to the discussion of best practices to assist faculty and program directors in creating robust education abroad programs that meet the needs of their students and institutions.
