Twelfth in a series of annual reports comparing business regulation in 189 economies, Doing Business 2015 measures regulations affecting 10 areas of everyday business activity: - Starting a business -Dealing with construction permits -Getting electricity -Registering property -Getting credit -Protecting minority investors -Paying taxes -Trading across borders - Enforcing contracts -Resolving insolvency -Labor market regulations This year's report will present data for a second city for the 11 economies with more than 100 million inhabitants. These are Bangladesh, Brazil, China, India, Indonesia, Japan, Mexico, Nigeria, Pakistan, the Russian Federation, and the United States. Three of the 10 topics covered have been expanded, with further plans to expand on five additional indicators in next year's report. Additionally, the Doing Business rankings are now based on the distance to the frontier measure where each economy is evaluated based on how close their business regulations are to the best global practices. This provides a more precise view of each economy's performance and its improvement over time. The report updates all indicators as of June 1, 2014, ranks economies on their overall 'ease of doing business, ' and analyzes reforms to business regulation - identifying which economies are strengthening their business environment the most. Doing Business illustrates how reforms in business regulations are being used to analyze economic outcomes for domestic entrepreneurs and for the wider economy. It is a flagship product produced in partnership by the World Bank and IFC that garners worldwide attention on regulatory barriers to entrepreneurship. More than 60 economies have used the Doing Business indicators to shape reform agendas and monitor improvements on the ground. In addition, the Doing Business data has generated over 2,000 articles in peer-reviewed academic journals since its inception. **Kompass** World Bank Publications

"Passionate, cantankerous, and fascinating. Rather like Korea itself."--Nicholas D. Kristof, New York Times Book Review Korea

has endured a "fractured, shattered twentieth century," and this updated edition brings Bruce Cumings's leading history of the modern era into the present. The small country, overshadowed in the imperial era, crammed against great powers during the Cold War, and divided and decimated by the Korean War, has recently seen the first real hints of reunification. But positive movements forward are tempered by frustrating steps backward. In the late 1990s South Korea survived its most severe economic crisis since the Korean War, forcing a successful restructuring of its political economy. Suffering through floods, droughts, and a famine that cost the lives of millions of people, North Korea has been labeled part of an "axis of evil" by the George W. Bush administration and has renewed its nuclear threats. On both sides Korea seems poised to continue its fractured existence on into the new century, with potential ramifications for the rest of the world. *Directory of Korean trading agents* World Scientific Computer-Based Management Information System for Chang's Trading CompanyDirectory of Korean trading agentsImports of the Republic of ChinaTaiwan Trade DirectoryDoing Business 2015World Bank Publications

Taiwan Business Directory Springer Science & Business Media Ninth in a series of annual reports comparing business regulations in 183 economies, Doing Business 2012 measures regulations affecting 11 areas of everyday business activity: starting a business dealing with construction permits employing workers registering property getting credit protecting investors paying taxes trading across borders enforcing contracts closing a business getting electricity The report updates all indicators as of June 1, 2011, ranks countries on their overall "ease of doing business", and analyzes reforms to business regulation identifying which countries are strengthening their business environment the most. Doing Business 2012 includes a new set of indicators on the time, steps, and cost for a private business to get an electricity connection. The data on connection services can inform utilities, regulators and governments seeking to strengthen the performance of the electricity sector. Drawing on a now longer time series, this year's report introduces a measure to illustrate how the regulatory environment for business has changed in each economy since Doing Business 2006 was published in 2005. A new "distance to frontier" measure complements the aggregate ranking on the ease of doing business, which benchmarks each economy's current performance on the indicators against that of all other economies in the sample for a given year. A fundamental premise of Doing Business is that economic activity requires good rules that are transparent and accessible to all. Such regulations should be efficient, striking a balance between safeguarding some important aspects of the business environment and avoiding distortions that impose unreasonable costs on businesses. Where business regulation is burdensome and competition limited, success depends more on whom you know than on what you can

do. But where regulations are relatively easy to comply with and accessible to all who need to use them, anyone with talent and a good idea should be able to start and grow a business in the formal sector. The Doing Business report, which was started in 2003, has become one of the key ways in which the bank and other observers gauge business climate within developing countries... -- The Financial Times [Doing Business started] as a way to encourage countries to reduce obstacles to entrepreneurship. Developing countries compete to land a spot on the top 10 list of most-improving countries because it is seen as a way to get attention and investment. -- The Wall Street Journal [Doing Business] has succeeded in putting the issue of business red tape on the international political agenda. -- The Economist

The book is the volume of "History of Customs in the Ming Dynasty" among a series of books of "Deep into China Histories". The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600–1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070–1600 BC) before the Shang, but no writing is known from the period The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or "emperor" of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC – 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood – the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism,

Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present. Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.

Doing Business 2015 W. W. Norton & Company

This book represents the eighth edition of what has become an established reference work, MAJOR COMPANIES OF THE FAR EAST & AUSTRALASIA. This volume has been carefully researched and updated since publication of the previous edition, and provides more company data on the most important companies in the region. The information in the book has been arranged in order to allow the reader to find any entry rapidly and accurately. It is completely free of charge. For the second time, a third volume has been added to the series, covering major companies in Australia and New Zealand, in addition three indexes are provided on coloured paper at the back of the book. -- The companies listed have been selected on the grounds of the size of their sales volume or balance sheet or their importance to the business environment of the country in which they are based. The alphabetical index to companies throughout East Asia lists the importance to the business environment of the country in all companies having entries in the book irrespective of their main country of operation. The book is updated and published every year. Any company that considers it is eligible for inclusion in the next edition of East Asia lists companies by their country of operation.

Springer Science & Business Media

This book intends to examine the relationship between East Asia and Southeast Asia across three themes: historical perspectives, economic flows of capital and people, and socio-cultural connections. While a substantial number of chapters in the book focus on overseas Chinese (living in Indonesia) and their connections with China and Taiwan historically and contemporarily, they also provide in-depth knowledge of international relationship between East Asia and Southeast Asia. Part One, 'Contending Regional Approaches', consists of four chapters that help readers understand the involvement of East

Asia from a historical context. The first chapter on Taiwan before 1975 is followed by a chapter on Taiwan's strategy toward Southeast Asia after the 1980s. The remaining two chapters focus on China-Southeast Asia and Japan-Southeast Asia relations. Part Two, 'Economic Flows of Capital & People', consists of six chapters that mainly examine the flow of capital and people between Indonesia and Taiwan from the colonial period to the present and how this flow changed both societies. Part Three, 'Socio-Cultural

Connections', consists of three chapters. This part is a unique contribution to the scholarship that focuses on the transformation of both traditional and popular culture among Southeast Asia, China, and Taiwan by focusing on different agents.
