One of the first things you must achieve is for your Golden Retriever puppy to learn to control his toilet bowls, that is, to relieve himself in the place that you assign him to do so. Use newspaper or absorbent paper that you can change when it gets dirty but stay in place until it gets used to it. Educating the Golden Retriever to go to the bathroom Socialization There is nothing so important especially when the Golden Retriever puppy is not yet 3 months old, as socialization. This implies that you must try to get your dog to have contact with as many people and animals as possible, always in a positive environment and without aggressiveness. Knowledge In the same way that it is important for your Golden Retriever puppy to socialize, he must also know everything that he will have to deal with as an adult (water, cars, sounds, nail or haircuts, baths and a long etc.). And it is essential to take advantage of doing it before the age of 3 months, which is when what experts call the "socialization period"

culminates. Extra: The bites You should know that your Golden Retriever puppy needs to bite, it is something natural for him and you cannot deny, repress, or punish him for it. Proceed in a positive and persuasive way and divert attention away from the bites, to things that he cannot destroy, like his toys or a rope, rather than to your shoes or the bottom of the sofa. Train a teenage Golden Retriever A Golden Retriever dog that has been trained since childhood may seem like he is already on track to face greater challenges, but it turns out that one day (it can be any between 6 and 11 months) he stops obeying. And this is so simple, as you are growing and developing your hormonal system, which is why you have reached adolescence. Adolescence brings physiological changes, and you may notice that it interacts with other dogs in different ways. To compensate for these attitudes, which are normal and predictable, continue with the positive socialization process. Want more tips? Get this book now.
