This book represents the contributions of prominent researchers, teacher educators, policy makers, teachers, and parents on current and emerging issues facing the field of special education, and their critical thinking on how to ensure that students with disabilities receive free appropriate education in the least restrictive environment. The authors present divergent perspectives on the issues and concerns, including: (a) the emergence of more constructivistic

instruction approaches that focus increasingly on higher order thinking; (b) new organization structures for administering schools; (c) standards-based reform and the use of high stakes testing for evaluating students; (d) the changing population and the increasingly diverse demographics of the students served in the public schools; (e) the onset of the information age and the increasingly visible role of technology in the schools and the workplace; (f) concerns about student discipline and violence in schools; (g) the continuing shortage of qualified and certified special education teachers, and (h) trends in higher education focused on the reform of teacher

education such as changing standards for knowledge and skills, preparing teachers for changing roles as mentors, and changes in the teacher education process that may have precipitated or influenced issues in the field. For special education providers such as parents and teachers and for anyone interested in the field of special education.

 Building and supporting effective special education programs
 School leaders and special educators are expected to be experts on all levels and types of special education law and services, types of disability, and aspects of academic and functional

programming. With the increasing demands of the job and the ever-changing legal and educational climate, many administrators and teachers are overwhelmed, and few feel adequately prepared to meet the demands. Trends and Legal Issues in Special Education helps you build and support timely, legally sound, and effective special education services and programs. Readers will find: the most up-to-date information on how to effectively implement special education programs, processes, and procedures
 examination of a wide variety of issues, from developing and implementing individual education programs (IEPs) that confer a free

appropriate public education, Section 504, least restrictive environment (LRE), and successfully collaborating with parents, to issues regarding accountability, staffing, bullying, early childhood special education, multi-tiered systems of support (MTSS), evidence-based practices, transition, discipline, and the school-to-prison pipeline extensive references and resources Written as a comprehensive reference for all who work with students with disabilities, this book offers the most up-to-date research and field-tested strategies from a range of experts that special education professionals can confidently and immediately apply.

Inclusive Education

Rowman & Littlefield Drawing on decades of experience, Jennifer Laviano, a high-profile special education attorney, and Julie Swanson, a sought-after special education advocate, help parents of students with disabilities navigate their school systems to get the services they need for their children. Parents will find no other book on special education like *Your Special Education Rights*. Julie and Jennifer demystify the federal laws that govern the rights of public school children with disabilities and explain how school districts often ignore or circumvent these laws. They pull the curtain back on the politics of special education, exposing truths that

school districts don't want you to know, such as the fact that teachers are often under extraordinary pressure not to spend resources on services. Most importantly, they outline the central rights you and your child have regarding your child's education. Did you know that you can refer your child for a special education evaluation? That you can ask for a second opinion if you disagree with the results of some or all of the testing? That you are entitled to parent counseling, training, and more? They also show you how to take that knowledge and apply it to advocating for your child. Here's what you need to know about the paperwork you will have to complete, detailed

information on how to advocate for your child and how to craft language in documents that benefit your child, and more. Filled with vital information and invaluable resources, Your Special Education Rights gives you the information you need to help your child succeed in school and beyond.

More than any other field in education, the social and cultural foundations of education reflect many of the conflicts, tensions, and forces in American society. This is hardly surprising, since the area focuses on issues such as race, gender, socioeconomic class, the impact of technology on learning, what it means to be

educated, and the role of teaching and learning in a societal context. The Encyclopedia of the Social and Cultural Foundations of Education provides a comprehensive introduction to the social and cultural foundations of education. With more than 400 entries, the three volumes of this indispensable resource offer a thorough and interdisciplinary view of the field for all those interested in issues involving schools and society. Key Features · Provides an interdisciplinary perspective from areas such as comparative education, educational anthropology, educational sociology, the history of education, and the philosophy of

education · Presents essays on major movements in the field, including the Free School and Visual Instruction movements · Includes more than 130 biographical entries on important men and women in education · Offers interpretations of legal material including Brown v. Board of Education(1954) and the GI Bill of Rights · Explores theoretical debates fundamental to the field such as religion in the public school curriculum, rights of students and teachers, surveillance in schools, tracking and detracking, and many more · Contains a visual history of American education with nearly 350 images and an accompanying narrative Key Themes · Arts, Media, and

Technology · Curriculum · Economic Issues · Equality and Social Stratification · Evaluation, Testing, and Research Methods · History of Education · Law and Public Policy · Literacy · Multiculturalism and Special Populations · Organizations, Schools, and Institutions · Religion and Social Values · School Governance · Sexuality and Gender · Teachers · Theories, Models, and Philosophical Perspectives · A Visual History of American Education

"The purpose of this study was to explore how individualized education plan (IEP) teams determine least restrictive environment (LRE) and educational placement. This interview-based study asked 20 participants who have served on IEP Teams about the functioning of IEP Teams, particularly as the IEP Team determines LRE. Participants included five special education teachers, five general

education teachers, five building-level administrators, and five parents of children with disabilities. Five major themes emerged from the data including: (a) student data and characteristics as deficits, (b) hierarchy of IEP Team members, (c) legal requirements as a burden, (d) lack of resources and funding, and (e) continuing and predetermination of placement. Within each theme, implications of the study are discussed, and recommendations for practice and additional research are presented."--Abstract from author supplied metadata.

Special Education: What It Is and Why We Need It provides a thorough examination of the basic concept of special education, a discussion of specific exceptionalities, and constructive responses to common criticisms of special education. Whether you're a teacher, school administrator, teacher-educator, or simply interested in the topic, you will learn just what special education is, who gets it or who should get it, and why it is necessary. The second edition of this brief yet powerful primer will help you build the foundation of a realistic, rational

view of the basic assumptions and knowledge on which special education rests. Strategies for Inclusion, 3E Routledge
 Since the Education for All Handicapped Children Act now known as the Individuals with Disabilities Education Act (IDEA) 2004 was first passed, states have been required to make available to students with disabilities a free appropriate public education (FAPE) in the Least Restrictive Environment (LRE). The LRE standard that each school district must establish includes procedures to assure that, to the maximum extent appropriate, children with disabilities, including children in public or private institutions or

other care facilities, are educated with children who are not disabled, and that special classes, separate schooling, or other removal of children with disabilities from the general educational environment occurs only when the nature or severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily. Defined as the environment where the student can receive an appropriate education designed to meet his or her special educational needs, while still being educated with nondisabled peers to the maximum extent appropriate, LRE differs for each student with a

disability receiving special education and related services and the general classroom, with or without supplementary aids and services; a pull-out program for part of the day with the remainder of the day being spent in the general classroom or in activities with students who do not have disabilities; a special education class within the student's neighborhood school; or a separate school specializing in a certain type of disability. This report provides a general overview of LRE and determination of the standard on an individualized basis. Checklists are provided for ease of reference regarding characteristics of LRE, standards for determining

placement, continuum of service options, questions and answers, learning opportunities and principles for inclusive schools.

The belief that regular and special education administrators should work together to create and maintain successful education programs for all students is not new, nor is the assumption that administrator preparation programs should foster the development of an inclusive approach—yet this critical educational partnership has not reached its full potential. Despite the lack of agreement within the federal legislative branch on exactly what should be changed within our education system, some promising points of consensus have emerged: competitive grants, college and

career readiness, multi-tiered systems of support, common core standards, a rewards-based (rather than punitive) system for school improvement, the critical role of effective teachers and principals, increased school choice options, and evidence-based learning strategies, particularly in high-need schools. The third edition stresses the importance of these key points. Each chapter features case studies that simulate real-life situations readers are likely to encounter in their careers as administrators. Within the safety of the classroom, they will rehearse controversial scenarios involving inclusive school governance, school reform, identification

and placement, conflict resolution, program evaluation, fiscal issues, transportation, and discipline. Enhanced practice situations and role-play exercises emphasize the special education administrator's role in resolving difficult situations. The case-study approach is an effective learning tool for aspiring special and regular education administrators and instructors alike, fostering enthusiastic classroom discussion and critical thinking about potential solutions to today's complex problems in inclusive educational administration. *Special Education* John Wiley & Sons Teachers report being unprepared for the difficult behavior they encounter in

classrooms, and administrators find themselves under increasing pressure to maintain safe and orderly schools. IDEA regulations have also resulted in ongoing confusion about how schools can and should discipline students with identified disabilities. *Least Restrictive Environment* Human Kinetics Building and supporting effective special education programs School leaders and special educators are expected to be experts on all levels and types of special education law and services, types of disability, and aspects of academic and functional programming. It is essential that today's educators and school leaders are more informed about the legal rights and entitlements of students with disabilities. This resource provides eight easy-to-implement lesson plans on special education law that require no legal knowledge and can be facilitated by school principals, special education directors, teachers, or university instructors. In short one-hour sessions, participants learn by engaging in practical activities instead of only passive reading about the law. All of the lessons utilize actual situations that have led to expensive litigation and each includes the following sections: Introduction

for Facilitators;
Materials Needed;
Background, Purpose, and Objectives of the Lesson; Hook; Activity; Questions for Conversation; Test Your Knowledge; and Additional Resources. This one-of-a-kind book will help schools and districts reduce the time and energy devoted to dealing with violations of the law, resolving parental complaints, correcting errors by school employees, and more. Book Features: A focus on important special education legal issues occurring in schools today. Field-tested lesson plans that can be adopted by schools nationwide because they are based on federal law. Everything needed to teach the lessons, including materials, scripts,

interactive activities, and discussion questions. Measurable objectives and assessments to ensure the participants have learned the intended content of the lesson. "School boards spend far too much money on special education litigation—funds that could better be used to provide educational services to children. This book provides a workable framework for school administrators to give their staff the knowledge needed to make legally-correct decisions and avoid costly litigation."
