Complete Vietnamese Beginner to Intermediate Book and Audio Course University of Hawaii Press "Quite simply the most serious early intermediate textbook currently available for thoughtful American students at the university level."-- Professor

Stephen O'Harrow, Director, Center for Southeast Asian Studies, University of Hawai'i at Manoa This is a second-year, intermediate Vietnamese language course designed for high school, college or self-study. Continuing Vietnamese is your next step toward master; it follows the best-selling, linguistically-based Elementary Vietnamese, and helps you progress to an intermediate

level of communicating in Vietnamese. Invaluable for anyone planning to travel, study or work in Vietnam, this complete language course has been extensively tested at Harvard University. The accompanying native-speaker audio helps to develop listening comprehension and ensure correct pronunciation. The book contains ten lessons, each

composed of two parts. Part 1, the dialogue part, introduces the learner to conversational Vietnamese as it's currently spoken in Hanoi so that the learner will be able to participate in engaging conversation on a variety of topics. Part 2, the narrative part, includes written materials that are characteristic of formal Vietnamese. It aims to develop the learner's reading and writing skills as well as

speaking skills. The lessons focus on various aspects of life in present-day Vietnam, including topics such as culture, history, geography, economy, theater, music, tourism, literature, poetry, cinema and sports. Each lesson helps you to learn Vietnamese by building your Vietnamese proficiency using several complementary elements to thoroughly develop your

skills in reading, writing, listening and speaking. Key features of Continuing Vietnamese include: Online audio recordings offering native speakers' renditions of all the dialogues and narratives, vocabulary, grammar and usage explanations, everyday Vietnamese expressions, pronunciation drills and exercises, and even some popular Vietnamese proverbs. Exercises and

practice activities which hone your skills throughout the learning process. Cultural notes that help bring Vietnam to life. A contemporary focus on today's Vietnamese speech patterns. A format that sharpens all four language skills: listening, speaking, writing and reading. Language Institute of Southeast Asian Studies Language standardization is the process by which conventional forms of a language are established and maintained. Bringing together internationally renowned experts, this Handbook provides a comprehensive overview of standardization, norms and standard languages. Chapters are grouped into five thematic areas: models

and theories of standardization, questions of authority and legitimacy, literacy and education, borders and boundaries, and standardization in Late Modernity. Each chapter addresses a specific issue in detail, illustrating it with linguistic case studies and taking into account the particular political, social and cultural context. Showcasing cutting-edge research, it offers fresh perspectives

that go beyond traditional accounts of the standardization of national European languages, and affords new insights into minoritized, indigenous and stateless languages. Surveying a wide range of languages and approaches, this Handbook is an essential resource for all those interested in language standards and standard languages. *Language, Education and Nation-*

 The notion of empire is associated with economic and political mechanisms of dominance. For the last decades, however, there has been a lively debate concerning the question whether this concept can be transferred to the field of linguistics, specifically to research on situations of language spread on the one hand and concomitant marginalization of minority

languages on the other. The authors who contributed to this volume concur as to the applicability of the notion of empire to language-related issues. They address the processes, potential merits and drawbacks of language spread as well as the marginalization of minority languages, language endangerment and revitalization, contact-induced language change, the emergence of

mixed languages, and identity issues. An emphasis is on the dominance of non-Western languages such as Arabic, Chinese, and, particularly, Russian. The studies demonstrate that the emergence, spread and decline of language empires is a promising area of research, particularly from a comparative perspective.

 The idea of

 the old way of
