CONRAD SAIGE

A History of Methodism in Georgia

Wentworth Press

This book contains the contributions to an European symposium on "Trace Elements in Environmental History", held from June 24th to 26th at Göttingen, FRG. The conference was organised by the Institute of Anthropology of the Georg August-University in Göttingen. At first glance, it might be surprising that the organizers are anthropologists. But this is a result of change of paradigm prehistoric anthropology is facing at the time. For decades, population development and population processes in the past have been looked at in terms of morphology, thus describing the diversity of human populations by the outer appearance of the skeletal findings and by the reconstruction of population structures. The new approach concentrates less on how people in the past looked like, but moreover on what they did and how

they lived. Thus, research is based on ecosystem-theories, and it aims on the evaluation of ancient ecological features and past man/environment relationships. Research is encouraged since anthropologists are asked a lot of questions by historians and social scientists, who became more and more interested in the history of every day's life. Prehistoric anthropology today focuses also on manners, habits, ways of life and environmental constituents as they can be traced from skeletal remains, which represent an important historical source. The ecosystemic approach is promising since the experiences of daily life certainly influence human behaviour, life style and mentality, thus directing reproduction and therefore population development.

This book describes the history of platinum and its associated metals, covering important discoveries and scientific work on the platinum group metals up to the early twentieth century. With twenty-four chapters, 450 pages, over 600 references and 235 illustrations (20 in colour) including 100 portraits, "A History of Platinum and its Allied Metals" by Donald McDonald and Leslie B. Hunt is the definitive description of how science was able to progress by means of the unique properties of these metals.

Johnson Matthey Plc

This second part of a two-volume series examines in detail the financing of America's major wars from the Spanish-American War to the Vietnam War. It interweaves analyses of political policy, military strategy and operations, and war finance and economic mobilization with examinations of the events of America's major

armed conflicts, offering useful case studies for students of military history and spending policy, policymakers, military comptrollers, and officers in training.

Oak Cliff and the Missing Pieces is the first book written about the area's history in over three decades. It not only captures the beginnings of the early settlement, it takes the reader beyond a century and a half of growth and tracks how the community has evolved. The book is unique in that it captures the history of West Dallas in conjunction with its Oak Cliff neighbor and how the two transformed together over time into what we see today. The collection of historical accounts and hundreds of photos identify individuals and places of prominence finally memorialized in one anthology. The narrative also takes readers through facts and stories that have been ignored or concealed, revealing an authentic depiction of how the community was, at times, abused and neglected.

Readers will enjoy this introspective examination of the area south and west of the Trinity and will once and for all put together the missing pieces of the storied land that has long been misunderstood. All proceeds from the sale of Oak Cliff and the Missing Pieces will go to benefit non-profit organizations in Oak Cliff and West Dallas.

Reprint of the original, first published in 1866. *The History of the 33rd Division A.E.F.*

On June 24, 1961, President John Kennedy assigned Vice President Lyndon Johnson the high priority task of unifying the United States satellite programs. Also discusses the end of absolute monarchy in Siam on June 24, 1932 and the subsequent modernizing of the country's infrastructure. Also discusses the arrival of the World's Transportation Commission, a delegation of U.S. businessmen, who traveled to Siam to explore possibilities of promoting American trade.
