We revisit Lipset's law, which posits a positive and significant relationship between income and democracy. Using dynamic and heterogeneous panel data estimation techniques, we find a significant and negative relationship between income and democracy: higher/lower incomes per capita hinder/trigger democratization. Decomposing overall income per capita into its resource and non-resource components, we find that the coefficient on the latter is positive and significant while that on the former is significant but negative, indicating that the role of resource income is central to the result.

The Backyard Blacksmith shows you how—with some patience and a working knowledge of metals, basic tools, and techniques—blacksmithing can be easy to learn, and a rewarding hobby. Through instructions and illustrations, readers will learn to make simple tools and useful items, such as nails, hinges, and handles, and also an interesting mix of artful projects, such letter openers, door knockers, and botanical ornaments. Written by an expert in blacksmith and metal artist, this book provides readers with a basic understanding of blacksmithing, including an explanation of tools like an anvil, an anvil stand, hammers, and tongs. Heating techniques, like coal forging and fire tending are explained in detail, along with different types of metal, like wrought iron, cast iron, and steel. The Backyard Blacksmith walks readers through step-by-step, illustrated projects including hooks, door and gate pulls, wall-mounted hooks, knockers, racks, and more. These expert blacksmithing lessons come to life with full-color photography to illustrate the steps and provide a better understanding of the text. With this book, beginning blacksmiths can learn to turn metal from its raw shape into something useful and beautiful to behold.
