Promoting Active Learning John Wiley & Sons

What is understanding and how does it differ from knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers

teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

This dynamic approach to an exciting form of teaching and learning will inspire students to gain insights and complex thinking skills from the school library, their community, and the wider world. Guided inquiry is a way of thinking, learning, and teaching that changes the culture of a school into a collaborative inquiry community. Global interconnectedness calls for new skills, new knowledge, and new ways of learning to prepare students with the abilities and competencies they need to meet the challenges of a changing world. The challenge for the information-age school is to educate students for living and working in this information-rich technological environment. At the core of being educated today is knowing how to learn and innovate from a variety of sources. Through guided inquiry, students see school learning and real life meshed in meaningful ways. They develop higher order thinking and strategies for seeking meaning, creating, and innovating. Today's schools are challenged to develop student talent, coupling the rich resources of the school library with those of the community and wider world. How well are you preparing your students to draw on the knowledge and wisdom of the past while using today's technology to advance new discoveries in the future? This book is the introduction to guided inquiry. It is the place to begin to consider and plan how to develop an inquiry learning program for your students.

This book is written for all university and college teachers interested in experimenting with discussion methods in their classrooms. Discussion as a

Way of Teaching is a book full of ideas, techniques, and usable suggestions on: * How to prepare students and teachers to participate in discussion * How to get discussions started * How to keep discussions going * How to ensure that teachers' and students' voices are kept in some sort of balance It considers the influence of factors of race, class and gender on discussion groups and argues that teachers need to intervene to prevent patterns of inequity present in the wider society automatically reproducing themselves inside the discussion-based classroom. It also grounds the evaluation of discussions in the multiple subjectivities of students' perceptions. An invaluable and helpful resource for university and college teachers who use, or are thinking of using, discussion approaches.

Planting the Trees of Kenya Rowman & Littlefield

This revision of Bloom's taxonomy is designed to help teachers understand and implement standards-based curriculums. Cognitive psychologists, curriculum specialists, teacher educators, and researchers have developed a two-dimensional framework, focusing on knowledge and cognitive processes. In combination, these two define what students are expected to learn in school. It explores curriculums from three unique perspectives-cognitive psychologists (learning emphasis), curriculum specialists and teacher educators (C & I emphasis), and measurement and assessment experts (assessment emphasis). This revisited framework allows you to connect learning in all areas of curriculum. Educators, or others interested in educational psychology or educational methods for grades K-12.

Better Learning Through Structured Teaching Pearson

Help your students navigate complex texts in history/social studies and English language arts! This book shows you how to use a key tool—text-based questions—to build students' literacy and critical thinking skills and meet the Common Core State Standards. You'll learn how to ask text-based questions about different types of nonfiction and visual texts, including primary and secondary sources, maps, charts, and paintings. You'll also get ideas for teaching students to examine point of view, write analytical responses, compare texts, cite textual evidence, and pose their own high-level questions. The book is filled with examples that you can use immediately or modify as needed. Each chapter ends with a reflection section to help you adapt the ideas to your own classroom. What's Inside: Helpful information on teaching different types of nonfiction texts, including literary nonfiction, informational texts, primary and secondary sources, and visual texts Ideas for locating primary sources Questions students should ask about every text Techniques for soliciting higher-order questions from students Ways to get students to think critically about the relationships between texts Strategies to help students integrate information from different types of sources, a skill that will help students respond to performance tasks on the PARCC and SBAC assessments and DBQs on AP exams Tips for teaching students to write good responses to text-based questions, including how to cite sources and incorporate point of view Ideas for using rubrics and peer grading to evaluate students' responses Connections to the informational reading standards of the Common Core State Standards for English Language Arts for grades 3-12 and of the Common Core State Standards for Literacy in History/Social Studies, Science, and Technical Subjects

When it's time for a game change, you need a guide to the new rules. Helping Students Make Sense of the World Using Next Generation Science and Engineering Practices provides a play-by-play understanding of the practices strand of A Framework for K-12 Science Education (Framework) and the Next Generation Science Standards (NGSS). Written in clear, nontechnical language, this book provides a wealth of real-world examples to show you what's different about practice-centered teaching and learning at all grade levels. The book addresses three important questions: 1. How will engaging students in science and engineering practices help improve science education? 2. What do the eight practices look like in the classroom? 3. How can educators engage students in practices to bring the NGSS to life? Helping Students Make Sense of the World Using Next Generation Science and Engineering Practices was developed for K-12 science teachers, curriculum developers, teacher educators, and administrators. Many of its

authors contributed to the Framework's initial vision and tested their ideas in actual science classrooms. If you want a fresh game plan to help students work together to generate and revise knowledge—not just receive and repeat information—this book is for you.

Beautiful Questions in the Classroom Harvard Education Press

To succeed in school, students need more than subject area knowledge—they must learn how to learn. Self-regulation, an executive functioning skill, describes the ways that students focus attention on achieving success. Self-regulated learners find personal value in learning, develop effective study habits, welcome challenges, seek help, and use failure as a learning tool. This user-friendly guide makes the process of developing self-regulation as easy as ABC: Affect (how you feel), Behavior (what you do), and Cognition (how you think). Teaching students to balance these three elements builds

motivation, resilience, and college and career readiness. Digital content includes customizable forms from the book.

The Wednesday Surprise Heinemann Educational Books

This classic and heartwarming picture book was written and illustrated by the celebrated Vera B. Williams and was named a Caldecott Honor Book by the American Library Association. "A tender knockout. It's rare to find much vitality, spontaneity, and depth of feeling in such a simple, young book."—Kirkus Reviews Vera Williams tells of a young girl who, along with her waitress mother, saves coins in a big jar in hopes that they can someday buy a new chair for their apartment, the kind of chair her mother deserves after being on her feet all day in the Blue Tile Diner. Into the jar also goes the money Grandma saves whenever she gets a bargain at the market. There hasn't been a comfortable place to sit in the apartment since a fire in their previous apartment burned everything to "charcoal and ashes." Friends and neighbors brought furniture to their new apartment

downstairs, but no one brought anything big or soft or comfortable. Finally the jar is full, the coins are rolled, and in the book's crowning moment, mother, daughter, and Grandma search four different furniture stores, and after carefully trying several chairs, like Goldilocks, they find the chair they've been dreaming of at last. Vera Williams enhances this story about family, community, and the power of working together toward a common goal with her signature folk art-inspired paintings. *A Chair for My Mother* has sold more than a million copies and is an ideal choice for reading and sharing at home and in the classroom. "A superbly conceived picture book expressing the joyful spirit of a loving family."—The Horn Book Vera B. Williams's beloved picture book favorites include: "More More More," *Said the Baby* *Amber Was Brave*, *Essie Was Smart* *A Chair for Always* *A Chair for My Mother* *Cherries and Cherry Pits* *Music, Music for Everyone* *Something Special for Me* *Stringbean's Trip to the Shining Sea* *Three Days on a River* in a Red Canoe
