Advanced Placement World History: Modern Research & Education Assoc.

A History of the Modern World is a careful, well-written narrative of major events from the late Middle Ages to the political and religious conflicts at the beginning of the twenty-first century. It offers a wide-ranging survey that helps readers understand both the complexities of great events (e.g., the French Revolution, the First World War, or the collapse of great imperial systems) and the importance of historical analysis. It also provides a careful summary of the modern political changes that have affected the social and cultural development of all modern cultures. Throughout the book's lifetime, A History of the Modern World has been hailed as an elegantly written historical narrative, filled with analysis and balanced historical insights as well as its traditional attention to the processes of historical change, conflict, and political transformations. The tenth edition has been updated to include the clear maps, the survey of global economic connections, the chronologies, the illustrations, and the up-to-date bibliographies that today's students need and expect. - Publisher. Routledge

The Student Book has 15 chapters divided into 3 types: Keys to History, Historical Eras, and Historical Themes. Key chapters feature World Geography, Study Tools, and Biographies. The 6 Era chapters follow a chronology from Early Humans to Modern Times. Theme chapters focus on major historical concepts, like Agriculture or Trade, and are linked to a particular era. Chapters follow a consistent format: Introduction, Vocabulary, Big Idea, Important Topics, Review, and Write About It. The simplified text is heavily illustrated and intended to be read to students who are nonreaders. Students are frequently presented with important study tools like timelines, maps, and tables

The World in the 20th Century Modern World History

Imperialism in the Modern World combines narrative, primary and secondary sources, and visual documents to examine global relations in the nineteenth and twentieth centuries. The three co-editors, Professors Bowman, Chiteji, and Greene, have taught for many years global history classes in a variety of institutions. They wrote Imperialism in the Modern World to solve the problem of allowing teachers to combine primary and secondary texts easily and systematically to follow major themes in global history (some readers use primary materials exclusively. Some focus on secondary arguments). This book is more focused than other readers on the markets for those teachers who are offering more specialized world history courses - one important trend in global history is away from simply trying to cover everything to teaching real connections in more chronologically and thematically focused courses. The reader also provides a genuine diversity of global perspectives and invites students to study seriously world history from a critical framework. Too many readers offer a smorgasbord approach to world history that leaves students dazed and confused. This reader avoids that approach and will therefore solve many problems that teachers have in constructing and teaching world history courses at the introductory or upper-division levels. The reader will allow show students how to read historical documents through a hands-on demonstration in the

introduction. The book also incorporates images as visual documents. Finally, the book conceives of global history in the widest possible terms; it contains pieces on political, diplomatic, economic, and military history, to be sure, but it also has selections on technology, medicine, women, the environment, social changes, and cultural patterns. Other readers can not match this text's breadth because they are chronologically and thematically so extended.

Modern World History John Wiley & Sons

In an ever-shrinking world, the need for a global perspective in dealing with the modern world has become acute. This book attempts to provide such a perspective by investigating the major changes in geopolitics and world economy during the past 500 years. However compact, it enables us to understand the present unravelling of Communism and the growing challenge from Asia to Western Superiority. It is shown that in so many ways the problems of the contemporary world spring from the unprecedented era of western domination, which the non-western world is now trying to unlive.

Emerging at the turn of the seventeenth century, the Dutch Republic rose to become a powerhouse

of economic growth, artistic creativity, military innovation, religious tolerance and intellectual development. Focusing on themes that resonate with contemporary concerns, such as overseas exploration, war, slavery, migration, identity and racism, this volume charts the multiple ways in which the Dutch were connected with the outside world. It serves as an engaging and accessible introduction to Dutch history as well as a case study in early modern global expansion.

[Cross-Cultural Encounters in Modern World History](#) Routledge

This book is a thematic history of the world from 1780, the pivotal year of the revolutionary age, to the outbreak of the First World War in 1914. It brings together historical data and arguments from different societies in order to show how interconnected the world was, even before the onset of modern globalization. "The Birth of the Modern World, 1780-1914 demonstrates how events in Asia, Africa, and South America, from the decline of the eighteenth-century Islamic empires to the anti-European Boxer rebellion of 1900 in China, had a direct impact on European and American history. Conversely, it sketches the "ripple effects" of crises such as the European revolutions and the American Civil War. The book also considers the great themes of the nineteenth-century world: the rise of the modern state, industrialization, liberalism, and the progress of world religions. Engaging and original, this book both challenges and complements the dominant regional and national approaches traditionally adopted by historians.

"Navies in Modern World History traces the role of navies in world history from the early nineteenth century, through both World Wars, to the onset of the twenty-first century. Lawrence Sondhaus examines the navies of Britain, France, Germany, the United States, Japan, Brazil, Chile and the Soviet Union, demonstrating the variety of ways in which these countries have made decisive use of naval power, and the challenges these navies faced when assembling equipment and stores, training sailors, and undertaking various missions, and shows in what ways the results helped change the course of modern world history." "This book also deals with aircraft carrier design and naval aviation in the second half of the twentieth century, and the leading role of navies and shipbuilders in key technological innovations of the nineteenth century and early twentieth, including advances in steam power, armour, guns and torpedoes. Today, technological breakthroughs are centred around naval stealth and maritime propulsion systems. Special attention is devoted to the evolving state of naval technology, showing how the relative industrial capabilities of seafaring countries have been reflected in their maritime building programmes, providing an important link between the evolution of modern national fleets and the broader history of the period."
