Women run wind tunnel experiments, direct air traffic, and fabricate airplanes. American women have been involved with flight from the beginning, but until 1940, most people believed women could not fly, that Amelia Earhart was an exception to the rule. World War II changed everything. "It is on the record that women can fly as well as men," stated General Henry H. Arnold, commanding general of the Army Air Forces. The question became "Should women fly?" Deborah G. Douglas tells the story of this ongoing debate and its impact on American history. From Jackie Cochran, whose perseverance led to the formation of the Women's Army Service Pilots (WASP) during World War II to the recent achievements of Jeannie Flynn, the Air Force's first woman fighter pilot and Eileen Collins, NASA's first woman shuttle commander, Douglas introduces a host of determined women who overcame prejudice and became military fliers, airline pilots, and air and space engineers. Not forgotten are stories of flight attendants, air traffic controllers, and mechanics. *American Women and Flight since 1940* is a revised and expanded edition of a Smithsonian National Air and Space Museum reference work. Long considered the single best reference work in the field, this new edition contains extensive new illustrations and a comprehensive bibliography.

On the first warm and sunny day of the year, Washington, D.C., Martin Luther King, Jr. Middle School principal Sharon Riggs needs one more substitute teacher. Victor Kennedy, the father of the school's secretary, agrees to teach the seventh-grade American-history class for the day and tells the students about the Tuskegee Airmen. During World War II, the Tuskegee Airmen were the first black men allowed into combat, flying over 1,500 missions over the course of the war and winning a significant battle against segregation at home. Young readers will experience for themselves the triumphant pride of these men in serving their country.

Through veteran interviews, this illustrated history explores the contributions, experiences, and legacy of the Tuskegee Airmen from 1941-1946. What became known as the Tuskegee Experience began in 1931 with a letter from the head of the National Association for the Advancement of Colored People to the War Department asking that blacks be allowed to join the military. The efforts of early African American aviators, the struggle of organizations and individuals against the military's segregation policies, and the hard work of thousands of young men and women, military and civilian, black and white, all combined to make the Tuskegee Airmen an important but often

overlooked part of America's military history. Through fascinating interviews with veterans and historical photographs, *Black Knights* tells the story of the men and women who served in the training program at Tuskegee Army Air Field from 1941 to 1946. The pilots' stories are here, but so are the experiences of the mechanics, band members, armorers, staff officers, nurses, and more who proved that they had courage and perseverance, not only in war, but in peacetime as well.

On the Pacific front during World War II, strange messages were picked up by American and Japanese forces on land and at sea. The messages were totally unintelligible to everyone except a small select group within the Marine Corps: the Navajo code talkers—a group of Navajos communicating in a code based on the Navajo language. This code, the first unbreakable one in U.S. history, was a key reason that the Allies were able to win in the Pacific. *Navajo Code Talkers* tells the story of the special group, who proved themselves to be among the bravest, most valuable, and most loyal of American soldiers during World War II.

When Sheldon Russell Curtis told this story to his daughter, Rosa, she kept every word in her heart

and was to retell it many times. I will tell it in Sheldon's own words as nearly as I can. He was wounded in a fierce battle and left for dead in a pasture somewhere in Georgia when Pinkus found him. Pinkus' skin was the color of polished mahogany, and he was flying Union colors like the wounded boy, and he picked him up out of the field and brought him to where the black soldier's mother, Moe Moe Bay, lived. She had soft, gentle hands and cared for him and her Pink. But the two boys were putting her in danger, two Union soldiers in Confederate territory! They had to get back to their outfits. Scared and uncertain, the boys were faced with a hard decision, and then marauding Confederate troops rode in. In this Civil War story passed from great-grandfather to grandmother, to son, and finally to the author-artist herself, Patricia Polacco once again celebrates the shared humanity of the peoples of this world.

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," *Leaves of Grass* The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the

book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

Learn how a slave became one of the leading influential African American intellectuals of the late 19th century. African American educator, author, speaker, and advisor to presidents of the United States, Booker T. Washington was the leading voice of former slaves and their descendants during the late 1800s. As part of the last generation of leaders born into slavery, Booker believed that blacks could better progress in society through education and entrepreneurship, rather than trying to directly challenge the Jim Crow segregation. After hearing the Emancipation Proclamation and realizing he was free, young Booker decided to make learning his life. He taught himself to read and write, pursued a formal education, and went on to found the Tuskegee Institute—a black school in Alabama—with the goal of building the community's economic strength and pride. The institute still exists and is home to famous alumnae like scientist George Washington Carver.
