**Popular Science** Getty Publications  
The New York Times--bestselling author's pioneering true crime classic: It's "Truman Capote's *In Cold Blood* turned inside out" (Newsweek). During an armed robbery in 1974, five hostages were held in the basement of a small home-audio store in Ogden, Utah, by a group of enlisted US Air Force airmen stationed at a nearby base. The victims—including wife and mother Carol Naisbitt—were brutally tortured, shot in the head, and left for dead. Yet somehow, Carol's sixteen-year-old son made it out alive—and "the emotional strain his family underwent during his year-long hospitalization, is the heart of *Kinder's story*" (Kirkus Reviews). In *Victim*, the first true crime book to go beyond the headlines and tell story of love, loss, courage, and survival, "the crime in question becomes not merely something that happened to somebody else somewhere else, but rather an event that touches us all firsthand and very deeply." A compelling and tragic look at how lives can be changed forever by a random act of violence, it remains

one of the most influential books in the victims' rights movement and has become required reading for trainees at the FBI Academy at Quantico (Boston Herald).

Students and scholars of the Italian Renaissance easily fall under the spell of

its achievements: its self-confident humanism, its groundbreaking scientific innovations, its ravishing artistic production. Yet many of the developments in Italian ceramics and glass were made possible by Italy's proximity to the Islamic world. The Arts of Fire underscores how central the Islamic influence was on this luxury art of the Italian Renaissance. Published to coincide with an exhibition at the Getty Museum on view from May 4 to August 5, 2004, The Arts of Fire demonstrates how many of the techniques of glass and ceramic production and ornamentation were first developed in the Islamic East between the eighth and twelfth centuries. These techniques - enamel and gilding on glass and tin-glaze and lustre on ceramics - produced brilliant and colourful decoration that was a source of awe and admiration, transforming these crafts, for the first time, into works of art and true luxury commodities. Essays by Catherine Hess, George Saliba, and Linda Komaroff demonstrate early modern Europe's debts to the Islamic world and help us better understand the interrelationships of cultures over time.

**FDA Quarterly Activities Report**

Since it was first published 40 years ago Hugo du Plessis' Fibreglass Boats has become a classic, relied upon by owners, surveyors and boat builders keen to understand how fiberglass behaves, and obtain practical advise on working with GRP. In a deliberately non-technical manner, he explains the peculiar nature of fiberglass, its durability, its weaknesses, where it is likely to fail, the effects of use and the weather, plus the latest research into causes of the biggest worry for owners - blistering and osmosis. This masterly work will continue to be an invaluable source of reference for anyone wanting practical advice on working with GRP, in order to make repairs and improvements correctly and thus extend the life of their boat.
