**How to Help Gun Dogs Train Themselves** Stackpole Books

"Traditional gundog training is based on compulsion and rooted in a picture of the dog's nature as similar to a wolf with much emphasis on dominance and subordination. Milner turns that theory upside down citing research which finds that wolf packs operate in cooperative family groups with minimal factors of dominance. Dogs, Milner believes, learn much faster with a cooperative training model. Milner has chucked compulsion and embraced reward as the primary training tool. He

gives the reader a simple, reasonable easy-to-perform training model. His extensive practical experience leads him to condense gundog training down to a few critical behaviors. Milner gives the reader clear concise instructions producing those behaviors to develop an excellent gundog who excels also as a family dog. This is a book on how to manage the strong instincts of retrievers and influence them to work for you and with you to produce a valuable companion that enhances your outdoors experience, be it hunting ducks, or fishing for trout, or hiking in the back country."--Page [4] cover.

The Koehler Method of Dog Training Perseus Books

This is more than a training book aimed at the first time owner. According to Bill Tarrant, Field and Stream magazine's gun dog editor, Bailey's book is a stand-up,

self-propelling training and dog behaviour book that emphasises the first days of a pup's life in effective training.. In addition, Outdoor Life magazine's hunting dog editor Larry Mueller says, Hopefully Joan's insight into the dog's first year will at last clarify this important subject. The timely thrust of this book is how to accomplish the amazing things that can be done ONLY while the dog is but a baby. If you have a pup, don't put this book aside to read later..

Retrieving for All Occasions Rizzoli Publications

Nationally-recognized retriever trainers John and Amy Dahl (The 10-Minute Retriever) tackle advanced training methods and problem-solving using a dog's innate strengths to compensate for its weaknesses. They discuss how dogs learn at an advanced level while encouraging readers to tailor their training so the dog keeps progressing. Training topics include: how advanced training applies to hunting and to competition; blind retrieves; achieving range and multiple blinds; handling; hazards and formidable obstacles; more disciplined lining; marking; and the use of an e-collar in advanced field work. Problem-solving topics include: the challenges of training high-drive dogs; controlling excitement level and related problems (creeping,

breaking, vocalizing, crushing birds, freezing); mouth problems (too rough, eating birds, dropping birds, unwillingness to handle cripples); pace issues (keeping training moving and the dog challenged); inhibitions; problems related to pressure; lack of response at a distance; line manners; and hunting problems (poor perseverance, unwillingness to enter cover). The authors also discuss good general practices and individuality in training, along with specific real-life dog training stories that help readers see how the experts deal with unique problems.

**Best Way to Train Your Gun Dog** Globe Pequot

Almost every dog has some degree of prey drive - it's in his genes - some more than others. You may experience it when your otherwise well mannered dog suddenly takes off chasing after a rabbit, squirrel, or a jogger. The old approach to solving this problem involved the use of "corrective" devices like choke chains and electronic fences. A better approach includes training and management techniques that reward your dog for choosing to focus on and stay near you, the owner. Clarissa von Reinhardt has been working on the issue of how to deal with unwanted predatory behavior for many years. In this fascinating and inspiring book, she takes the readers step by step through her training methods, inviting them to learn more about a dog's complex spectrum of behavior, and ultimately to maintain as much control as possible over the urge to chase prey.

When the complexities of modern living

demanded that, for his own protection as well as his master's convenience, the dog be made controllable, the average owner sought advice from the most available source, which was, too often, some local dog-show exhibitor. Not realizing that, excepting a few praiseworthy individuals, these exhibitors were only superficially concerned with the qualities of use and companionship, an unfortunate dog owner would accept the sight of trophies or ribbons as the credits of an expert. Growing numbers of people and dogs continued to emphasize the advantages of proper dog-behavior and when, in 1935, The American Kennel Club instituted its obedience trials, the competition necessary to focus attention on results and improvement of methods was provided. And something else was observed. It was evident that thorough obedience training does more than assure a dog's response to his master's command; capacities for learning and emotional stability could be increased and integrated as permanent qualities of character. Recently, leading magazines of both general and specialized nature have made the public aware of the trained dog's potential, and of the recreational possibilities of dog training as a hobby. Interest in dog-training classes and other activities where dogs are dignified by usefulness, rather than merely looked at, is evidence that the dog-training public has outgrown the "make a game" and "tid-bit tossing" techniques that, by not being founded on positive and proper motivations, demonstrate the inadequacy of the master, thus promoting failure of response at those times when control is most needed, as well as contributing to the dog's feeling of insecurity. Dog owners of perspective have come to want the type of obedience upon which a blind person

might stake his life, and the emotional stability that is vital to dogs in the presence of small, unpredictable children. This classic includes the following chapters: Introduction Lesson I. Fables and Foibles Lesson II. Correct Equipment Lesson III. The Foundation Lesson IV. Heeling Lesson V. Sitting Lesson VI. The Automatic Sit Lesson VII. The Sit-Stay Lesson VIII. The Down Lesson IX.
