In this original report, EIRP President Paul J. Saunders assesses over 100 academic studies and government reports on solar and wind power and presents five key findings. The paper does not encourage or discourage adoption of solar and wind power; instead, it presents information helpful for policymakers, stakeholders, and others interested in solar and wind development.

Detailed advice (and plenty of sample forms, worksheets and agreements) on everything from

getting a business started to kicking out an unwanted partner later. - Los Angeles Times - It is the most definitive, complete and current do-it-yourself patent book ever written and it is written in easy-to-understand laymen's terms. - Mary Bellis, Inventor's Guide at About.com - Every step of the patent process is presented in order in this gem of a book, complete with official forms - San Francisco Chronicle - David Pressman is a practicing patent attorney, a former patent examiner, and the author of Patent It Yourself. His book is easy to understand and can save thousands of dollars by writing your own patent application, or by writing much of it,

and having a patent agent or attorney edit and write the claims section. - Jack Lander, The Inventor's Bookstore - Like all law, [patent law] is pretty complex stuff. This clearly written guide will help minimize legal fees by preparing you to do what you can for yourself.- Mike Maza, Dallas Morning News - The book presents complicated procedures in easily digested chunks, with anecdotes, forms and plenty of old-fashioned good advice - The Denver Post - The most complete and authoritative work on patents and inventions for laypersons - InventNet - Contains all necessary forms and instructions plus advice on marketing your invention. - Money

Magazine - The best roll-up-your-sleeves guide for filers who don't want to pay a ransom. - Inc.- Patent It Yourself is a top-notch reference for patent and trademark information. - San Francisco Examiner

General Information on Applying for Registration of Pesticides in the United States NOLO E-book content, devices, and services have created challenges for libraries as well as opportunities. Because the e-book playing field is constantly changing, any predictions are, at best, tenuous. Librarians must be resilient in order to manage, and not be managed by, e-books and their progenies. With their explosive sales and widespread

availability over the past few years, e-books have definitively proven that they are here to stay. In this sequel to her first book of the same title, the author dives even deeper into the world of digital distribution. Contributors from across the e-book world offer their perspectives on what is happening now and what to expect in the coming months and years. Included in this resource are: Guidelines for performing traditional library processes such as cataloging, weeding, archiving, and managing e-book accessibility for patrons with special needs; Explorations of topics such as the e-book digital divide and open-access publishing; Case

studies from an array of academic, public, and school libraries, offering firsthand accounts of what works, what doesn't, and why; Discussions of the emerging model of the electronic-only library and the rich possibilities of enhanced e-books. Consumptive Use and Irrigation Water Requirements of Milford Valley, Utah EIRP

Sue Polanka brings together a variety of professionals to share their expertise about e-books with librarians and publishers. Providing forward-thinking ideas while remaining grounded in practical information that can be implemented in all kinds of libraries, the topics explored include an introduction to e-

books and their different types, an overview of their history and development, e-book technology, why e-books are good for learning, and how librarians can market them to a wide range of users.--[back cover]
