Rust for Rustaceans Kings Road Publishing

The Big Fail is all the Modern Cosmological explanation of the origins of The Universe that amount to nothing more than repackaged ancient occultism. In trying to destroy the obvious explanation of a Divine Creator behind The Creation, Modern Cosmology has taken flashy gymnastic approach to science, where any un-proven theory, speculation, or baseless

assumption is passed off as 'the best working theory', and even as fact in modern science books. Of course, there is nothing wrong with playing around with theoretical models, and often theories can result in some kind of new scientific fact. But Modern Cosmology has not even started with a theory. Instead, they have adopted various occult mythologies, going back to Hermetic Occultism, The Kabbala, and ancient Greek Gods, to fabricate an imaginary universe that does not even exist except in science fiction books and movies. It is no accident that The Planets are named after Greek and Roman Gods such as Mercury, Venus, Earth, Mars, Ceres, Jupiter, Saturn, Uranus, Neptune, Pluto. Subsequently, the entire Modern

Cosmological field is really just a clever way of removing The Christian Creator and The Bible from the game, and supplanting them with Alchemical Models and Occult Pantheism. Was it a coincidence that High Freemason, Sir Issac Newton, spent most of his life studying Alchemy and not science? He was an Alchemist. He was not an Astronomer, Astrophysicist, nor an empirical scientist. He developed theories based upon Kabbalistic text and the imaginary forces, therein. Gravity is an imaginary force based upon an imaginary Universe, with imaginary origins. The Satanic spell that has been cast upon the world by such occult theoreticians such as Newton, Kepler, Copernicus, and Galileo has resulted in the number one most

popular religion of the past 500 years: Heliocentrism.

There are Four very, very important TRUTHS that have been kept from you! FIRST TRUTH YOU CAN UNDERSTAND The Mystery of God, The Godhead and The Trinity And those that keep it from you are without excuse. (Rom. 1:18, 19,20) It is very important to understand the numerous things that have been changed in God's Word. One of the extremely important things that has been changed is God's name. God's name, YHWH, was replaced with the word LORD. Exodus 3:15 states, "And God said . . . The LORD [YHWH] . . . This is my name forever, And this is my memorial unto all generations." "And Jesus [Yeshua] answered him, The first of all the commandments is, Hear, O Israel; The Lord [YHWH] our God is one Lord [YHWH]: And thou shalt love the Lord [YHWH] thy God with all thy heart, and

with all thy soul, and with all thy mind, and with all thy strength: this is the first commandment" (Mark 12:29, 30). Our Saviour's name was changed too! To the Greek, Iesous, which became Jesus. But His Birth name was Yeshua. Yeshua = Yehoshua = YHWH-Salvation = YHWH "As for our redeemer, the LORD [YHWH] of hosts is his name, the Holy One of Israel" (Isa. 47:4). "JESUS [Yeshua] SAID . . . IF YE BELIEVE NOT THAT I AM [HE], YE SHALL DIE IN YOUR SINS" (John 8:24). When Thomas called Jesus [Yeshua], My Lord and My God, Jesus [Yeshua] said to him, Thomas, because thou hast seen me, thou hast believed: Blessed are they that have not seen and yet have believed. Please continue with me in God's Word in this compilation of scriptures, in this revealing study; and you will understand The Mystery of God, The Godhead, The Trinity and discover three other very, very important TRUTHS that have been kept from you! Penned by the very first Crayon Activist, Bellen Woodard, this picture book will tug

at readers' heartstrings and inspire them to make a difference! When Bellen Woodard's classmates referred to "the skin-color" crayon, in a school and classroom she had always loved, she knew just how important it was that everyone understood that "skin can be any number of beautiful colors." This stunning picture book spreads Bellen's message of inclusivity, empowerment, and the importance of inspiring the next generation of leaders. Bellen created the More Than Peach Project and crayons with every single kid in mind to transform the crayon industry and grow the way we see our world. And Bellen has done just that! This moving book includes back matter about becoming a leader and improving your community just like Bellen. Her wisdom and self-confidence are sure to encourage any young reader looking to use their voice to make even great spaces better!

Add some color to your life with this step-by-step guide to crafting vibrant afghans and throw blankets. Amanda's bold and inspiring use of color and pattern gives stunning results that are deceptively easy to achieve. This colorful book contains

illustrated block-by-block guides to creating ten stunning blankets, with color variations providing twenty further creations. Each of the ten blankets is constructed from a series of simple motifs, including squares, hexagons, and triangles: creating a large and sumptuous blanket is simply a matter of piecing together colorful motifs into wonderful arrangements. The book contains basic instruction on yarns and hooks, explains how to join motifs and sew in ends, and provides a brief guide to using color. For each blanket there is an index of motifs used, accompanied by the instructions for how to make them: both in written form and as a chart. The blocks include a range of shapes and are accompanied by the “fillers” needed to fill the gaps between them. Each project has a full color chart and takes the reader block by block through the entire construction process.

Systems programming provides the foundation for the world's computation. Writing performance-sensitive code requires a programming language that puts programmers in control of how memory, processor time, and other system resources are used. The Rust systems programming language combines that control with a modern type system that catches broad classes of common mistakes, from memory management errors to data races between threads. With

this practical guide, experienced systems programmers will learn how to successfully bridge the gap between performance and safety using Rust. Jim Blandy, Jason Orendorff, and Leonora Tindall demonstrate how Rust's features put programmers in control over memory consumption and processor use by combining predictable performance with memory safety and trustworthy concurrency. You'll learn: Rust's fundamental data types and the core concepts of ownership and borrowing How to write flexible, efficient code with traits and generics How to write fast, multithreaded code without data races Rust's key power tools: closures, iterators, and asynchronous programming Collections, strings and text, input and output, macros, unsafe code, and foreign function interfaces This revised, updated edition covers the Rust 2021 Edition.
