 There are linkages, ramifications, conditions, and demands made by the global economy on domestic as well as multinational firms--and executives must be aware of all of them. One way is through the medium of accounting information and the special way it reflects the realities of international business. Providing this crucial information is the task of accounting executives and their staffs worldwide. Dr. Riahi-Belkaoui sees it as a distinctly new type of information that applies to external and international users of all kinds, operating in different nations and cultures. He identifies the various issues and problems that are most critical to the efficient management of multinational firms, provides practical solutions to international accounting problems, and with his focus on normative as well as descriptive solutions, helps confer on international accounting the status of a legitimate multidisciplinary inquiry. Dr. Riahi-Belkaoui begins by outlining environmental factors in the global economy and their affect on the definition, dimensions, and conduct of international accounting. He deals next with the international issues of taxation

philosophies, types, systems, treaties, havens, and other relevant matters, before moving to the problems of determining and estimating exchange rates and the management of economic exposure. He elaborates on this in Chapter 4 with discussions of international arbitrage, then moves to the problems facing multinational firms when they decide on a choice of organizational structure and attempt to evaluate decisional performance. Chapter 6 addresses the use and misuse of accounting information for various purposes, Chapter 7, the specifics of capital budgeting. He then looks at the accounting and tax issues involved in the determination of transfer prices by multinational firms, and next at the accounting treatments associated with foreign currency translation, transactions, and futures contracts. Most managerial accounting texts emphasize the mechanics of managerial accounting. While important, mechanics are not enough. To solve business problems, students need to understand how managerial accounting can improve decision-making, and when and where a particular tool or technique is appropriate. Balakrishnan's Managerial Accounting 1st edition presents accounting information in the context of business decision making. It combines the traditional topics of managerial accounting with a strategic framework that shows students how to construct decision models and measure information. By linking business decisions with accounting information students will be motivated to learn and make more informed decisions. Balakrishnan will appeal to courses where there is a true focus on decision making and accounting is placed within a business context.

The second edition of Dr. Demski's book reflects his experiences teaching undergraduates, masters and doctoral students. He emphasizes economic fundamentals as the guiding foundation coupled with an artful application of those fundamentals. This applies to product costing, decision making and evaluation art. Dr. Demski has also removed a great deal of traditional minutiae, in order to keep this theme in constant focus. This thematic approach, in his experience, works in dramatic fashion, and stands in sharp contrast to more traditional presentations of this material. The book is not only for use as a textbook but also as a

reference book.

Managerial Accounting for Managers, 4th edition by Noreen/Brewer/Garrison is based on the market-leading managerial accounting solution, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen solution presents integrated and proven solutions designed to help attain course goals of student readiness, comprehension of content, and application of key concepts in the managerial accounting course, while addressing the needs of instructors who do not wish to teach the financial accounting-oriented content that is included in the Garrison solution (no debits/credits). Of the three programs in the Garrison franchise (the Brewer solution, the Garrison solution, and the Noreen solution), the Noreen solution is the most pure management accounting content. The other two programs contain greater coverage of financial accounting topics. Managerial Accounting for Managers 4e is geared towards professors who love Garrison's market-leading managerial accounting content but prefer to approach their course by eliminating the debits and credits coverage. The Noreen solution includes the managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization, however, the job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting—planning, control, and decision making. McGraw-Hill's Connect Accounting offers a complete digital solution combines all the great features of Connect Accounting including McGraw-Hill's SmartBook, powered by LearnSmart, which is designed to help students learn faster and more efficiently, and retain more knowledge for greater success. In addition, Interactive Presentations deliver learning objectives in an interactive environment, giving students access to course-critical content anytime, anywhere. Guided Examples provide students with narrated and animated, step-by-step walkthroughs of algorithmic versions of assigned exercises. Auto-Graded Excel Simulations, assignable within Connect Accounting, allow students to practice their Excel skills—such as basic formulas and formatting—within the context of accounting. These questions feature animated, narrated Help and Show Me tutorials (when enabled), as well as automatic feedback and grading for both students and professors.

"This book focuses on how cost accounting helps managers make better decisions, as cost accountants increasingly are becoming integral members of their company's decision-making teams. In order to emphasize this prominence in decision making, we use the "different costs for different purposes" theme throughout this book. By focusing on basic concepts, analyses, uses, and procedures instead of procedures alone, we recognize cost accounting as a managerial tool for business strategy and implementation. We also prepare students for the rewards and challenges they face in the professional cost accounting world of today and tomorrow. For example, we emphasize both the development of technical skills such as Excel and big-data analytics to leverage available information technology and the values and behaviors that make cost accountants effective in the workplace"--
