Milford, Massachusetts, incorporated in 1780, rests on the cusp of the Blackstone River Valley National Heritage Corridor. Granite and manufacturing jobs drew immigrants to this small town during the Industrial Revolution to form a richly textured community. In this collection of the best of his columns, local historian Paul E. Curran chronicles the lives and achievements of many who left indelible imprints on Milford. Some contributed distinctive architecture, such as the stately Town Hall and the only Irish round tower in the country. Others offered gifts for the mind--major contributions to the national library system and the original version of the children's classic The Little Engine that Could. There were extraordinary athletes, intrepid travelers and those who marked the social conscience through personal sacrifice. Milford Chronicles celebrates the spirit of all who contributed to the community's rich and enduring history.

"Legends are about ordinary people who stepped up and did what had to be done." At summer's end, mysterious white pickup trucks take to the roads and compel nearly everyone to "drive off." Some of those who remain gather in a suburban Atlanta subdivision, and struggle to cope with a world whose infrastructure is rapidly crumbling. One of the few who are mentally and emotionally prepared for the end of the world is Cody Sifko, a youth who quickly becomes the inspiration for the others. When a strange homeless woman names him "Father of Nations," is she seeing his future or her own delusions? As winter and a hate group try to destroy Laurel Hills, can Cody overcome personal tragedy and seize his destiny? Love, hate, survival, and an apocalypse like no other—White Pickups is ready to take you on the ride of your life!

In order to succeed in a construction business you have to be able to mark up the price of your jobs to cover overhead expenses and make a decent profit. The problem is how much to mark it up. You don't want to lose jobs because you charge too much, and you don't want to work for free because you've charged too little. If you know how much to mark up you can apply it to your job costs and arrive at the right sales price for your work. This book gives you the background and the calculations necessary to easily figure the markup that is right for your business. Includes a CD-ROM with forms and checklists for your use.

"This book closely resonates with my journey as an entrepreneur. The book can be a wise counsellor to the people who are embarking on this entrepreneurial journey. Just like Suresh's personality, this book is understated with simple and real life experiences but highly impactful insights, tools and framework from his personal journey as an entrepreneur. His experience of more than 40 years from the revolutionary DIY Radio Kit, to a world class training institute that has trained more than 7,00,000 students till date, his journey says it all. This book is simple to understand and a ready reference guidebook that can be a handy tool for any entrepreneur. I particularly like the Start, Stop & Continue tool that helps readers reflect on actionables as per their strengths and weakness. I would recommend this book to all entrepreneurs and professionals in any part of their career." - Mr. Piyush Goyal - Minister of Coal and Renewable Energy

This book lays out, in an entertaining and step-by-step manner, the entire door-to-door sales process. From knocking on the door to closing the sale and leaving with a signed agreement, it is all here in this convenient and comprehensive Pocket Bible. Door-to-door sales expert Kim Robinson takes the guesswork out of the entire process and presents tools and techniques anyone can follow to become and remain a consistent, high-level door-to-door sales generator. Robinson makes clear exactly what to do and say to get past the door after you knock. He continues with clear and exact guidance on how to comfortably and conversationally uncover buyer needs for everything you sell, a clear and easy to follow formula on how to present and close the sale and, of course, how to overcome almost any objection. It is a must read for anyone in sales and should be required reading for everyone who sells anything door-to-door. Take the guesswork out of the process. Buy this book.

Research-Based Programming for Interior Designers prepares students to practice interior design as a knowledge-based activity. Students will learn how to use quality information from previously published sources as well as original research data to develop strategies for design solutions and client communication. Representing an evolution of author Lily Robinson's previous book Research-Inspired Design: A Step-by-Step Guide for Interior Designers (co-authored with Alexandra Parman Pitts in 2009), this new iteration focuses on the written program document as a project deliverable which connects research to the design process. In keeping with the broad scope of the previous version, this text explores student-led data-gathering techniques such as interviews, surveys, and observation and clearly illustrates how interior designers consult and coordinate with design-related fields from pre-design/programming through design development and beyond. Features · Art program includes student process work examples and clear graphic explanations of complex concepts. · Activities help students brainstorm research topics, formulate research questions, conduct field studies, seek out experts and create design concepts · Appendices provide a project program template and a student example to help students visualize their own project program.

This textbook/workbook prepares interior design students for understanding how to change their professional practice from a project-based activity to a knowledge-based activity. Robinson and Parman address the different forms of quantitative and qualitative information, the different sources of materials (especially in the age of the Internet), and how to differentiate these sources and types of information. Instructors will find the text a vital research aid for the student to develop analytical skills and help them transform these scientific models into unique and innovative processes for their design projects.
