This book is a journey through today's medical/pharmaceutical complex, which has been using Botox, surgery, and indirect voice or speech therapy to treat SD. Medical professionals and academicians are humane, well intentioned, and compassionate in treating SD, but they are on the wrong road. Dr. Cooper is the only Doctor in the world reporting and documenting peer-reviewed cures of SD (in 1980 by one of the world's leading speech pathology associations, the International Association of Logopedics and Phoniatrics). He has also published extensively about cures of other voice problems by DVR. Dr. Cooper discovered this remarkable natural, non-medical SD cure after leaving UCLA Medical Center to concentrate on his private practice.
