This Handbook strives to enhance knowledge and application within sustainability in management education (SiME) across different academic programs, geographic regions and personal/professional contexts. Cross-disciplinary and boundary-spanning, this book focuses on specific themes and is therefore split into four distinct sections: one on theory and practice, one on transformational interventions in business programs, one on the role of external agents and the last on innovative approaches in SiME.

Shaping Business Leaders: What B-Schools Don't Do examines the widespread impression that young professionals graduating from India's business schools are constantly job hopping, focus more on their own gains and lack entrepreneurship skills.

Bhandarker reiterates that India's top B-schools have to traverse miles to achieve their self-proclaimed motto of identifying and training future business leaders. They must re-examine their educational paradigm, course structure and pedagogy, and realign the competencies and disposition of their faculty.

The Standard for Business Analysis – First Edition is a new PMI foundational standard, developed as a basis for business analysis for portfolio, program, and project management. This standard illustrates how project management processes and business analysis processes are complementary activities, where the primary focus of project management processes is the project and the primary focus of business analysis processes is the product. This is a process-based standard, aligned with A Guide to the Project Management Body of Knowledge (PMBOK® Guide) – Sixth Edition, and to be used as a standard framework contributing to the business analysis body of knowledge.
