Follow along a Navy
SEAL's firsthand account

of American heroism during a secret military operation in Afghanistan in this true story of survival and difficult choices. On a clear night in late June 2005, four U.S. Navy SEALs left their base in northern Afghanistan for the mountainous Pakistani border. Their mission was to capture or kill a notorious al Qaeda leader known to be ensconced in a Taliban stronghold surrounded by a small but heavily armed force. Less than twenty-four hours later, only one of those Navy SEALs remained alive. This is the story of fire team leader Marcus Luttrell, the sole survivor of Operation Redwing, and the desperate battle in the mountains that led, ultimately, to the largest loss of life in Navy SEAL history. But it is also, more than anything, the story of his teammates, who fought ferociously beside him until he was the last one left—blasted unconscious by a rocket grenade, blown over a cliff, but still armed and still breathing. Over the next four days, badly injured and presumed dead, Luttrell fought off six al Qaeda assassins who were sent to finish him, then crawled for seven miles through the

mountains before he was taken in by a Pashtun tribe, who risked everything to protect him from the encircling Taliban killers. A six-foot-five-inch Texan, Leading Petty Officer Luttrell takes us, blow by blow, through the brutal training of America's warrior elite and the relentless rites of passage required by the Navy SEALs. He transports us to a monstrous battle fought in the desolate peaks of Afghanistan, where the beleaguered American team plummeted headlong a thousand feet down a mountain as they fought back through flying shale and rocks. In this rich, moving chronicle of courage, honor, and patriotism, Marcus Luttrell delivers one of the most powerful narratives ever written about modern warfare -- and a tribute to his teammates, who made the ultimate sacrifice for their country.

WINNER OF THE JAMES HERBERT AWARD FOR

HORROR WRITING "The Troop scared the hell out of me, and I couldn't put it down. This is old-school horror at its best."

—Stephen King Once every year, Scoutmaster Tim Riggs leads a troop of boys into the Canadian wilderness for a weekend camping trip—a tradition as comforting and reliable as a good ghost story around a roaring bonfire. But when an unexpected intruder stumbles upon their campsite—shockingly thin, disturbingly pale, and voraciously hungry—Tim and the boys are exposed to something far more frightening than any tale of terror. The human carrier of a bioengineered nightmare. A horror that spreads faster than fear. A harrowing struggle for survival with no escape from the elements, the infected...or one another. Part *Lord of the Flies*, part *28 Days Later*—and all-consuming—this tightly written, edge-of-your-seat thriller takes you deep into the heart of darkness, where fear feeds on sanity...and terror hungers for more.

Strange Birds Routledge "A strange plague called the 'Gets is decimating humanity on a global scale. It causes people to

forget--small things at first, like where they left their keys, then the not-so-small things like how to drive or the letters of the alphabet. Then their bodies forget how to function involuntarily. There is no cure. But far below the surface of the Pacific Ocean, a universal healer hailed as 'ambrosia' has been discovered. In order to study this phenomenon, a special research lab has been built eight miles under the sea's surface. When the station goes incommunicado, a brave few descend through the lightless fathoms in hopes of unraveling the mysteries lurking at those crushing depths...and perhaps to encounter an evil blacker than anything one could possibly imagine"--Page [4] of cover.

#1 INTERNATIONAL BESTSELLER AN ADAM SAVAGE BOOK CLUB PICK

The book-length answer to anyone who ever put their hand up in math class and asked, "When am I ever going to use this in the real world?" "Fun, informative, and relentlessly entertaining, *Humble Pi* is a charming and very readable guide to some of humanity's all-time greatest miscalculations—that also gives you permission to feel a little better about some of your own mistakes." —Ryan North, author of *How to Invent Everything* Our whole world is built on math, from the code running a website to the equations enabling the design of skyscrapers and bridges. Most of the time this math works quietly behind the scenes . . . until it doesn't. All sorts of seemingly

innocuous mathematical mistakes can have significant consequences. Math is easy to ignore until a misplaced decimal point upends the stock market, a unit conversion error causes a plane to crash, or someone divides by zero and stalls a battleship in the middle of the ocean. Exploring and explaining a litany of glitches, near misses, and mathematical mishaps involving the internet, big data, elections, street signs, lotteries, the Roman Empire, and an Olympic team, Matt Parker uncovers the bizarre ways math trips us up, and what this reveals about its essential place in our world. Getting it wrong has never been more fun.

My Best Friend's Exorcism

SHORTLISTED FOR THE ROGERS WRITERS' TRUST FICTION PRIZE: An infectious and heartbreaking novel from "one of this country's great kinetic writers" (*Globe and Mail*)--Craig Davidson's first new literary fiction since his bestselling, Giller-shortlisted *Cataract City*. When neurosurgeon Jake Baker operates, he knows he's handling more than a patient's delicate brain tissue--he's altering their seat of consciousness, their golden vault of memory. And memory, Jake knows well, can be a tricky thing. When growing up in 1980s Niagara Falls, a.k.a. Cataract City--a seedy but magical, slightly haunted place--one of Jake's closest confidantes was his uncle Calvin, a sweet but eccentric misfit enamored of occult artefacts and outlandish conspiracy theories. The summer Jake turned twelve, Calvin invited him to join the "Saturday

Night Ghost Club"--a seemingly light-hearted project to investigate some of Cataract City's more macabre urban myths. Over the course of that life-altering summer, Jake not only fell in love and began to imagine his future, he slowly, painfully came to realize that his uncle's preoccupation with chilling legends sprang from something buried so deep in his past that Calvin himself was unaware of it. By turns heartwarming and devastating, written with the skill and cinematic immediacy that has made Craig Davidson a star, *The Saturday Night Ghost Club* is a bravura performance from one of our most remarkable literary talents: a note-perfect novel that poignantly examines the fragility and resilience of mind, body and human spirit, as well as the haunting mutability of memory and story.

The inspiring true story of the first Girl Scout troop founded for and by girls living in a shelter in Queens, New York, and the amazing, nationwide response that it sparked “A powerful book full of powerful

women.”—Chelsea Clinton
Giselle Burgess was a young mother of five trying to provide for her family. Though she had a full-time job, the demands of ever-increasing rent and mounting bills forced her to fall behind, and eviction soon followed. Giselle and her kids were

thrown into New York City's overburdened shelter system, which housed nearly 60,000 people each day. They soon found themselves living at a Sleep Inn in Queens, provided by the city as temporary shelter; for nearly a year, all six lived in a single room with two beds and one bathroom. With curfews and lack of amenities, it felt more like a prison than a home, and Giselle, at the mercy of a broken system, grew fearful about her family's future. She knew that her daughters and the other girls living at the shelter needed to be a part of something where they didn't feel the shame or stigma of being homeless, and could develop skills and a community they could be proud of. Giselle had worked for the Girl Scouts and had the idea to establish a troop in the shelter, and with the support of a group of dedicated parents, advocates, and remarkable girls, Troop 6000 was born. New York Times journalist Nikita Stewart settled in with Troop 6000 for more than a year, at the peak of New York City's homelessness crisis in 2017, getting to know the girls and their families and witnessing

both their triumphs and challenges. In Troop 6000, readers will feel the highs and lows as some families make it out of the shelter while others falter, and girls grow up with the stress and insecurity of not knowing what each day will bring and not having a place to call home, living for the times when they can put on their Girl Scout uniforms and come together. The result is a powerful, inspiring story about overcoming the odds in the most unlikely of places. Stewart shows how shared experiences of poverty and hardship sparked the political will needed to create the troop that would expand from one shelter to fifteen in New York City, and ultimately inspired the creation of similar troops across the country. Woven throughout the book is the history of the Girl Scouts, an organization that has always adapted to fit the times, supporting girls from all walks of life. Troop 6000 is both the intimate story of one group of girls who find pride and community with one another, and the larger story of how, when we come together, we can find support and commonality and

experience joy and success, no matter how challenging life may be.

This fascinating book is the first volume in a projected cultural history

of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same

time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.
