 Dental disease is THE most common disease we treat in small animal practice, yet dentistry remains an area of mystery for many vets. It is also one of the key areas of practice where we can make a huge impact on the health and welfare of our patients. This one day program was designed to give vets in small animal and mixed general practice confidence in diagnosing the disease we are seeing (and missing!) in our patients' mouths every day. This is the proceedings from this CVE event held in Port Macquarie on 19 October, 2014.
