The Watts Bar Steam Plant is the first fuel-burning electric power plant constructed by the TVA. The first two of its four 60,000-kilowatt generating units were placed in commercial operation in February and March 1942 at a time when the products of industry and agriculture in the valley region were critical items in the war effort. These units increased the continuous energy capacity of the TVA system to approximately 830,000 kilowatts and the system peak to about 1,100,000 kilowatts. The further addition of Cherokee, Chatuge, and Nottely Dams

and the down-river units raised the continuous energy of the system to 960,000 kilowatts and the peak capability to about 1,300,000 kilowatts by the fall of 1942. The third Watts Bar Steam Plant unit began operation in February 1943 and the fourth in April 1945 - important factors in keeping ahead of system demands.

An introductory text, *Electricity and Electronics Fundamentals*, delineates key concepts in electricity using a simplified approach that enhances learning. Mathematical calculations are kept to the very minimum and concepts are demonstrated through application

examples and illustrations. The books span of topics includes vital information on direct current electronics, alternating current electricity and semiconductor devices as well as electronic circuits, digital electronics, computers and microprocessors, electronic communications, and electronic power control. Supplementary appendices provide a glossary and section on electrical safety along with an explanation of soldering techniques. Military Publications CRC Press N.A.C.A. models 74, 74-A, and 75 were tested in the N.A.C.A. tank to determine their hydrodynamic properties and in the N.A.C.A. 20-foot wind tunnel to determine their aerodynamic properties. The forms of these models were derived from that of a solid of revolution having

a low air drag, and the departures from the form of this low-drag body were the minimum considered to give satisfactory take-off performance. Model 74 has a rounded bottom with flared chines, a transverse step with a small fairing aft of it, and a pointed afterbody. Model 74-A has the same form except for the removal of the fairing aft of the step. Model 75 has a pointed step and a horizontal afterbody derived from the form of the N.A.C.A. model 35 series.

In just three years, Instructables.com

has become one of the hottest destinations for makers and DIY enthusiasts of all stripes. Known as "the world's biggest show & tell," makers from around the globe post how-to articles on a staggering variety of topics -- from collecting rainwater for lawn care to hacking toy robots to extracting squid ink. Now, with more than 10,000 articles, the Instructables staff and editors of MAKE: magazine -- with help from the Instructables community -- have put together a collection of solid, time- and user-tested technology and craft projects from the site. The Best of Instructables Volume 1 includes plenty of clear, full-color photographs, complete step-by-step instructions, as well as tips, tricks, and new build techniques you won't find anywhere else -- even material never

seen before on Instructables. Some of the more popular how-to articles include: The LED Throwie -- magnetized electronic graffiti that's become a phenomenon How to craft beautiful Japanese bento box lunches Innovative gaming hacks, such as how to add LED lights and custom-molded buttons to a video game controller New twists on personal items, such as the Keyboard Wallet, the Electric Umbrella, and stuffed animal headphones While the book focuses on technology, it also includes such projects as creating cool furniture from cheap components, ways of making your own toys, and killer sci-fi and fantasy costumes and props. Anything but a reference book, The Best of Instructables Volume I embodies the inspirational fun, creativity, and sense of

community that has attracted more than 200,000 registered members in just three years. Many of the articles include sidebars that show how other builders have realized or improved upon the same project. Making things is cool again: everyone wants to be a creator, not just a consumer. This is the spirit of the "new handy heyday", fostered by Instructables.com, MAKE: magazine, and others, and celebrated by this incredible book -- The Best of Instructables Volume 1.
