A Companion to African American Literature St. Martin's Press

Mary Ellen Pleasant and William Henry Ellis. What do these two have in common? They were both former slaves who became millionaires. Back then, Black entrepreneurs had to worry about slave catchers and lynch mobs. Today, "microaggressions" and "racial trauma" are enough to discourage young Blacks (according to liberals). Jeremiah G. Hamilton, another Black millionaire of the 19th century, was almost lynched in front of his wife and daughter when angry rioters appeared at his doorstep. While living in New York, Hamilton was making millions of dollars as a broker, doing business with White people, while married

to a White woman, DURING the Civil War. If there was ever a time where "systematic racism" was a thing, it certainly would've been directed toward this man. Yet, in 1875, he became the richest Black man in America with a fortune of over \$250 million. One often wonders what these great heroes would think of the current state of liberal media. Young Black students are taught to find emotional support from White "allies" while simultaneously demonizing their "whiteness." They're told to seek help for any "racial trauma" they may be feeling from enduring the lasting effects of "institutional racism." They're told that, no matter how successful they become, the cards are always stacked against them because of their skin-color. They're segregated into "safe-spaces" to cry on each other's shoulders. All while we are living as the richest group of Blacks who

have ever lived on this planet. Our ancestors would be ashamed of us. They would expect more of us. To say our current struggles rival theirs is ridiculous. Yet there were still many Blacks throughout history who managed to become successful in the teeth of Slavery and Jim Crow. What excuses could we possibly have today? Black Snowflakes provides a brand-new perspective for those Americans who still believe it is impossible for Blacks to be successful unless they get (to quote Colin Kaepernick) that "White man's stamp of approval." I begin with a counterargument to "the racism of low-expectations" or the way liberals have painted Blacks as helpless children who must be coddled through life. Then, I offer a peek into the heroic lives of the greatest Black entrepreneurs in American history who all lived during the height of Slavery and Jim

Crow. Next, I explore the currently dismal state of the Black community (Father Absence, Financial Illiteracy, and Educational Underachievement) and how Black males can lead the charge in reflecting the values of our historical Black heroes. In the Chapter entitled The Pursuit of Freedom, I offer basic financial knowledge to help young people to reach their goals in life. I present my argument for why underachievement is not only undesirable, but it is actually immoral. Lastly, I provide a biblical argument for individualism and the rejection of liberal groupthink and tribalism. It is my hope that this book serves to inspire Young Black males to change their hearts and minds to espouse the values that have made this nation the greatest in the world. I hope you enjoy *Black Snowflakes: How the Liberal Victimhood Narrative Ruins Black Males*. About the Author Spencer Shaw Page is an African American writer & blogger. He is the Founder & Senior Contributor of *The Siege*, a political blog covering a variety of topics in sports, politics, and entertainment. The University of Central Florida is his alma mater, where he received a bachelor's degree in Psychology. Through his writing, he hopes to inspire other young Blacks to take control of their own destinies and to espouse the values that have sustained this great nation.

Born to a wealthy family in West Africa around 1770, Omar Ibn Said was abducted and sold into slavery in the United States, where he came to the attention of a prominent North Carolina family after filling "the walls of his room with piteous petitions to be released, all written in the Arabic language," as one local newspaper reported. Ibn Said soon became a local celebrity, and in 1831 he was asked to write his life story, producing the only known surviving American slave narrative written in Arabic. In *A Muslim American Slave*, scholar and translator Ala Alryyes offers both a definitive translation and an authoritative edition of this singularly important work, lending new insights into the early history of Islam in America and exploring the multiple, shifting interpretations of Ibn Said's narrative by the nineteenth-century missionaries, ethnographers, and intellectuals who championed it. This edition presents the English translation on pages facing facsimile pages of Ibn Said's Arabic narrative, augmented by Alryyes's comprehensive introduction, contextual essays and historical commentary by leading literary critics and scholars of Islam and the African diaspora,

photographs, maps, and other writings by Omar Ibn Said. The result is an invaluable addition to our understanding of writings by enslaved Americans and a timely reminder that "Islam" and "America" are not mutually exclusive terms. This edition presents the English translation on pages facing facsimile pages of Ibn Said's Arabic narrative, augmented by Alryyes's comprehensive introduction and by photographs, maps, and other writings by Omar Ibn Said. A groundbreaking exposé of racism in the American taxation system from a law professor and expert on tax policy NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NPR AND FORTUNE • "Important reading for those who want to understand how inequality is built into the bedrock of American society, and what a more equitable future might look like."—Ibram X. Kendi, #1 New York Times bestselling author of *How to Be an Antiracist* Dorothy A. Brown became a tax lawyer to get away from race. As a young black girl growing up in the South Bronx, she'd seen how racism limited the lives of her family and neighbors. Her law school classes offered a refreshing contrast: Tax law was about numbers, and the only color that mattered was green. But when Brown sat down to prepare tax returns for her parents, she found something strange: James and Dottie Brown, a plumber and a nurse, seemed to be paying an unusually high percentage of their income in taxes. When Brown became a law professor, she set out to understand why. In *The Whiteness of Wealth*, Brown draws on decades of cross-disciplinary research to show that tax law isn't as color-blind as she'd once believed. She takes us into her adopted city of Atlanta, introducing us to families across the economic spectrum whose stories demonstrate how American tax law rewards the preferences and practices of white people while pushing black people further behind. From attending college to getting married to buying a home, black Americans find themselves at a financial

disadvantage compared to their white peers. The results are an ever-increasing wealth gap and more black families shut out of the American dream. Solving the problem will require a wholesale rethinking of America's tax code. But it will also require both black and white Americans to make different choices. This urgent, actionable book points the way forward.

The true story of one of the black passengers on the Titanic, for history readers and fans of *Hidden Figures* and *The Immortal Life of Henrietta Lacks*. Joseph Laroche was an anomaly among the passengers of the Titanic. He was exceptionally well-educated in a time when few black men had access to an education—and when even fewer were able to travel on a luxurious ship in first or second class. So, who was Joseph Laroche? And where was he going? This biography recounts the life of Joseph Laroche, his part in the history of Haiti, and how he, as a 24-year-old father of two (soon to be three) children, ended up on the last ship of that era of glamorous travel. He was a direct descendant of the father of Haitian independence and related to two Haitian presidents. As an engineer, Laroche contributed to the construction of the Parisian railway and had a promising future ahead of him. Ivorian-French writer Serge Bilé offers a fresh perspective on the tragedy that still fascinates millions and has inspired dozens of books and films. With thorough research in Haiti and France, Bilé unearths the story of the intriguing figure of Joseph Laroche. This is an account of multi-cultural black history and of the political and natural forces that converged on one man. Praise for *Black Man on the Titanic* "A revelation."—Mitchell Kaplan, founder of Books & Books "An absorbing and rewarding read."—Leonard Carpenter, author of *Lusitania Lost* and *Conan the Savage* [An Activity Book for African American Families](#) Independently Published The New York Times bestseller following a big-hearted, exhilarating novel exploring the profoundly intertwined lives of two Oakland families. "An immensely gifted writer and magical prose stylist." —Michiko Kakutani, New York Times New York Times bestselling, Pulitzer Prize-winning novelist Michael Chabon has transported readers to wonderful places: to New York City during the Golden Age of comic books (*The Amazing Adventures of Kavalier & Clay*); to an imaginary Jewish homeland in Sitka, Alaska (*The Yiddish*

Policemen's Union); to discover *The Mysteries of Pittsburgh*. Now he takes us to Telegraph Avenue in a big-hearted and exhilarating novel that explores the profoundly intertwined lives of two Oakland, California families, one black and one white. In *Telegraph Avenue*, Chabon lovingly creates a world grounded in pop culture—Kung Fu, '70s Blaxploitation films, vinyl LPs, jazz and soul music—and delivers a bravura epic of friendship, race, and secret histories. As the summer of 2004 draws to a close, Archy Stallings and Nat Jaffe are still hanging in there—longtime friends, bandmates, and coregents of Brokeland Records, a kingdom of used vinyl located in the borderlands of Berkeley and Oakland. Their wives, Gwen Shanks and Aviva Roth-Jaffe, are the Berkeley Birth Partners, a pair of semilegendary midwives who have welcomed more than a thousand newly minted citizens into the dented utopia at whose heart-half tavern, half temple-stands Brokeland. When ex-NFL quarterback Gibson Goode, the fifth-richest black man in America, announces plans to build his latest Dogpile megastore on a nearby stretch of Telegraph Avenue, Nat and Archy fear it means certain doom for their vulnerable little enterprise. Meanwhile, Aviva and Gwen also find themselves caught up in a battle for their professional existence, one that tests the limits of their friendship. Adding another layer of complication to the couples' already tangled lives is the surprise appearance of Titus Joyner, the teenage son Archy has never acknowledged and the love of 15-year-old Julius Jaffe's life.

African Americans in the Furniture City is unique not only in terms of its subject, but also for its framing of the African American struggle for survival, civil rights, and community inside a discussion of the larger white community. Examining the African-American community of Grand Rapids, Michigan between 1850 and 1954, Randal Maurice Jelks uncovers the ways in which its members faced urbanization, responded to structural racism, developed in terms of occupations, and shaped their communal identities. Focusing on the intersection of African Americans' nineteenth-century cultural values and the changing social and political conditions in the first half of the twentieth century, Jelks pays particularly close attention to the religious community's influence during their struggle toward a respectable social identity and fair treatment under the law. He explores how these competing values defined the community's politics as it struggled to expand its freedoms and change its status as a subjugated racial minority.

The African American population in the United States has always been seen as a single entity: a "Black America" with unified interests and needs. In his groundbreaking book, *Disintegration*, Pulitzer-Prize winning columnist Eugene Robinson argues that over decades of desegregation, affirmative action, and immigration, the concept of Black America has shattered. Instead of one black America, now there are four: • a Mainstream middle-class majority with a full ownership stake in American society; • a large, Abandoned minority with less hope of escaping poverty and dysfunction than at any time since Reconstruction's crushing end; • a small Transcendent elite with such enormous wealth, power, and influence that even white folks have to genuflect; • and two newly Emergent groups—individuals of mixed-race heritage and communities of recent black immigrants—that make us wonder what "black" is even supposed to mean.

Sarah Rector was once famously hailed as "the richest black girl in America." Set against the backdrop of American history, her tale encompasses the creation of

Indian Territory, the making of Oklahoma, and the establishment of black towns and oil-rich boomtowns. Rector acquired her fortune at the age of eleven. This is both her story and that of children just like her: one filled with ups and downs amid bizarre goings-on and crimes perpetrated by greedy and corrupt adults. From a trove of primary documents, including court and census records and interviews with family members, author Tonya Bolden painstakingly pieces together the events of Sarah's life and the lives of those around her. The book includes a glossary, a bibliography, and an index. Praise for *Searching for Sarah Rector* STARRED REVIEWS "This handsome volume with its many photographs is carefully sourced and has a helpful glossary, illustration credits and index. Bolden admirably tells a complex story while modeling outstanding research strategy, as her insightful author's note attests." --Kirkus Reviews, starred review "This book will be extremely useful to teachers and librarians seeking material to align with Common Core State Standards dealing with the craft of writing of informational text." -- School Library Journal, starred review "Bolden's remarks on tracking down Sarah's story will appeal to those who enjoy untangling historical mysteries." -- The Bulletin of the Center for Children's Books

"[A] vital investigation of Forsyth's history, and of the process by which racial injustice is perpetuated in America." —U.S. Congressman John Lewis Forsyth County, Georgia, at the turn of the twentieth century, was home to a large African American community that included ministers and teachers, farmers and field hands, tradesmen, servants, and children. But then in September of 1912, three young black laborers were accused of raping and murdering a white girl. One man was dragged from a jail cell and lynched on the town square, two teenagers were hung after a one-day trial, and soon bands of white "night riders" launched a coordinated campaign of arson and terror, driving all 1,098 black citizens out of the county. The charred ruins of homes and churches disappeared into the weeds, until the people and places of black Forsyth were forgotten. National Book Award finalist Patrick Phillips tells Forsyth's tragic story in vivid detail and traces its long history of racial violence all the way back to antebellum Georgia. Recalling his own childhood in the 1970s and '80s, Phillips sheds light on the communal crimes of his hometown and the violent means by which locals kept

Forsyth "all white" well into the 1990s. In precise, vivid prose, *Blood at the Root* delivers a "vital investigation of Forsyth's history, and of the process by which racial injustice is perpetuated in America" (Congressman John Lewis).

"When Damon Tweedy first enters the halls of Duke University Medical School on a full scholarship, he envisions a bright future where his segregated, working class background will become largely irrelevant. Instead, he finds that he has joined a new world where race is front and center. When one of his first professors mistakes him for a maintenance worker, it is a moment that crystallizes the challenges he will face throughout his early career. Making matters worse, in lecture after lecture the common refrain for numerous diseases resounds, "More common in blacks than whites." In riveting, honest prose, *Black Man in a White Coat* examines the complex ways in which both black doctors and patients must navigate the difficult and often contradictory terrain of race and medicine. As Tweedy transforms from student to practicing physician, he discovers how often race influences his encounters with patients. Through their stories, he illustrates the complex social, cultural, and economic factors at the root of most health problems in the black community. These elements take on greater meaning when Tweedy finds himself diagnosed with a chronic disease far more common among black people. In this powerful, moving, and compassionate book, Tweedy deftly explores the challenges confronting black doctors, and the disproportionate health burdens faced by black patients, ultimately seeking a way forward to better treatment and more compassionate care.- For readers of Atul Gawande, Sandeep Jauhar, Pauline W. Chen, and Henrietta Lacks"--

One of the most progressive movements for "Freedom, Justice and Equality" in African American history has been Islam. Transported into America among the very first slaves, it has survived for four centuries under the most difficult of circumstances. Yet, it has produced some of the most influential leaders among Black Americans including Elijah Muhammad, Malcolm X, Imam Warithu Deen Mohammed, Louis Farrakhan and many others. In *A Black Man's Journey in America: Glimpses of Islam, Conversations and Travels*, I have placed my family's history within the context of that Islamic heritage. Further, I have attempted to

unravel the method through which African American Muslims were so often forced to embrace as a means of survival.

In the middle decades of the nineteenth century Jeremiah G. Hamilton was a well-known figure on Wall Street. Cornelius Vanderbilt, America's first tycoon, came to respect, grudgingly, his one-time opponent. The day after Vanderbilt's death on January 4, 1877, an almost full-page obituary on the front of the *National Republican* acknowledged that, in the context of his Wall Street share transactions, "There was only one man who ever fought the Commodore to the end, and that was Jeremiah Hamilton." What Vanderbilt's obituary failed to mention, perhaps as contemporaries already knew it well, was that Hamilton was African American. Hamilton, although his origins were lowly, possibly slave, was reportedly the richest colored man in the United States, possessing a fortune of \$2 million, or in excess of two hundred and \$50 million in today's currency. In *Prince of Darkness*, a groundbreaking and vivid account, eminent historian Shane White reveals the larger than life story of a man who defied every convention of his time. He wheeled and dealt in the lily white business world, he married a white woman, he bought a mansion in rural New Jersey, he owned railroad stock on trains he was not legally allowed to ride, and generally set his white contemporaries teeth on edge when he wasn't just plain outsmarting them. An important contribution to American history, Hamilton's life offers a way into considering, from the unusual perspective of a black man, subjects that are usually seen as being quintessentially white, totally segregated from the African American past.

The grandson of slaves, born into poverty

in 1892 in the Deep South, A. G. Gaston died more than a century later with a fortune worth well over \$130 million and a business empire spanning communications, real estate, and insurance. Gaston was, by any measure, a heroic figure whose wealth and influence bore comparison to J. P. Morgan and Andrew Carnegie. Here, for the first time, is the story of the life of this extraordinary pioneer, told by his niece and grandniece, the award-winning television journalist Carol Jenkins and her daughter Elizabeth Gardner Hines. Born at a time when the bitter legacy of slavery and Reconstruction still poisoned the lives of black Americans, Gaston was determined to make a difference for himself and his people. His first job, after serving in the celebrated all-black regiment during World War I, bound him to the near-slavery of an Alabama coal mine—but even here Gaston saw not only hope but opportunity. He launched a business selling lunches to fellow miners, soon established a rudimentary bank—and from then on there was no stopping him. A kind of black Horatio Alger, Gaston let a single, powerful question be his guide: What do our people need now? His success flowed from an uncanny genius for knowing the answer. Combining rich family lore with a deep knowledge of American social and economic history, Carol Jenkins and Elizabeth Hines unfold Gaston's success story against the backdrop of a century of crushing racial hatred and bigotry. Gaston not only

survived the hardships of being black during the Depression, he flourished, and by the 1950s he was ruling a Birmingham-based business empire. When the movement for civil rights swept through the South in the late 1950s and early 1960s, Gaston provided critical financial support to many activists. At the time of his death in 1996, A. G. Gaston was one of the wealthiest black men in America, if not the wealthiest. But his legacy extended far beyond the monetary. He was a man who had proved it was possible to overcome staggering odds and make a place for himself as a leader, a captain of industry, and a far-sighted philanthropist. Writing with grace and power, Jenkins and Hines bring their distinguished ancestor fully to life in the pages of this book. *Black Titan* is the story of a man who created his own future—and in the process, blazed a future for all black businesspeople in America. This second edition provides both a history of black entrepreneurship in America throughout all periods of American history and a roadmap that explains the steps that prospective entrepreneurs must take to achieve success in business. This second edition of *The African American Entrepreneur* explores the lower economic status of black Americans in light of America's legacy of slavery, segregation, and rampant discrimination against black Americans. The book examines the legal, historical, sociological, economic, and

political factors that together help to explain the economic condition of black people in America, from their arrival in America to the present. In the process, it spotlights the many amazing breakthroughs made by black entrepreneurs even before the Civil War and Emancipation. Part One explores the history of African American entrepreneurs from slavery to the present; Part Two provides a primer and roadmap to success for aspiring entrepreneurs.

While no single volume can fully explain this issue, *Bridges and Boundaries: African Americans and American Jews* provides us with a means to challenge, and perhaps even to verify, our sense of the past - and in so doing to better understand the present. Fifteen critical essays by leading historians, scholars, and political and religious figures of this century provide historical overviews of the relationships between African Americans and American Jews. They also represent the diverse attitudes within the two groups, and reflect the multiple voices that have themselves shaped these attitudes. A visual essay that follows links texts and images of more than one hundred works of art and artifacts, first seen in an exhibit at The Jewish Museum, to explore the historical places at which the paths of African Americans and American Jews have crossed in meaningful ways during this century.
