New York, Chicago, and Los Angeles -- for all their differences, they are quintessentially American cities. They are also among the handful of cities on the earth that can be called "global". Janet L. Abu-Lughod's book is the first to compare them in an ambitious in-depth study that takes into account each city's unique history, following their development from their earliest days to their current status as players on the global stage.  
**New York, Chicago, Los Angeles** Cambridge University Press  
The first casebook on the law of governance, risk management,

and compliance. Author Geoffrey P. Miller, a highly respected professor of corporate and financial law, also brings real world experience to the book as a member of the board of directors and audit and risk committees of a significant banking institution. The book addresses issues of fundamental importance for any regulated organization (the \$13 billion settlement between JPMorgan Chase and its regulators is only one of many examples). This book can be a cornerstone for courses on compliance, corporate governance, or on the role of attorneys in managing risk in organizational clients. Features: Addresses issues of enormous and growing importance that are not covered by other law school casebooks. Presents numerous cutting edge issues in a rapidly growing body of law and practice. Covers a subject matter that is a major employment opportunity for law school

graduates. Professors who adopt this book participate in a new and burgeoning field of academic study and legal practice. Covers general issues as well as specific fields of compliance and risk management. Includes two sets of case studies—one on cases where compliance programs broke down (e.g., Enron, WorldComm, and JP Global), and one on cases where risk management broke down (e.g., UBS and the financial crisis, and JPMorgan Chase and the London whale). Features fewer cases and a higher ratio of author-written text and materials drawn from regulatory publications than in typical law school casebooks. Authored by a professor who is also an independent director of a financial institution.

This book examines the international growth and diversification of real estate advisory services in the United States, the United Kingdom, Germany and Japan since 1960. The book explains how successful firms develop competitive advantages in the global marketplace. An evaluation of forty prominent firms (ten from each country) provides a comparative reference for a detailed analysis of the growth and internationalization of four major real estate advisory service firms (one from each country). The firms have responded in many ways to changes in international real estate investment, and their fortunes have varied accordingly. The analysis provides factual evidence demonstrating growth strategies that enable a firm to become a successful real estate advisory service in today's global economy.

After experiencing a failed relationship and unresolved issues within herself an admired News Anchor realizes that she has experienced the sting of deceit deception and lies. Her friends are helping her navigate through the pain and hard truths only to discover that the healing process may not be as easy as they had hoped. It is God's desire that we live a life of freedom and purpose but sometimes we can be our own hindrance when we fail to deal with past hurts and ugly truths about ourselves. The Toxic Sting of Deceit Deception and Lies is a book that will show the damage that can be done when we project our own pain onto others but also the power of healing and forgiveness when we are willing to do the work.

No coach in National Football League history endured more playoff heartache than Marty Schottenheimer. Despite racking up two hundred regular-season victories (only five coaches in the entire ninety-year history of the NFL ever won more games), Marty never reached the Super Bowl during his coaching career. Martyball tells the story of a man who persevered through an avalanche of misfortune and playoff agony that would have brought most men to their knees. But Marty never lost sight of why he fell in love with coaching in the first place: he wanted to teach and mold men through the game of football. Based on more than one hundred hours of interviews with Marty, his players, assistants, family, and friends, this book will give readers a look into the mind of an exceptional coach, and explain why he never gave up or succumbed to self-pity despite a long streak of bad luck. Get the background on Schottenheimer's life, from his childhood in rural Pennsylvania to his playing and coaching careers in pro football, and learn why he kept believing in the game he loved—and how he found valuable lessons about life and football beyond each and every loss.

A brash single dad and a beautiful, ambitious cooking teacher follow the recipe for romance in this delectable treat from beloved author Sally Goldenbaum. The first time they met, Pete Webster had been the blind date from hell. Ellie Livingston hoped never to see him again. Now Pete's a student in the cooking class

she's designed just for men, and he looks good enough to eat! But Ellie's afraid that a relationship is off the table: Falling for a man with kids—no matter how adorable—would simply be biting off more than she can chew. Since his wife left him, Pete has learned that his gourmet cuisine—like his specialty, peanut butter and egg sandwiches—just won't cut it for two growing children. He's also learned not to trust beautiful women. But Ellie, with her sparkling passion and spicy personality, is for real, even if she doesn't see him the same way. Now it's up to Pete to go off the lesson plan and cook up a little trouble—in the kitchen and the bedroom. Includes a special message from the editor, as well as excerpts from these Loveswept titles: *Deep Autumn Heat*, *The Last Warrior*, and *Kevin's Story*.

In *The World's Newest Profession* Christopher McKenna offers a history of management consulting in the twentieth century. Although management consulting may not yet be a recognized profession, the leading consulting firms have been advising and reshaping the largest organizations in the world since the 1920s. This groundbreaking study details how the elite consulting firms, including McKinsey & Company and Booz Allen & Hamilton, expanded after US regulatory changes during the 1930s, how they changed giant corporations, nonprofits, and the state during the 1950s, and why consultants became so influential in the global economy after 1960. As they grew in number, consultants would introduce organizations to 'corporate culture' and 'decentralization' but they faced vilification for their role in the Enron crisis and for legitimating corporate blunders. Through detailed case studies based on unprecedented access to internal

files and personal interviews, *The World's Newest Profession* explores how management consultants came to be so influential within our culture and explains exactly what consultants really do in the global economy.

*The Martindale-Hubbell Law Directory* University of Texas Press  
 Dan Bavly takes a fresh look at how business is supervised and how that system can be improved. He begins by assessing the performance of the government regulator and suggests reasons for the failure to prevent many of the debacles of the recent past. New fiascoes often engender a spate of legislation, but the regulator remains the one who gets away—he is simply not accountable and does not shoulder the blame. Clearly, a new definition of regulator responsibility is required. Drawing on his years of company board and auditing experience, Bavly analyzes why the average director cannot do his job, and he shows how a complete, but feasible, overhaul of the way company boards function can help solve this problem. Bavly then goes on to explore, as an insider, the profession of accounting and to show why the CPA should be considered an endangered species. Along the way, Bavly examines many of the difficult issues of contemporary accounting: Where is the trend of mammoth accounting organizations leading? Is the addiction to mergers suicidal? How is the accounting profession coping with technology? What is the relationship between the outside CPA and the corporate internal audit division? For each specific flaw in the system, Bavly provides a practical remedy. The general message is the need for constant reassessment and, perhaps, a plea to cut all the agencies of corporate governance back to human proportions.

The lives of five individuals are shared after they are greeted in heaven by Wisdom, their ten-foot-tall guardian angel and a member of Gods hierarchy. Julie, a sixty-seven-year-old pizza shop owner from New Orleans; Abbie, a twenty-seven-year-old rock star from Santa Monica; Rashid, a twenty-five-year-old Taliban officer from Pakistan; Tiny, a forty-six-year-old partner in an accounting firm from Chicago; and Sophia, a fifty-four-year-old Jewish stand-up comic from South Miami, are all guided throughout the heavenly realm by Wisdom, experiencing a heaven they never dreamed existed. The five forge a bond while meeting in the Garden of Tranquility, crossing the Sea of Reconciliation, and reconnecting with family, friends, and pets on the other side. Their arrival at the heavenly mansion prepared for them is celebrated with a homecoming party featuring a feast and a concert by many famous artists. After the party, Wisdom transports them to Mount Transfiguration, the highest mountain in heaven, where they get their first glimpse of New Jerusalem, The City of God, a glittering and magnificent golden walled city which shines with the brilliance of millions of gems. From their vantage point, they marvel at the vista that spreads before them, captivated by its breathtaking beauty and vastness. Their journey, however, has only just begun.

Eastern Kentucky University (EKU) in Richmond, Kentucky, was originally established as a normal school in 1906 in the wake of a

landmark education law passed by the Kentucky General Assembly. One hundred years later, the school has evolved into a celebrated multipurpose regional university that is national in scope. The school was built on a campus that had housed Central University, a southern Presbyterian institution. In its early years, ECU grew slowly, buffeted by cyclical economic problems and the interruptions of two world wars. During that time, however, strong leadership from early presidents Ruric Nevel Roark, John Grant Crabbe, and Herman L. Donovan laid the groundwork for later expansions. President Robert. R. Martin oversaw the rapid growth of the institution in the 1960s. He managed an increase in enrollment and he had additional facilities built to house and educate the growing student population. A savvy administrator, he was at the forefront of vocational education and initiated programs in nursing and allied health and in law enforcement education. His successor, J.C. Powell, built on Martin's work and saw ECU mature as a regional university. He reorganized its colleges to better balance the needs of general and technical education students and kept educational programs going despite decreases in state funding. In addition, Powell's years were a magical time for ECU's sports programs, as the Colonels captured national football championships in 1979 and 1982 and finished second in 1980 and 1981. Today, ECU continues to offer students a quality education and strives to meet the diverse needs of its student body. Three Eastern campuses, as well as distance learning programs through the Kentucky Telelinking Network, offer more options to students than ever before as ECU prepares them for the challenges of a new century. In A History of Eastern Kentucky University, William E. Ellis recounts the university's

colorful history, from political quandaries surrounding presidential administrations and financial difficulties during the Great Depression to its maturing as a leading regional university. Interviews with alumni, faculty, staff, and political figures provide a personal side to the history of the school. Reflecting on the

social, economic, and cultural changes in the region during the last century, Ellis's examination of the growth and development of ECU is an essential resource for alumni and for those interested in the progression of public higher education in Kentucky and the region.
