This textbook has been designed to meet the needs of B.Sc. First Semester students of Chemistry as per the new UGC Model Curriculum - Choice Based Credit System (CBCS). With its traditional approach to the subject, this textbook lucidly explains principles of chemistry. Important topics such as atomic structure, chemical bonding, molecular structure, fundamentals of organic chemistry, stereochemistry and aliphatic hydrocarbons are aptly discussed to give an overview of inorganic and organic chemistry. Laboratory work has also been included

to help students achieve solid conceptual understanding and learn experimental procedures.

If you think you know the Brown, LeMay Bursten Chemistry text, think again. In response to market request, we have created the third Australian edition of the US bestseller, Chemistry: The Central Science. An extensive revision has taken this text to new heights! Triple checked for scientific accuracy and consistency, this edition is a more seamless and cohesive product, yet retains the clarity, innovative pedagogy, functional problem-solving and visuals of the previous version. All artwork and images are now consistent in quality across the entire text. And with a more traditional

and logical organisation of the Organic Chemistry content, this comprehensive text is the source of all the information and practice problems students are likely to need for conceptual understanding, development of problem solving skills, reference and test preparation.

Cluster chemistry is one of the recent, exciting areas of Inorganic Chemistry. The occurrence of molecular clusters, like fullerene C<sub>60</sub>, constitutes a fundamental feature midway between the chemistry of isolated chemical compounds and that of the elements. Main features of the Cluster Chemistry of both main group and transition metal elements are treated in this book. The author highlights aspects related to the synthesis, the structure, the special bonding and the reactivity of these species. The book is written as a textbook for senior undergraduate and postgraduate students. References in tables and illustrations permit the reader

to reach relevant original information. Professor Gonzalez-Moraga fills a demand for a publication appropriate for dissemination and specially for teaching this exciting subject. From the Contents: Current Concepts in Modern Chemistry - Transition Metal Cluster Chemistry - Main Group-Transition Metal Mixed Clusters - Cluster Compounds of the Main Group Elements - Synthetic Analogues of the Active Sites of Iron-Sulfur Proteins.  
**Textbook of Chemistry (For B.Sc. First Semester of HP University, Shimla)** Krishna Prakashan Media  
Advanced Inorganic Chemistry - Volume I is a concise book on basic concepts of inorganic chemistry. It acquaints the students with the basic principles of chemistry and further dwells into the chemistry of main group elements and

their compounds. It primarily caters to the undergraduate courses (Pass and Honours) offered in Indian universities.

Physical chemistry is a compulsory paper offered to all the students of pharmacy. There is a dearth of good books that exclusively cover the syllabi of physical chemistry offered to pharmacy courses. Pharmaceutical Physical Chemistry: Theory and Practices has been designed

considering their requirements laid down by AICTE and other premier institutes/universities. Apart from the theory 20 most common laboratory experiments have been included to make this book a unique offering to the students of pharmacy.

CHEMISTRY Oxford University Press

This book is primarily intended for the first year B.Tech students of all branches for their course on engineering chemistry. The main objective of this book is to provide a broad understanding of the chemical concepts, theories and principles of Engineering Chemistry in a clear and concise manner, so that even an average student can grasp the intricacies of the subject. It includes the general concepts of structure and bonding, phase rule, solid state, reaction

kinetics and catalysis, electrochemistry, chemical thermodynamics and free energy. Besides, the book introduces topics of applied chemistry like water technology, polymer chemistry and nanotechnology. Each theoretical concept is well supported by illustrative examples. The book also provides a large number of solved problems and illustrations to reinforce the theoretical understanding of concepts. KEY FEATURES (i) Each chapter of the book provides a clear and easy understanding of the definitions, theories and principles. (ii) A large number of well-labelled diagrams help to understand the concepts easily and clearly. (iii) Chapter-wise glossary and important mathematical relations are given for quick revision. (iv) Provides multiple

choice questions with answers, short questions and long questions for practice.a

This book is the text book of Inorganic and Organic Chemistry S.Y.B.Sc. PAPER-II [CH-302] Semester-III written for second year B.Sc. students of Savitribai Phule Pune University. The book is written according to the New Revised Choice Based Syllabus (CBCS) of Savitribai Phule Pune University to be implemented from June 2020. This book written in easy and lucid language to understand valence bond theory, molecular orbital theory, bond formation in molecules, co-ordination compounds, structure and reactivity benzene and their analogs, alkyl halides, aryl halides,

alcohols, phenols, ethers and their nomenclature, preparation and reactions. For the self study, exercise is added with short answer type questions, brief answer type questions, multiple choice questions (MCOs) and true-false type questions.

Complete Solution This book is designed

for the aspirants of KVPY (Stream-SA). As

there is no prescribed syllabus for KVPY,

hence this books is designed considering

the topics from where questions have

been asked in previous years. The book

is scientifically structured to prepare

aspirants of KVPY. Each chapter has

detailed topic wise Theory supported

with examples to understand the application of concepts, followed by Exercise-1 covering the different patterns of questions to give sufficient practice to the students. After this, Exercise-2 is given covering previous years questions to give exposure to type of questions asked. Complete solutions of exercise sheets are also provided in the book itself. These solutions are not just sketch rather have been written in such a manner that the students will be able to understand the application of

concept and can answer some other related questions too We firmly believe that the book in this form will definitely help a genuine, hardworking student. We have tried our best to keep errors out of this book. Comment and criticism from readers will be highly appreciated and incorporated in the subsequent edition. We wish to utilize the opportunity to place on record our special thanks to all team members of Content Development for their efforts to make this wonderful book.
