Joseph Nye coined the term "soft power" in the late 1980s. It is now used frequently—and often incorrectly—by political leaders, editorial writers, and academics around the world. So what is soft power? Soft power lies in the ability to attract and persuade. Whereas hard power—the ability to coerce—grows out of a country's military or economic might, soft power arises from the attractiveness of a country's culture, political ideals, and policies. Hard power remains crucial in a world of states trying to guard their independence and of non-state groups willing to turn to violence. It forms the core of the Bush administration's new national security strategy. But according to Nye, the neo-conservatives who advise the president are making a major miscalculation: They focus too heavily on using America's military power to force other nations to do our will, and they pay too little heed to our soft power. It is soft power that will help prevent terrorists from recruiting supporters from among the moderate majority. And it is soft power that will help us deal with critical global issues that require multilateral cooperation among states. That is why it is so essential that America better understands and applies our soft power. This book is our guide.

"Workin' Man Blues is possibly the most brilliantly astute and thorough examination ever written about country music in California and the impact it has had in our lives and on our culture. I'm extremely flattered to be even mentioned in such august company."—Dwight Yoakam, Singer, Songwriter

"With all the pathos of a Rose Maddox ballad and more edges than a Merle Haggard song, Haslam has spun together the stories of the artists who have made California part of country music and country music part of California."—James Gregory, author of *American Exodus: The Dust Bowl Migration and Okie Culture in California* "This book clears new ground in both the history of music and American ethnicity. As gorgeously detailed as any shirt worn by a Rhinestone Cowboy, there's no other book like it."—Kevin Starr, State Librarian of California

Why Understanding America's Religious Landscape Is the Most Important Challenge Facing Us Today The 1990s saw the U.S. Navy commission its first Muslim chaplain and open its first mosque. There are presently more than three hundred temples in Los Angeles, home to the greatest variety of Buddhists in the world. There are more American Muslims than there are American Episcopalians, Jews, or Presbyterians.

This important report, *Global Trends 2030-Alternative Worlds*, released in 2012 by the U.S. National Intelligence Council, describes megatrends and potential game changers for the next decades. Among the megatrends, it analyzes: - increased individual empowerment - the diffusion of power among states and the ascent of a networked multi-polar world - a world's population growing to 8.3 billion people, of which sixty percent will live in urbanized areas, and surging cross-border migration - expanding demand for food, water, and energy It furthermore describes potential game changers, including: - a global economy that could thrive or collapse - increased global insecurity due to regional instability in the Middle East and South Asia - new technologies that could solve the problems caused by the megatrends - the possibility, but by no means the certainty, that the U.S. with new partners will reinvent the international system Students of trends, forward-looking entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades will find this essential reading.

*Information on Immigration in 17 Countries* Harper Collins

In the Information Age, information is power. Who produces all that information, how does it move around, who uses it, to what ends, and under what constraints? Who gets that power? And what happens to the people who have no access to it? *Disconnected* begins with a striking vignette of two men: One is the thriving manager of a company selling personal computers and computer services. The other is just one among thousands of starving laborers. He has no way to find the information that might help him find a job, he cannot afford newspapers, rarely sees television, cannot understand the dialect of local radio broadcasts, will probably never touch a computer. These two men happen to live in Windhoek, Namibia, but this is not a story about Africa—it is a story that could be repeated almost anywhere in the world, even next door. With vivid anecdotes and data, William Wresch contrasts the opportunities of the information-rich with the limited prospects of the information-poor. Surveying the range of information—personal, public, organizational, commercial—that has become the currency of exchange in today's world, he shows how each represents a form of power. He analyzes the barriers that keep people information-poor: geography, tyranny, illiteracy, psychological blinders, "noise," crime. Technology alone, he demonstrates, is not the answer. Even the technology-rich do not always get access to important information—or recognize its value. Wresch spells out the grim consequences of information inequity for individuals and society. Yet he ends with reasons for optimism and stories of people who are working to pull down the impediments to the flow of information.

The COVID-19 pandemic struck the global economy after a decade that featured a broad-based slowdown in productivity growth. *Global Productivity: Trends, Drivers, and Policies* presents the first comprehensive analysis of the evolution and drivers of productivity growth, examines the effects of COVID-19 on productivity, and discusses a wide range of policies needed to rekindle productivity growth. The book also provides a far-reaching data set of multiple measures of productivity for up to 164 advanced economies and emerging market and developing economies, and it introduces a new sectoral database of productivity. The World Bank has created an extraordinary book on productivity, covering a large group of countries and using a wide variety of data sources. There is an emphasis on emerging and developing economies, whereas the prior literature has concentrated on developed economies. The book seeks to understand growth patterns and quantify the role of (among other things) the reallocation of factors, technological change, and the impact of natural disasters, including the COVID-19 pandemic. This book is must-reading for specialists in emerging economies but also provides deep insights for anyone interested in economic growth and productivity. Martin Neil Baily Senior Fellow, The Brookings Institution Former Chair, U.S. President's Council of Economic Advisers This is an important book at a critical time. As the book notes, global productivity growth had already been slowing prior to the COVID-19 pandemic and collapses with the pandemic. If we want an effective recovery, we have to understand what was driving these long-run trends. The book presents a novel global approach to examining the levels, growth rates, and drivers of productivity growth. For anyone wanting to understand or influence productivity growth, this is an essential read. Nicholas Bloom William D. Eberle Professor of Economics, Stanford University The COVID-19 pandemic hit a global economy that was already struggling with an adverse pre-existing condition—slow productivity growth. This extraordinarily valuable and timely book brings considerable new evidence that shows the broad-based, long-standing nature of the slowdown. It is comprehensive, with an exceptional focus on emerging market and developing economies. Importantly, it shows how severe disasters (of which COVID-19 is just the latest) typically harm productivity. There are no silver bullets, but the book suggests sensible strategies to improve growth prospects. John Fernald Schroders Chaired Professor of European Competitiveness and Reform and Professor of Economics, INSEAD

Ever since Nelson Mandela dramatically walked out of prison in 1990 after twenty-seven years behind bars, South Africa has been undergoing a radical transformation. In one of the most miraculous events of the century, the oppressive system of apartheid was dismantled. Repressive laws mandating separation of the races were thrown out. The country, which had been carved into a crazy quilt that reserved the most prosperous areas for whites and the most desolate and backward for blacks, was reunited. The dreaded and dangerous security force, which for years had systematically tortured, spied upon, and harassed people of color and their white supporters, was dismantled. But how could this country—one of spectacular beauty and promise—come to terms with its ugly past? How could its people, whom the oppressive white government had pitted against one another, live side by side as friends and neighbors? To begin the healing process, Nelson Mandela created the Truth and Reconciliation Commission, headed by the renowned cleric Archbishop Desmond Tutu. Established in 1995, the commission faced the awesome task of hearing the testimony of the victims of apartheid as well as the oppressors. Amnesty was granted to those who offered a full confession of any crimes associated with apartheid. Since the commission began its work, it has been the central player in a drama that has riveted the country. In this book, Antjie Krog, a South African journalist and poet who has covered the work of the commission, recounts the drama, the horrors, the wrenching personal stories of the victims and their families. Through the testimonies of victims of abuse and violence, from the appearance of Winnie Mandela to former South African president P. W. Botha's extraordinary courthouse press conference, this award-winning poet leads us on an amazing journey. Country of My Skull captures the complexity of the Truth Commission's work. The narrative is often traumatic, vivid, and provocative. Krog's powerful prose lures the reader actively and inventively through a mosaic of insights, impressions, and secret themes. This compelling tale is Antjie Krog's profound literary account of the mending of a country that was in colossal need of change.

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It

specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Following the acclaim for *The End of the Free Market*, Ian Bremmer is back with *Every Nation for Itself*, where he addresses the next big issue for the shifting world economy. 'Smart and snappy ... provides the most cogent prediction of how the politics of a post-America world will play out' *New Statesman* What happens when nobody's running the world? The United States is in financial crisis and can't hold onto the reins of the G-20. But China has no interest in international leadership, Europe is trying to save the euro, and emerging powers like Brazil and India are focused on domestic development. No government has the time, resources or political capital needed to take an international lead. The world power structure is about to have a vacancy...at the top. Welcome to the G-Zero world, in which no single country has the power to shape a truly global agenda. That means we are about to see 20 years of conflict over economics, finance and climate change. Bestselling author and strategist Ian Bremmer reveals how world powers are rapidly turning into gated communities, locked in competition. Who will prevail? 'A prodigy in the US global commentariat. Mr Bremmer's rehearsal of the consequences should make us all wise up' *Financial Times* 'An author who is always full of insights' *George Osborne* Ian Bremmer is the president of the world's leading global political risk research and consulting firm, Eurasia Group. He has written for the *Wall Street Journal*, *Washington Post*, *Newsweek*, and *Harvard Business Review*. His six books include *The J Curve* and *The End Of The Free Market*.
