For many women in their 20's and 30's, the greatest professional hurdle they'll need to overcome has little to do with their work life. The most focused, confident, and ambitious women can find themselves derailed by a tiny little thing: a new baby. While more workplaces are espousing family-friendly cultures, women are still subject to a "parenting penalty" and high-profile conflicts between parenting and the workplace are all over the news: from the controversy over companies covering the costs of egg-freezing to the debate over parental leave and childcare inspired by Marissa Mayer's policies at Yahoo. Here's the Plan offers an inventive and inspiring roadmap for working mothers steering their careers through the parenting years. Author Allyson Downey, founder of weeSpring, the "Yelp for baby products," and mother of two young children advises readers on all practical aspects of ladder-climbing while parenting, such as negotiating leave, flex time, and promotions. In the style of #GIRLBOSS or Nice Girls Don't Get the Corner Office, Here's the Plan is the definitive guide for ambitious mothers, written by one working mother to another.

The use of the cognitive interviewing method for survey question testing has proliferated and evolved over the past 30 years. In more recent years the method has been applied to the evaluation

of information letters and leaflets and to research consent forms. This book provides a practical handbook for implementing cognitive interviewing methods in the context of applied social policy research, based on the approach used by the authors at the NatCen Social Research (NatCen) where cognitive interviewing methods have been used for well over a decade. The book provides a justification for the importance of question testing and evaluation and discusses the position of cognitive interviewing in relation to other questionnaire development and evaluation techniques. Throughout the book, the focus is on providing practical and hands-on guidance around elements such as sampling and recruitment, designing probes, interviewing skills, data management and analysis and how to interpret the findings and use them to improve survey questions and other documents. The book also covers cognitive interviewing in different survey modes, in cross national, cross cultural and multilingual settings and discusses some other potential uses of the method.

This is a 2-book combo, which has the following titles: Book 1: Are you nervous about your job interview? Do you have the feeling that you are not prepared to face an invasive number of questions about your accomplishments and career choices? Well, have no fear, my friend. You are at the right address. This book can guide you along. Topics that will be discussed in this book include how to make a lasting first impression, asking specific questions about your motivation, how to dress, what to bring, how to react on the phone (if applicable), how to show your interviewer that you are listening and interacting, etc. Book 2: When it comes to job interviews, it would surprise you how many people don't have a clue what to do. They think if they just act like themselves (nothing wrong with that), all else will just happen. That's not how it works. The people who are most prepared usually stand the highest chance to make a good impression on the interviewer. Aside

from questions like “tell me about yourself” or “how would you describe yourself,” they will look for competent employees who know how to sell their skillset with confidence. They want to know about your weaknesses, and if those weaknesses will create any problems in their company. So, how will you do in your next job interview? Well, it’s up to you. But the right information, such as the details you can find in this guide, can certainly help.

Pressure to achieve work-life “balance” has recently become a significant part of the cultural fabric of working life in United States. A very few privileged employees tout their ability to find balance between their careers and the rest of their lives, but most employees face considerable organizational and economic constraints which hamper their ability to maintain a reasonable “balance” between paid work and other life aspects—and it is not only women who struggle. Increasingly men find it difficult to “do it all.” Women have long noted the near impossibility of balancing multiple roles, but it is only recently that men have been encouraged to see themselves beyond their breadwinner selves. Gender Equality and Work-Life Balance describes the work-life practices of men in the United States. The purpose is to increase gender equality at work for all employees. With a focus on leave policy inequalities, this book argues that men experience a phenomenon called “the glass handcuffs,” which prevents them from leaving work to participate fully in their families, homes, and other life events, highlighting the cultural, institutional, organizational, and occupational conditions which make gender equality in work-life policy usage difficult. This social justice book ultimately draws conclusions about how to minimize inequalities at work. Gender Equality and Work-Life Balance is unique as it laces together some theoretical concepts which have little previous association, including entrepreneurialism; leave policy, occupational identity, and the economic necessities of families. This book will therefore be of particular interest to researchers and academics alike in the disciplines of Gender studies, Human Resource Management, Employment Relations, Sociology and Cultural Studies.
