illustrated. 1830 edition. Excerpt: ...and all the inmates immediately left the premises except one old woman. In about fifteen minutes after the arrival of the engines, the firemen made their way up stairs, and the poor woman was found dead beside a basket partly filled with clothes, which it was supposed she had been packing up for removal; had she made any noise, or even broke a pane of glass, she would in all probability have been saved; as the fire never touched the floor in

which she was found, she must have died entirely from suffocation, which a little fresh air would have prevented. Had the slightest suspicion existed that any one was in the upper floors, they would have been entered by the windows or the roof; but as the fire took place in daylight, and none of the neighbours spoke of any one being in the house, it was thought unnecessary to damage the property, or risk the lives of the firemen, without some adequate cause. This, however, shows how little

dependence can be placed on information received from the inmates of the premises on fire. Some of the people who lived on the same floor with this poor woman, and who had seen her immediately before they left the house, never mentioned her. I do not suppose that this negligence arose from apathy, or any feeling of that sort; but the people were in such a state of utter confusion, that they were unable to think of any thing. But to return: -- If any one get up stairs,

he should shut all the doors and Windows as close as possible, which greatly retards the progress of the flames, and, consequently, gives more time for any after exertions in extinguishing them. If the person who has examined the fire finds a risk of its gaining ground upon him, he should, if within reach of fire-engines, keep every thing close, and..

 The Construction Chart Book presents the most complete data available on all facets of the U.S. construction industry: economic, demographic, employment/income, education/training, and safety and health issues. The book presents this

information in a series of 50 topics, each with a description of the subject matter and corresponding charts and graphs. The contents of The Construction Chart Book are relevant to owners, contractors, unions, workers, and other organizations affiliated with the construction industry, such as health providers and workers compensation insurance companies, as well as researchers, economists, trainers, safety and health professionals, and industry observers.

*Strategies for a Foreman's Success* U.S. Navy Seabee Museum

The Guide to a Successful Career in Management! Strategies for a Foreman's Success is a training manual that prepares a young electrician for a management position in the electrical construction industry. I'll discuss the various types of distribution systems and you'll learn the principles used in their design as well as cost-saving methods to install them. I'll explain the impact labor efficiency has on

labor costs, the difference between productive and non-productive labor, and foreman tactics that will help you run a more efficient crew. You'll learn the theory behind automated machine controls, the operation of instrumentation systems, and the basics of PLC systems helping you to better understand, install, and troubleshoot them. Finally, you'll learn cost-saving tips leading to higher profits that will help you become a more successful foreman. *Toolbox Training for*

Heavy equipment operators, who drive the cranes, excavators, and other large machinery that power construction and engineering projects, are always in demand. Whether building skyscrapers, repairing aging infrastructure, or mining oil and gas fields, a career as a heavy equipment operator can be a rewarding and dependable occupation. Readers will find valuable information on the duties, skills, training, and future outlook of this exciting

construction career. Other topics explored include opportunities for women and minorities, the use of green technology, and insight into some of the most ambitious construction projects at work today.
