In comparison to such regions as the South, the far West, and New England, the Midwest and its culture have been neglected both by scholars and by the popular press. Historians as well as literary and art critics tend not to examine the Midwest in depth in their academic work. And in the popular imagination, the Midwest has never really ascended to the level of the proud, literary South; the cultured, democratic Northeast; or the hip, innovative West Coast. Finding a New Midwestern History revives and identifies anew the Midwest as a field of study by promoting a diversity of viewpoints and lending legitimacy to a more in-depth, rigorous scholarly assessment of a large region of the United States that has largely been overlooked by scholars. The essays discuss facets of midwestern life worth examining more deeply, including history, religion, geography, art, race, culture, and politics, and are written by well-known scholars in the field such as Michael Allen, Jon Butler, and Nicole Etcheson.

In *Racing Toward Zero*, the authors explore the issues inherent in developing sustainable transportation. They review the types of propulsion systems and vehicle options, discuss low-carbon fuels and alternative energy sources, and examine the role of regulation in curbing emissions. All technologies have an impact on the environment, from internal combustion engine vehicles to battery electric vehicles, fuel cell electric vehicles, and hybrids—there is no silver bullet. The battery electric vehicle may seem the obvious path to a sustainable, carbon-free transportation future, but it's not the only, nor necessarily the best, path forward. The vast majority of vehicles today use the internal combustion engine (ICE), and this is unlikely to change anytime soon. Improving the ICE and its fuels—entering a new ICE age—must be a main route on the road to zero emissions. How do we go green? The future requires a balanced approach to transportation. It's not a matter of choosing between combustion or electrification; it's combustion and electrification. As the authors say, "The future is eclectic." By harnessing the best qualities of both technologies, we will be in the best position to address our transportation future as quickly as possible. Speech of O. M. Dantzler ... Routledge

In October 1962, when the Soviet Union deployed nuclear missiles in Cuba, the most dangerous

confrontation of the Cold War ensued, bringing the world close to the brink of nuclear war. Over two tense weeks, U.S. president John F. Kennedy and Soviet premier Nikita Khrushchev managed to negotiate a peaceful resolution to what was nearly a global catastrophe. Drawing on the best recent scholarship and previously unexamined documents from the archives of the former Soviet Union, this introductory volume examines the motivations and calculations of the major participants in the conflict, sets the crisis in the context of the broader history of the global Cold War, and traces the effects of the crisis on subsequent international and regional geopolitical relations. Selections from twenty primary sources provide firsthand accounts of the frantic deliberations and realpolitik diplomacy between the U.S., the U.S.S.R., and Fidel Castro's Cuban regime; thirteen illustrations are also included. CONTENTS: Introduction: The Making of a global Crisis The Origins of the Cold War A New Front in the Cold War The Cold War in Latin America The Cuban Revolution and the Soviet Union U.S. and Regional Responses to the Cuban Revolution Operation Zapata: The Bay of Pigs Operation Anadyr: Soviet Missiles in Cuba Crisis Dénouement: The Missiles of November Evaluating the Leadership on All Sides of the Crisis Nuclear Fallout: Consequences of the Missile Crisis The Future of Cuban-Soviet Relations Latin American Responses to the Missile Crisis Conclusion: Lessons of the Cuban Missile Crisis Historiography of the Cuban Missile Crisis Documents Memorandum for McGeorge Bundy from Arthur Schlesinger, Jr., April 10, 1961 State Department White Paper, April 1961 From the Cable on the Conversation between Gromyko and Kennedy, October 18, 1962 Telegram from Soviet Foreign Minister Gromyko to the CC CPSU, October 20, 1962 President John F. "A brilliant account of the politics of shit. It will leave you speechless." Written in Paris after the heady days of student revolt in May 1968 and before the devastation of the AIDS epidemic, *History of Shit* is emblematic of a wild and adventurous strain of 1970s' theoretical writing that attempted to marry theory, politics, sexuality, pleasure, experimentation, and humor. Radically redefining dialectical thought and post-Marxist politics, it takes an important—and irreverent—position alongside the works of such postmodern thinkers as Foucault, Deleuze, Guattari, and Lyotard. Laporte's eccentric style and ironic sensibility combine in an inquiry that is provocative, humorous, and intellectually exhilarating. Debunking all humanist mythology about the grandeur of civilization, *History of Shit* suggests instead that the management of human waste is crucial to our identities as modern individuals—including the organization of the city, the rise of the nation-state, the

development of capitalism, and the mandate for clean and proper language. Far from rising above the muck, Laporte argues, we are thoroughly mired in it, particularly when we appear our most clean and hygienic. Laporte's style of writing is itself an attack on our desire for "clean language." Littered with lengthy quotations and obscure allusions, and adamantly refusing to follow a linear argument, *History of Shit* breaks the rules and challenges the conventions of "proper" academic discourse.

"As Americans enter the new century, their interest in the past has never been greater. In record numbers they visit museums and historic sites, attend commemorative ceremonies and festivals, watch historically based films, and reconstruct family genealogies. The question is, Why? What are Americans looking for when they engage with the past? And how is it different from what scholars call "history"? In this book, David Glassberg surveys the shifting boundaries between the personal, public, and professional uses of the past and explores their place in the broader cultural landscape. Each chapter investigates a specific encounter between Americans and their history: the building of a pacifist war memorial in a rural Massachusetts town; the politics behind the creation of a new historical festival in San Francisco; the letters Ken Burns received in response to his film series on the Civil War; the differing perceptions among black and white residents as to what makes an urban neighborhood historic; and the efforts to identify certain places in California as worthy of commemoration. Along the way, Glassberg reflects not only on how Americans understand and use the past, but on the role of professional historians in that enterprise. Combining the latest research on American memory with insights gained from Glassberg's more than twenty years of personal experience in a variety of public history projects, *Sense of History* offers stimulating reading for all who care about the future of history in America."--

This fascinating book demonstrates the diversity of Connecticut's women's feminist activities in pre- and post-suffrage eras and refutes the notion that feminist activism died out with the passage of the Nineteenth Amendment.
