BROCK ELAINE

The Real State of America Atlas McGraw-Hill Humanities, Social Sciences & World Languages
 This book elucidates how cyberGIS (that is, new-generation geographic information science and systems (GIS) based on advanced computing and cyberinfrastructure) transforms computation- and data-intensive geospatial discovery and innovation. It comprehensively addresses opportunities and challenges, roadmaps for research and development, and major progress, trends, and impacts of cyberGIS in the era of big data. The book serves as an authoritative source of information to fill the void of introducing this exciting and growing field. By providing a set of representative applications and science drivers of cyberGIS, this book demonstrates how cyberGIS has been advanced to enable cutting-edge scientific research and innovative geospatial application development. Such cyberGIS advances are contextualized as diverse but interrelated science and technology frontiers. The book also emphasizes several important social dimensions of cyberGIS such as for empowering deliberative civic engagement and enabling collaborative problem solving through structured participation. In sum, this book will be a great resource to students, academics, and geospatial professionals for leaning cutting-edge cyberGIS, geospatial data science, high-performance computing, and related applications and sciences.

The Sociological Imagination W. W. Norton
 Drawing from a wide selection of classic and contemporary works, this best-selling reader includes 56 readings that represent a plurality of voices and views within sociology.

The Routledge Handbook of Landscape Ecology Sage Publications, Incorporated

India's Power Elite is a study of the nature of power and elitism in postcolonial India. Its point of departure is the political transition under way in twenty-first-century India, with the marginalization of the Congress Party and the staging of a cultural revolution symbolized by the rise of Hindu majoritarianism. Baru deconstructs the morphology of the Indian power elite-comprising remnants of a feudal gentry, kulaks, a metropolitan business class, the civil services and a cultural elite of opinion-makers. He also examines the role of caste, class and culture in the emergence of a 'New India'. Aimed at the socially engaged reader, this book will interest both students as well as those who wield power.

You May Ask Yourself Rowman & Littlefield

Regarded as one of the most influential management books of all time, this fourth edition of Leadership and Organizational Culture

transforms the abstract concept of culture into a tool that can be used to better shape the dynamics of organization and change. This updated edition focuses on today's business realities. Edgar Schein draws on a wide range of contemporary research to redefine culture and demonstrate the crucial role leaders play in successfully applying the principles of culture to achieve their organizational goals.

Basic Methods of Policy Analysis and Planning -- Pearson eText Corwin Press

Landscape and Agency explores how landscape, as an idea, a visual medium and a design practice, is organized, appropriated and framed in the transformation of places, from the local to the global. It highlights how the development of the idea of agency in landscape theory and practice can fundamentally change our engagement with future landscapes. Including a wide range of international contributions, each illustrated chapter investigates the many ways in which the relationship between the ideas and practices of landscape, and social and subjective formations and material processes, are invested with agency. They critically examine the role of landscape in processes of contemporary urban development, environmental debate and political agendas and explore how these relations can be analysed and rethought through a dialogue between theory and practice.

A Companion to Byzantine Italy W. W. Norton

A contemporary follow-up to the groundbreaking *Power of Maps*, this book takes a fresh look at what maps do, whose interests they serve, and how they can be used in surprising, creative, and radical ways. Denis Wood describes how cartography facilitated the rise of the modern state and how maps continue to embody and project the interests of their creators. He demystifies the hidden assumptions of mapmaking and explores the promises and limitations of diverse counter-mapping practices today. Thought-provoking illustrations include U.S. Geological Survey maps; electoral and transportation maps; and numerous examples of critical cartography, participatory GIS, and map art.

Sociology United Nations

The Eighth edition of David Newman's *Sociology: Exploring the Architecture of Everyday Life* once again invites students into the world of sociological thought. Sociology encourages students to think less about the next test and more about how the subject applies to their everyday lives. In addition to updated coverage and fresh examples, this edition features revamped Micro-Macro Connections that have been even further honed to help students understand the link between individual lives and the structure of society.

School, Family, and Community Partnerships Guilford Press

Updated in its 3rd edition, *Basic Methods of Policy Analysis and Planning* presents quickly applied methods for analyzing and resolving planning and policy issues at state, regional, and urban

levels. Divided into two parts, *Methods* which presents quick methods in nine chapters and is organized around the steps in the policy analysis process, and *Cases* which presents seven policy cases, ranging in degree of complexity, the text provides readers with the resources they need for effective policy planning and analysis. Quantitative and qualitative methods are systematically combined to address policy dilemmas and urban planning problems. Readers and analysts utilizing this text gain comprehensive skills and background needed to impact public policy.

Mapping the Social Landscape Routledge

In this completely revised edition, Bill Coplin continues to prepare the next generation of leaders to bring their hearts and minds to solving the many problems that we face in the twenty-first century. The book teaches students the essential components for public policy analysis; how to get information from published sources and individuals; how to survey stakeholders; formulate public policy; examine costs and benefits of a policy; develop political strategies; write a briefing paper; among other skills.

India's Power Elite Routledge

With a combination of up-to-the minute examples, cutting-edge research, and the latest available data, *Essentials of Sociology* gets students thinking sociologically about what they're seeing in the news and on their screens. Highlighting the macro social forces at work in our everyday lives, the authors move students beyond their individual experiences and cultivate their sociological imaginations. Innovative pedagogy promotes active reading and helps students master core sociological concepts. This strong in-text pedagogical program is now supported by InQuizitive, Norton's new formative, adaptive learning tool.

Student Atlas Pearson

The untextbook that teaches students to think like sociologists. *CyberGIS for Geospatial Discovery and Innovation* Viking
 Drawing from a wide selection of classic and contemporary works, the 60 selections in this best-selling reader represent a plurality of voices and views within sociology. In addition to classic works by authors such as Karl Marx, Max Weber, C. Wright Mills, David Rosenhan, Kingsley Davis and Wilbert Moore, this anthology presents a wide range of contemporary scholarship, some of which provides new treatments of traditional concepts. By integrating issues of diversity throughout the book, Ferguson helps students see the inter-relationships of race, social class, and gender, and the ways in which they have shaped the experiences of all people in society.

Social Science Research Currency

Social movements are a key feature of the political and social landscape of Latin America. Ronaldo Munck explores their full range, emanating from different sections of Latin American society and motivated by many different concerns, including

worker organizations, peasant and land reform movements, Indigenous groups, women's movements, and environmental groups. Although the mosaic of interlocking and connected issues and rights presents a complex map of social concerns and potentially a fragmented political force, these movements are likely to be at the centre of any future progressive politics in Latin America. As a result, they require careful understanding and a more nuanced theoretical approach. Drawing on insights from Latin American approaches to social movement theory, the book offers a distinctive contribution to social movement literature. The text incorporates detailed case studies and a methodological appendix for students wishing to develop their own research agendas in the field.

Mapping America's National Parks Routledge

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Landscape and Agency Univ of California Press

Are all film stars linked to Kevin Bacon? Why do the stock markets

rise and fall sharply on the strength of a vague rumour? How does gossip spread so quickly? Are we all related through six degrees of separation? There is a growing awareness of the complex networks that pervade modern society. We see them in the rapid growth of the internet, the ease of global communication, the swift spread of news and information, and in the way epidemics and financial crises develop with startling speed and intensity. This introductory book on the new science of networks takes an interdisciplinary approach, using economics, sociology, computing, information science and applied mathematics to address fundamental questions about the links that connect us, and the ways that our decisions can have consequences for others.

Rethinking the Power of Maps Cambridge University Press
 From Francis Alÿs and Ursula Biemann to Vivan Sundaram, Allora & Calzadilla, and the Center for Urban Pedagogy, some of the most compelling artists today are engaging with the politics of land use, including the growth of the global economy, climate change, sustainability, Occupy movements, and the privatization of public space. Their work pivots around a set of evolving questions: In what ways is land, formed over the course of geological time, also contemporary and formed by the conditions of the present? How might art contribute to the expansion of spatial and environmental justice? Editors Emily Eliza Scott and Kirsten Swenson bring together a range of international voices and artworks to illuminate this critical mass of practices. One of the first comprehensive treatments of land use in contemporary art, *Critical Landscapes* skillfully surveys the stakes and concerns of recent land-based practices, outlining the art historical contexts, methodological strategies, and geopolitical phenomena. This cross-disciplinary collection is destined to be an essential reference not only within the fields of art and art history, but also across those of cultural geography, architecture and urban planning, environmental history, and landscape studies.

Essentials of Sociology BRILL

Bringing together a diverse chorus of voices and experiences in

the pursuit of collective bodily, emotional, and spiritual liberation, *Practicing Yoga as Resistance* examines yoga as it is experienced across the Western cultural landscape through an intersectional, feminist lens. Naming the systems of oppression that permeate our lived experiences, this collection and its contributors shine a light on the ways yoga practice is intertwined with these systems while offering insight into how people challenge and creatively subvert, mitigate, and reframe them through their efforts. From the disciplines of yoga studies, embodiment studies, women's and gender studies, performance studies, educational studies, social sciences, and social justice, the self-identified women, queer, BIPOC, and White allies represented in this book present an interdisciplinary tapestry of scholarship that serves to add depth to a growing assemblage of yoga literature for the 21st century.

Spatial Complexity, Informatics, and Wildlife Conservation Routledge

As ecology becomes the new engineering, the projection of landscape as infrastructure—the contemporary alignment of the disciplines of landscape architecture, civil engineering, and urban planning—has become pressing. Predominant challenges facing urban regions and territories today—including shifting climates, material flows, and population mobilities, are addressed and strategized here. Responding to the under-performance of master planning and over-exertion of technological systems at the end of twentieth century, this book argues for the strategic design of "infrastructural ecologies," describing a synthetic landscape of living, biophysical systems that operate as urban infrastructures to shape and direct the future of urban economies and cultures into the 21st century. Pierre Bélanger is Associate Professor of Landscape Architecture and Co-Director of the Master in Design Studies Program at Harvard University's Graduate School of Design. As part of the Department of Landscape Architecture and the Advanced Studies Program, Bélanger teaches and coordinates graduate courses on the convergence of ecology, infrastructure and urbanism in the interrelated fields of design, planning and engineering. Dr. Bélanger is author of the 35th edition of the Pamphlet Architecture Series from Princeton Architectural Press, *GOING LIVE: from States to Systems* (pa35.net), co-editor with Jennifer Sigler of the 39th issue of *Harvard Design Magazine*, *Wet Matter*, and co-author of the forthcoming volume *ECOLOGIES OF POWER: Mapping Military Geographies & Logistical Landscapes of the U.S. Department of Defense*. As a landscape architect and urbanist, he is the recipient of the 2008 Canada Prix de Rome in Architecture and the Curator for the Canada Pavilion at Canadian Exhibition, "EXTRACTION," at the 2016 Venice Architecture Biennale (extraction.ca).
