Through empowered movement that centers the lives, stories, and dreams of marginalized women, Ananya Dance Theatre has revealed how the practice of and commitment to artistic excellence can catalyze social justice. With each performance, this professional dance company of Black, Brown, and Indigenous gender non-conforming women and femmes of color challenges heteronormative patriarchies, white supremacist paradigms, and predatory global capitalism. Their creative artistic processes and vital interventions have transformed the spaces of contemporary concert dance into sites of empowerment, resistance, and knowledge production. Drawing from more than fifteen years of collaborative dance-making and sustained dialogues based on deep alliances across communities of color, *Dancing*

Transnational Feminisms offers a multigenre exploration of how dance can be intersectionally reimagined as practice, methodology, and metaphor for feminist solidarity. Blending essays with stories, interviews, and poems, this collection explores timely questions surrounding race and performance, gender and sexuality, art and politics, global and local inequities, and the responsibilities of artists toward their communities.

In this era of globalization's ruthless deracination, place attachments have become increasingly salient in collective mobilizations across the spectrum of politics. Like place-based activists in other resource-rich yet impoverished regions across the globe, Appalachians are contesting economic injustice, environmental degradation, and the anti-democratic power of elites. This collection of seventeen original essays by scholars and activists from a variety of backgrounds explores this wide range of oppositional politics, querying its successes, limitations, and impacts. The editors' critical introduction and conclusion integrate theories of place and space with analyses of organizations

and events discussed by contributors. *Transforming Places* illuminates widely relevant lessons about building coalitions and movements with sufficient strength to challenge corporate-driven globalization. "This volume introduces the diverse voices that comprise Guston's linguistic tapestry. Guston never stopped talking for too long. There may have been periods of silence precipitated by existential moments of doubt, but such lapses seem anomalous when measured against the voluminous transcriptions gleaned and edited by Clark Coolidge. Coolidge has done an admirable job arranging and presenting the book's contents, entirely relevant to anyone curious about Guston, and by extension, American Art of the post-World War II period."—Douglas Dreishpoon, chief curator at Knox-Albright Gallery

"This is a very important book."--Martin Wolf, *Financial Times* A provocative look at how today's trade conflicts are caused by governments promoting the interests of elites at the expense of workers Longlisted for the 2020 *Financial Times & McKinsey Business Book of the Year Award* "Worth reading for [the authors'] insights into the history of trade and finance."--George Melloan, *Wall Street Journal* Trade disputes are usually understood as conflicts between countries with competing national interests, but as Matthew C. Klein and Michael Pettis show, they are often the unexpected result of domestic political choices to serve the interests of the rich at the expense of workers and ordinary retirees. Klein and Pettis trace the origins of today's trade wars to decisions made by politicians and business leaders in China, Europe, and the United States over the past thirty years. Across the world, the rich have prospered while workers can no longer afford to buy what they produce, have lost their jobs, or have been forced into higher levels of debt. In this thought-provoking challenge to mainstream views, the authors provide a cohesive narrative that shows how the class wars of rising inequality are a threat to the global economy and international peace--and what we can do about it.

Disease and Democracy is the first comparative analysis of how Western democratic nations have coped with AIDS. Peter Baldwin's exploration of divergent approaches to the epidemic in the United States and several European nations is a springboard for a wide-ranging and sophisticated historical analysis of public health practices and policies. In addition to his comprehensive presentation of information on approaches to AIDS, Baldwin's authoritative book provides a new perspective on our most enduring political dilemma: how to reconcile individual liberty with the safety of the community. Baldwin finds that Western democratic nations have adopted much more varied approaches to AIDS than is commonly recognized. He situates the range of responses to AIDS within the span of past attempts to control contagious disease and discovers the crucial role that history has played in developing these various approaches. Baldwin finds that the various tactics adopted to fight AIDS have sprung largely from those adopted against the classic epidemic diseases of the nineteenth century—especially cholera—and that they reflect the long institutional memories embodied in public health institutions.

The first full-length study of the impact of the discovery of the Americas on Italian Renaissance art and culture, *Imagining the Americas in Medici Florence* demonstrates that the Medici grand dukes of Florence were not only great patrons of artists but also early conservators of American culture. In collecting New World objects such as featherwork, codices, turquoise, and live plants and animals, the Medici grand dukes undertook a “vicarious conquest” of the Americas. As a result of their efforts, Renaissance Florence boasted one of the largest collections of objects from the New World as well as representations of the Americas in a variety of media. Through a close examination of archival sources, including inventories and Medici letters, Lia Markey uncovers the provenance, history, and meaning of goods from and images of the Americas in Medici collections, and she shows how these novelties were incorporated into the culture of the Florentine court. More than just a study of the discoveries

themselves, this volume is a vivid exploration of the New World as it existed in the minds of the Medici and their contemporaries. Scholars of Italian and American art history will especially welcome and benefit from Markey's insight.

Patrisia Gonzales addresses "Red Medicine" as a system of healing that includes birthing practices, dreaming, and purification rites to re-establish personal and social equilibrium. The book explores Indigenous medicine across North America, with a special emphasis on how Indigenous knowledge has endured and persisted among peoples with a legacy to Mexico. Gonzales combines her lived experience in Red Medicine as an herbalist and traditional birth attendant with in-depth research into oral traditions, storytelling, and the meanings of symbols to uncover how Indigenous knowledge endures over time. And she shows how this knowledge is now being reclaimed by Chicanos, Mexican Americans and Mexican Indigenous peoples. For Gonzales, a central guiding force in Red Medicine is the principal of regeneration as it is manifested in Spiderwoman. Dating to Pre-Columbian times, the Mesoamerican Weaver/Spiderwoman--the guardian of birth, medicine, and purification rites such as the Nahua sweat bath--exemplifies the interconnected process of rebalancing that transpires throughout life in mental, spiritual and physical manifestations. Gonzales also explains how dreaming is a form of diagnosing in traditional Indigenous medicine and how Indigenous concepts of the body provide insight into healing various kinds of trauma. Gonzales links pre-Columbian thought to contemporary

healing practices by examining ancient symbols and their relation to current curative knowledges among Indigenous peoples. Red Medicine suggests that Indigenous healing systems can usefully point contemporary people back to ancestral teachings and help them reconnect to the dynamics of the natural world.

Lost for centuries, the Kebra Nagast (The Glory of Kings) is a truly majestic unveiling of ancient secrets. These pages were excised by royal decree from the authorized 1611 King James version of the Bible. Originally recorded in the ancient Ethiopian language (Ge'ez) by anonymous scribes, The Red Sea Press, Inc. and Kingston Publishers now bring you a complete, accurate modern English translation of this long suppressed account. Here is the most startling and fascinating revelation of hidden truths; not only revealing the present location of the Ark of the Covenant, but also explaining fully many of the puzzling questions on Biblical topics which have remained unanswered up to today.

Our Bearings is a collection of narrative poetry that examines and celebrates Anishinaabe life in modern Minneapolis. Crafted around the four elements—earth, air, water, and fire—the poems are a beautifully layered discourse between landscapes, stories, and the people who inhabit them. Throughout the collection, McGlennen weaves the natural elements of Minnesota with rich historical commentary and current images of urban Native life. Reverence for wildlife and foliage is pierced by the sharp man-made skylines of Minneapolis while

McGlennen reckons with the heavy impact of industrial progress on the souls and everyday lives of individuals. While working with both traditional and contemporary form, McGlennen's unique use of space and rhythm creates poetry that is both captivating and accessible. Our Bearings does not attempt to speak for a population; rather it offers vibrant stories and moments that give voice to pieces of a large and complex tapestry of experiences. Through keen observation and a deep understanding of Native life in Minneapolis, McGlennen has created a timely collection that contributes beautifully to the important conversation about contemporary urban Native life in North America and globally.

With 83 additional outline and four-color maps, *World Civilizations: The Global Experience, Fifth Edition, Atlas Edition*, helps students with geography, one of the most difficult aspects of World history courses for many. The maps are accompanied by review questions that call on students to identify important geographical areas and think critically about the connection between geography and historical events. The maps are on perforated pages and are organized by chapter so that they can be assigned easily and collected. The primary goal of *World Civilizations* is to present a truly global history—since the development of agriculture and herding to the present. Using a unique periodization, this book divides the main periods of human history according to changes in the nature and extent of global contacts. This global world history text emphasizes the major stages in the interactions among different peoples and societies, while also assessing the development of major societies.

Presenting social and cultural as well as political and economic aspects, the book examines key civilizations in world history. *World Civilizations* balances this discussion of independent developments in the world's major civilizations with comparative analysis of the results of global contact.

"In the past two decades, scholarly assessment of the Bayeux Tapestry has begun to consider issues beyond its sources and analogues, dating, origin and purpose, and site of display." "This volume demonstrates the utility of more recent interpretive approaches to this famous artefact, especially with regard to newer concepts of gender, materiality, reception theory, cultural criticism, performativity, spatial narrative, New Historicism, and post-structuralism." "The essays frame vital issues for the future of Tapestry scholarship: they provide original perspectives, and engage with myriad critical concerns: the (New-) historical layering of meaning, representational systems of gender difference, visibility, memory and architecture, modern obsessions with author-like patronage, post-colonial notions of territory and saintly relics, and the function of historiography and media." "A bibliography of three centuries of critical writings completes the work." --Book Jacket.

The Long Shadow University Press of Florida

The Chinatown opera house provided Chinese immigrants with an essential source of entertainment during the pre "World War II era. But its stories of loyalty, obligation, passion, and duty also attracted diverse patrons into Chinese American communities Drawing

on a wealth of new Chinese- and English-language research, Nancy Yunhwa Rao tells the story of iconic theater companies and the networks and migrations that made Chinese opera a part of North American cultures. Rao unmask a backstage world of performers, performance, and repertoire and sets readers in the spellbound audiences beyond the footlights. But she also braids a captivating and complex history from elements outside the opera house walls: the impact of government immigration policy; how a theater influenced a Chinatown's sense of

cultural self; the dissemination of Chinese opera music via recording and print materials; and the role of Chinese American business in sustaining theatrical institutions. The result is a work that strips the veneer of exoticism from Chinese opera, placing it firmly within the bounds of American music and a profoundly American experience. *Red Medicine* Yale University Press
