This comprehensive guide offers a rich introduction to research methods, experimental design and data analysis techniques in developmental science,

emphasizing the importance of an understanding of this area of psychology for any student or researcher interested in examining development across the lifespan. The expert contributors enhance the reader's knowledge base, understanding of methods, and critical thinking skills in their area of study. They cover development from the prenatal period to adolescence and old age, and explore key topics including the history of developmental research,

ethics, animal models, physiological measures, eye-tracking, and computational and robotics models. They accessibly explore research measures and design in topics including gender identity development, the influence of neighborhoods, mother-infant attachment relationships, peer relationships in childhood, prosocial and moral development patterns, developmental psychopathology and social policy, and the

examination of memory across the lifespan. Each chapter ends with a summary of innovations in the field over the last ten years, giving students and interested researchers a thorough overview of the field and an idea of what more is to come.

Conducting Research in Developmental Psychology is essential reading for upper-level undergraduate or graduate students seeking to understand a new area of developmental science, developmental

psychology, and human development. It will also be of interest to junior researchers who would like to enhance their knowledge base in a particular area of developmental science, human development, education, biomedical science, or nursing.

"Pinney covers new ground and new research, and treats the entire period in a new way. [History of Wine in America] will be welcomed by scholars and by wine enthusiasts."—Dr. James Lapsley, University of California, Davis "A

worthy successor to Pinney's landmark History of Wine in America: From the Beginnings to Prohibition, and like that volume evidencing a wealth of knowledge, presented with grace and style. In addition to telling fascinating stories, both of these books are invaluable references. Anyone interested in the history of American wine should read them."—Paul Lukacs, author of American Vintage: The Rise of American Wine "I am confident the term definitive will apply to this

work for innumerable vintages to come. Wine lovers from New England to California now have one place to turn for the history of their favorite beverage, wherever in America its grapes are grown."—Charles L. Sullivan, author of *A Companion to California Wine and Zinfandel* "An essential reference book for anyone wishing to sound authoritative at the dinner table."—Bruce Cass, editor of *The Oxford Companion to the Wines of North America*

Zhao Di wishes the New Year would never end!
Zhao Di and her friends are excited to go out at night with their paper lanterns and celebrate Chinese New Year. Each holding a unique colorful lantern with a lit candle inside, they admire the breathtaking colors while doing their best to avoid the wind and the sneaky boys in the village. Every night, until the fifteenth day of New Year, Zhao Di and her friends take part in this fun tradition, experiencing the thrill of

nighttime in their village. And then--it's time to smash the lanterns! In this cheerful book first published in China, readers are invited along with Zhao Di and her friends as they experience all the joy and excitement of this folk Chinese custom. Details about the paper lantern tradition are also included in an author's note at the end of the book.

Kidnapped and sold into

slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe's Uncle Tom's Cabin, Northup's story was quickly taken up by

abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War. The Architectural Forum Albert Whitman & Company The Vikings called North America "Vinland," the land of wine. Giovanni de Verrazzano, the Italian explorer who first described the grapes of the New World, was sure that "they would yield excellent wines." And when the English settlers

found grapes growing so thickly that they covered the ground down to the very seashore, they concluded that "in all the world the like abundance is not to be found." Thus, from the very beginning the promise of America was, in part, the alluring promise of wine. How that promise was repeatedly baffled, how its realization was gradually begun, and how at last it has been triumphantly fulfilled is the story told in this book. It is a story that touches on nearly every section of the United States and

includes the whole range of American society from the founders to the latest immigrants. Germans in Pennsylvania, Swiss in Georgia, Minorcans in Florida, Italians in Arkansas, French in Kansas, Chinese in California—all contributed to the domestication of Bacchus in the New World. So too did innumerable individuals, institutions, and organizations. Prominent politicians, obscure farmers, eager amateurs, sober scientists: these and all the other kinds

and conditions of American men and women figure in the story. The history of wine in America is, in many ways, the history of American origins and of American enterprise in microcosm. While much of that history has been lost to sight, especially after Prohibition, the recovery of the record has been the goal of many investigators over the years, and the results are here brought together for the first time. In print in its entirety for the first time, *A History of Wine in America* is the

most comprehensive account of winemaking in the United States, from the Norse discovery of native grapes in 1001 A.D., through Prohibition, and up to the present expansion of winemaking in every state.

The development of technology in the emergency sanitation sector has not been emphasised sufficiently considering that the management of human excreta is a basic

requirement for every person. The lack of technology tailored to emergency situations complicates efforts to cater for sanitation needs in challenging humanitarian crisis. Concerns persists on the lack of faecal sludge management that considers the whole sanitation chain from containment until treatment. This study

focused on the development of a smart emergency toilet termed the eSOS (emergency sanitation operation system) smart toilet to address the limitation in technical options. This toilet is based on the eSOS concept that takes into account the entire sanitation chain. This study also addresses the limited time for planning in emergencies by

developing a decision support system (DSS) to help quick selection of optimal sanitation options. The aim was to enable users of the DSS to plan their emergency sanitation response within the shortest time possible. The study aims to contribute toward a better emergency sanitation response by application of technology advances.
