LIFE John Wiley & Sons Shortlisted in Scotland’s National Book Awards By the time she reached her fifties, Catherine had experienced period pain, childbirth, and early menopause, alongside love and laughter, a career in journalism, and raising two daughters. Like many of her peers, along the way she’d dieted, jogged, sweated, tanned, permed, and plucked—always attempting to conform to prevailing standards of “acceptable womanhood.” But when a medical crisis comes along, she can no longer pummel her body into submission and is forced to take stock. From growing up on a farm where veterinarians were more common than doctors, and where illness was “a nuisance,” she now faces the nuisance of a lifetime. *One Body* is the demystifying, relatable, often hilarious, and sometimes hair-raising story of how Catherine navigates her treatment and the emotions and reflections it provokes. And how she comes to drop the unattainable standards imposed on her body, and simply appreciate the skin she is

Your Guide to Women's Health Hachette Australia This is the first scholarly monograph marking the social justice turn in technical and professional communication (TPC). Social justice often draws attention to structural oppression, but to enact social justice as technical communicators, first, we must be able to trace daily practice to the oppressive structures it professionalizes, codifies, and normalizes. Technical Communication After the Social Justice Turn moves readers from conceptual explorations of oppression and justice to a theoretical framework that allows for the concepts to be applied and implemented in a variety of practical contexts. It historicizes the recent social justice turn in TPC scholarship, models a social justice approach to building theories and heuristics, and presents scenarios that illustrate how to develop sustainable practices of activism and social justice. Its commitment to coalition

building, inclusivity, and socially just practices of citation and activism will support scholars, teachers, and practitioners not only in understanding how the work of technical communication is often complicit in oppression but also in recognizing, revealing, rejecting, and replacing oppressive practices.

PERIOD founder and Harvard College student Nadya Okamoto offers a manifesto on menstruation and why we

can no longer silence those who bleed—and how to engage in youth activism. Throughout history, periods have been hidden from the public. They're taboo. They're embarrassing. They're gross. And due to a crumbling or nonexistent national sex ed program, they are misunderstood. Because of these stigmas, a status quo has been established to exclude people who menstruate from the seat at the decision-making table, creating discriminations like the tampon tax, medicines that favor male biology, and more. Period Power aims to explain what menstruation is, shed light on the stigmas and resulting biases, and create a strategy to end the silence and prompt conversation about periods.
