A special slipcased edition of Southern Light. This collection of striking images from Antarctica and the sub-Antarctic is the result of six journeys made by Australian photographer David Neilson in his quest to capture the exquisite light of these southernmost lands. Between 2002 and 2008 he made three voyages from Ushuaia in southern Argentina to the Antarctic and the sub-Antarctic. In 2002 he sailed on the yacht Tooluka to the remote sub-Antarctic island of South Georgia in the middle of the South Atlantic. This heavily glaciated island with numerous high alpine peaks has a remarkable profusion of wildlife along its coasts. In 2006, and again in 2008, he sailed on the yacht Australis to the Antarctic Peninsula. This best-known part of Antarctica contains some of the most spectacular scenery anywhere on the planet and provides many opportunities for photographing scenes

of exceptional drama and beauty.

Behind the Green Mask Nova Snova Can you really lose twenty pounds in a month? Will you really keep it off this time? With The Rice Diet Solution, you will! The Rice Diet Program has been helping dieters successfully lose weight since 1939. Now in book form, this world-renowned weight-loss method can help you change the way you eat forever. The Rice Diet Program in Durham, North Carolina, was one of the first medical facilities in America to use diet as the primary way to treat disease. On this high-complex-carb, low-fat, and low-sodium whole-foods diet, "Ricers" lose weight faster, more safely, and more effectively than people on any other diet. Men lose on average twenty-eight to thirty pounds and women on average nineteen to twenty pounds per month! The Rice Diet also detoxes your body, ridding it of excess water weight and toxins from processed foods and the environment. The program's results have been documented by extensive studies and confirmed by thousands of people who report amazing weight loss, as well as immediate improvement in such conditions as heart disease, diabetes, and hypertension. Here's how it works: The Rice Diet strictly limits salt and sodium-rich ingredients. Salt, like refined sugar, is an appetite stimulant, so when you reduce salt intake, you lose water weight and are less inclined to overeat. The Rice Diet also limits saturated fats and instead relies on carbohydrates (fruits, vegetables, grains, and beans) as the main source of nutrition. The fiber cleanses your system and satisfies you so you feel full quickly. The Rice Diet makes it easy to limit calories; when you're eating foods that truly satisfy your hunger, it's a challenge to eat 1,500 calories per day! To make it easy

to follow the program, The Rice Diet Solution includes hundreds of tasty, filling, easy-to-prepare recipes—some from the Rice House kitchen, others inspired by major chefs and adapted to Rice Diet standards.

Silicon Valley has been birthing renegade technology companies for the better part of a century, a storied lineage that traces from Stanford's Fred Terman to the Varian brothers' Klystron amplifier, from the hallowed garage of Bill Hewlett and Dave Packard to the bold "traitorous eight" who fled Shockley

Labs to form Fairchild Semiconductor. These companies, to be sure, broke new science and engineering ground-yet their most lasting legacy may well be their pioneering approach to business itself. They blazed a path that led to Intel, Apple, Oracle, Genentech, Gilead, Sun, Adobe, Cisco, Yahoo, eBay, Google, Salesforce, Facebook, Twitter, and many, many others. What causes a fledgling company to break through and prosper? At the highest level, the blueprint is always the same: An upstart team with outsized ambition somehow possesses an uncanny ability to surpass customer expectations, upend whole industries, and topple incumbents. But how do they do it? If only we could observe the behaviors of such a company from the inside. If only we were granted a first-person perspective at a present-day Silicon Valley startup-cum-blockbuster. What might we learn? This document-the story of Data Domain's rise from zero to one billion dollars in revenue-is your invitation to find out. For anyone curious about the process of new business formation, Tape Sucks offers a provocative, ripped-from-the-headlines case study. How does a new company bootstrap itself? What role does venture capital play? Why do customers and new recruits take a chance on a risky new player? Frank Sloatman, who lived and breathed the Data Domain story for six years, offers up his clear-eyed, "first-person shooter" version of events. You're with him on the inside as he and his team navigate the tricky waters of launching a high-technology business. You'll feel-deep in your gut-the looming threat of outside combatants and the array of challenges that make mere survival an accomplishment. You'll catch a glimpse of an adrenalin-fueled place where victories are visceral,

communication wide open, and esprit de corps palpable. The upshot is that the principles of the early entrepreneurs of Silicon Valley are alive and well. Their straightforward ideas include employee-ownership, tolerance for failure, unfettered meritocracy, faith in the power of technology breakthroughs, a preference for handshakes and trust over contracts and lawsuits, pragmatism, egalitarianism, and a belief in the primacy of growth and reinvestment over dividends and outbound profits. Tape Sucks is an honest, informed perspective on technology wave riding. It allows you to observe a high-growth business at close range and get an unvarnished picture of how things really work.

Violence is one of the most important challenges, not only for public health systems, but also for public mental health. Violence can have immediate as well as long-term and even transgenerational effects on the mental health of its victims. This book provides a comprehensive and wide-ranging assessment of the mental health legacy left by violence. It addresses the issues

as they affect states, communities and families, in other words at macro-, meso- and microlevels, beginning by describing the impact of violence on neurobiology and mental health, as well as the spectrum of syndromes and disorders associated with different forms of violence. The work moves on to tackle violence at the international—and intranational—level before zeroing in on the nature of violence in communities such as villages or city districts. It also examines the results of violence in the family. Each type of violence has distinct effects on mental health and in each chapter specific groups are explored in depth to demonstrate the heterogeneity of violence as well as the diversity of its outcomes in the realm of public mental health. Finally, the book addresses the notion of 'undoing violence' by detailing case studies of effective interventions and prevention occurring in countries, communities and families. These cases give us pause to reflect on the nature of resilience and dignity in the context of violence and mental health. All the chapters have been written by leading authors in the field and provide a state-of-the-art perspective. The authors, from different fields of expertise, facilitate interdisciplinary and international insights into the impact of violence on mental health.
