Eyewitnesses play an important role in criminal cases when they can identify culprits. Estimates suggest that tens of thousands of eyewitnesses make identifications in criminal investigations each year. Research on factors that affect the accuracy of eyewitness identification procedures has given us an increasingly clear picture of how identifications are made, and more importantly, an improved

understanding of the principled limits on vision and memory that can lead to failure of identification. Factors such as viewing conditions, duress, elevated emotions, and biases influence the visual perception experience. Perceptual experiences are stored by a system of memory that is highly malleable and continuously evolving, neither retaining nor divulging content in an informational vacuum. As such, the fidelity of our memories to actual events may be compromised by many factors at all stages of processing, from encoding to storage and retrieval. Unknown to the individual, memories are

forgotten, reconstructed, updated, and distorted. Complicating the process further, policies governing law enforcement procedures for conducting and recording identifications are not standard, and policies and practices to address the issue of misidentification vary widely. These limitations can produce mistaken identifications with significant consequences. What can we do to make certain that eyewitness identification convicts the guilty and exonerates the innocent? Identifying the Culprit makes the case that better data collection and research on eyewitness identification, new

law enforcement training protocols, standardized procedures for administering line-ups, and improvements in the handling of eyewitness identification in court can increase the chances that accurate identifications are made. This report explains the science that has emerged during the past 30 years on eyewitness identifications and identifies best practices in eyewitness procedures for the law enforcement community and in the presentation of eyewitness evidence in the courtroom. In order to continue the advancement of eyewitness identification research, the report recommends a focused research agenda. Identifying the Culprit will be an essential resource to assist the law enforcement and legal communities as they seek to understand the value and the limitations of eyewitness identification and make improvements to procedures.

The Criminal Investigation Process

Routledge

This report of the President's Commission on Law Enforcement and Administration of Justice -- established by President Lyndon Johnson on July 23, 1965 -- addresses the causes of crime and delinquency and recommends how to prevent crime and delinquency and improve law enforcement and the administration of criminal justice. In developing its findings and recommendations, the Commission held three national conferences, conducted five national surveys, held hundreds of meetings, and interviewed tens of thousands of individuals. Separate chapters of this report discuss crime in America, juvenile delinquency, the police, the courts, corrections, organized crime, narcotics and drug abuse, drunkenness offenses, gun control, science and technology, and research as an instrument for reform. Significant data were generated by the Commission's National Survey of Criminal Victims, the first of its kind conducted on such a scope. The survey found that not only do Americans experience far more crime than they report to the police, but they talk about crime and the reports of crime engender

such fear among citizens that the basic quality of life of many Americans has eroded. The core conclusion of the Commission, however, is that a significant reduction in crime can be achieved if the Commission's recommendations (some 200) are implemented. The recommendations call for a cooperative attack on crime by the Federal Government, the States, the counties, the cities, civic organizations, religious institutions, business groups, and individual citizens. They propose basic changes in the operations of police, schools, prosecutors, employment agencies, defenders, social workers, prisons, housing authorities, and probation and parole officers.

"It is both an honor and privilege to write the foreword for this book authored by Dr. Jeff Bernstein, a personal friend, and colleague who I have known for over 30 years. Over that time, I have served as a police chief with two police agencies and served as the president for both the Florida Police Chief Association and the International Association of Chiefs of Police. I have conducted numerous police promotional processes for the ranks of sergeant to police chief, and as a lawyer I have been used as a subject matter expert in promotional processes on police practices. Currently, I serve as a presidentially appointed U.S. Marshal in

the State of Florida. Dr. Jeff Bernstein, the coauthor of this book, and I have worked closely together in preparing police officers for promotional exams. He is without question the No. 1 authority on police promotional exam preparation in the country. As one of the nation's top experts in police supervision, Nathan Iannone asked Dr. Bernstein numerous times to revise his original book and update his book to be contemporary with the times. Prentice Hall also asked Dr. Bernstein to write the first official study guide for the book. The textbook you are about to read is a long-time best seller. It has been on more law enforcement promotional exam reading lists than any other book. It's considered by many to be the "Bible of Police Supervision." If you have this in your hands right now, you're probably studying for a promotional exam or taking a police supervision college class. This book is the authority in the field and addresses everything a police supervisor should know. Making a successful transition from officer to supervisor is reviewed in the book. Basic supervisory responsibilities such as training, coaching, and counseling are

discussed in the book. Dealing with citizen complaints, problem employees, and tactical deployment of field forces in critical situations are all covered in the book. After reviewing and studying these areas, you will have a much better understanding of how to handle these types of situations as a supervisor or manager. A new feature to this edition is that the key points in the book have already been identified by Dr. Bernstein for you. They will help you to do better on the exam you have to take as well as be a better supervisor or manager. Every day in every police department across the country supervisors deal with employees, citizens, peers, bosses, and unique situations they encounter on the street. You will find this book to be an excellent guide in regard to dealing with these individuals and situations. The kinds of things that every supervisor or manager should know are in this book! Finally, as you're reading this book, always keep your ultimate goal in mind. Whether it's to get the promotion you want or to be a better supervisor or manager, never lose sight of it. If you're ready to become a leader, study hard and stay focused. If you're tired

of doing what you're doing and want to move up the ladder, study hard and stay focused. If you study hard, stay focused, and internalize the teachings of this book, you will be that much closer to achieving your ultimate goal. I wish you all the best. William "Bill" Berger"--

Precalculus is adaptable and designed to fit the needs of a variety of precalculus courses. It is a comprehensive text that

covers more ground than a typical one- or two-semester college-level precalculus course. The content is organized by clearly-defined learning objectives, and includes worked examples that demonstrate problem-solving approaches in an accessible way. Coverage and Scope Precalculus contains twelve chapters, roughly divided into three groups. Chapters 1-4 discuss various types of functions, providing a foundation for the remainder of the course. Chapter 1: Functions Chapter 2: Linear Functions Chapter 3: Polynomial and Rational Functions Chapter 4: Exponential and Logarithmic Functions Chapters 5-8 focus on Trigonometry. In Precalculus, we approach trigonometry by first introducing angles and the unit circle, as opposed to

the right triangle approach more commonly used in College Algebra and Trigonometry courses. Chapter 5: Trigonometric Functions Chapter 6: Periodic Functions Chapter 7: Trigonometric Identities and Equations Chapter 8: Further Applications of Trigonometry Chapters 9-12 present some advanced Precalculus topics that build on topics introduced in chapters 1-8. Most Precalculus syllabi include some of the topics in these chapters, but few include all. Instructors can select material as needed from this group of chapters, since they are not cumulative. Chapter 9: Systems of Equations and Inequalities Chapter 10: Analytic Geometry Chapter 11: Sequences, Probability and Counting Theory Chapter 12: Introduction to Calculus
