The multimillion-copy New York Times bestselling author B.A. Paris returns to her heartland of gripping psychological suspense in The Therapist—a powerful tale of a house that holds a shocking secret. When Alice and Leo move into a newly renovated house in The Circle, a gated community of exclusive houses, it is everything they've dreamed of. But appearances can be deceptive... As Alice is getting to know her neighbours, she discovers a devastating secret about her new home, and begins to feel a strong connection with Nina, the therapist who lived there before. Alice becomes obsessed with trying to piece together what happened two years before. But no one wants to talk about it. Her neighbors are keeping secrets and things are not as perfect as they seem...

Bookstores are filled with guides that tell you where to eat, where to shop, and what to see in New York, but can you really rely on their advice? In the interest of appealing to everyone, these guides recommend everything, regardless of whether the food, the stores, or the activities and events are actually worth your time and money. Written by actual New Yorkers who are committed to discovering the best the five boroughs have to offer, "Inside New York" provides a unique portal into our thrilling (and occasionally daunting) city. Compiled by a team of fearless students, the guide introduces the neighborhoods and nightlife that make New York truly unforgettable. "Inside New York"'s young writers aggressively search for new

trends, the hippest nightclubs, and the best deals. They also visit perennial favorites, offering fresh perspectives on museums, monuments, and iconic landmarks. "Inside NY 2008" begins with an extensive city life section divided into such categories as public transportation, finding housing and jobs, eating out, locating the best hotels and hostels, classes and workshops, and LGBT events and resources. Then it breaks down the attractions, nightlife, restaurants, and shopping of seventeen Manhattan neighborhoods and four all-inclusive sections of the Bronx, Brooklyn, Queens, and Staten Island. Detailed color maps pinpoint each location.

In a twist of fate that none of them may ever understand, their lives will meet at the intersection points that crucially emerged when they did? Emily Daugette did not know it but her immaculately ordered life lacked a certain sparkle. She was intelligent and a devout Presbyterian, able to hold her own in intellectual discussions, whether her opinions were popular or not. Her flair for articulacy was particularly remarkable and a telltale sign of a promising writer. Without preamble, an older man would enter her life and gently upend her well thought-out existence. Lee Inzer, a physics professor, had stopped believing in love. After the death of his Jennie, he hopped from one woman to another in what could only be construed as casual relationships. He never gave the reference librarian much thought, let alone consider her a candidate for romance. Quite unexpectedly and without knowing when or how, he surrenders his heart once again. An unflinching supporter of reason, logic and all their noble kin, Tadge Bateman rejected anything that went against or beyond the laws that governed his practical universe. He would come at odds, however subtly and indirectly, with one of the supporters of parapsychology in the university where he teaches. When a terrible tragedy hits him where it hurt the most and hard, he is forced to rethink his beliefs.

Here's How to Do Accent Modification: A Manual for Speech-Language Pathologists is designed for speech-language pathologists (SLPs) working with

clients on accent modification in American English. A growing number of non-native speakers are interested in improving their communication skills and SLPs need preparation to work with this clientele. The text provides copious advice and many diverse techniques for teaching accent modification, from the level of basic sounds to the level of discourse. The text emphasizes realistic goal setting, so that clients focus on becoming effective communicators as opposed to sounding exactly like native speakers. The objective is a balance between clear and natural speech. Many SLPs favor intelligibility over naturalness because of their backgrounds working with speech delayed children, but with non-native speakers this often leads to unnatural speech and listeners focus on how something is said as opposed to what is said. Here's How to Do Accent Modification is uniquely geared toward the skills and backgrounds of SLPs working with clients in a one-on-one setting, but is also an excellent introductory text for any English as a Second Language (ESL) teacher. Robert McKinney brings this unique perspective as a speech-language pathologist with degrees in both Communication Disorders and Teaching English as a Second Language. Also included with the text are numerous practical activities and worksheets for working with clients. The ebook includes audio files and video clips to demonstrate working with non-native speakers.
