This is an insight into the idiosyncratic flourishes which make a house into a home. Photographer Bruce Weber takes the reader around the world, looking at how creative individuals' homes reflect their own particular personalities. Here are interiors and exteriors, panoramas and details: Siegfried and Roy's tiger-striped (and tiger-filled) Las Vegas suite; Georgia O'Keefe's ghost ranch in New Mexico; Chris Isaak's childhood home in suburban California; the Duchess of Devonshire's stately home in England; Andrew Wyeth's Maine lighthouse retreat; and Weber's own Montana ranch, among others.

She slides alongside you and tells you exactly what you need to hear, and by the time she's done, you've likely lost everything. Kat Roberts has been waiting ten years for the woman who upended her life to return. And now that she has, Kat is determined to be the one to expose her. After being in New Zealand for only five days, the English Chamberlain family vanished into thin air. Thirty year later, the remains of the eldest Chamberlain child are discovered in a remote part of the West Coast, showing he lived in the wilderness for four years. Where is the rest of the family? Up on the highway, the only evidence that the Chamberlains had ever been there

was two smeared tire tracks in the mud leading into an almost undamaged screen of bushes and trees. No other cars passed that way until after dawn. By that time the tracks had been washed away by the heavy rain. After being in New Zealand for only five days, the English Chamberlain family had vanished into thin air. The date was 4 April 1978. In 2010 the remains of the eldest Chamberlain child are discovered in a remote part of the West Coast, showing he lived for four years after the family disappeared. Found alongside him are his father's watch and what turns out to be a tally stick, a piece of scored wood marking items of debt. How had he survived and then died? Where is the rest of the family? And what is the meaning of the tally stick?

Twelve Years a Slave is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Because their lives have always been overshadowed by the residual effects of a horrific ordeal from the post-Civil War era, life for the Beckfords consistently remains somewhat tentative. But then, in relatively modern times, a specifically horrendous event occurs on their sprawling thousand acres which will cause cleavage within the family to persistently linger for years. The plot then thickens as the youngest Beckford siblings, Ned and Estelle, are confronted with an exacerbating family situation, which influences their decision to seek new beginnings. Chicago provides the backdrop for many circumstances that introduce both, especially Estelle, to numerous challenges. Through them all she courageously manages to retain resilience, tenaciously searching for the best that life can offer her. She instills the same optimism and resourcefulness in her children, Clare and Jeffrey. Clare encounters all obstacles with stubborn persistence to eventually become the main focus of this novel. Because of her marriage to Grady Mayfield, that family also becomes woven into the widening narrative that extends into the 21st century.

For the past few years, The Museum of Modern Art has been in the midst of the largest building project in its history. Designed by Yoshio Taniguchi, the new museum will open in midtown Manhattan in November 2004 - 2005 to coincide with MoMA's 75th anniversary. The 630,000-square-foot complex is nearly twice the size of the former facility, with dramatically expanded and redesigned spaces for exhibitions, public programming, educational outreach, and scholarly research. In his initial proposal, Taniguchi explained that his goal was "to create an ideal environment for art and people through the imaginative and disciplined use of light, materials, and space." His stated vision of "a museum that preserves and reinforces MoMA's unique character as the repository of an incomparable collection of modern and contemporary art, as a pioneer of museums of modern art with a unique historical inheritance, and as an urban institution in a midtown Manhattan location" has been resoundingly implemented. The New Museum of Modern Art offers an affordable, concise overview of the new building and its master architect by Glenn D. Lowry, Director of The Museum of

Modern Art.

Vividly explains how to organize learning in ways that allow people to do important things with what they know Offers guidelines for transforming education to prepare our youth for success in a rapidly changing world Filled with real-world, illustrative examples of the seven principles At the end of each chapter, Perkins includes "Wonders of Learning," a summary of the key ideas.
