Creations of the Mind Intellect Books

ARTIFACT COLLECTIVE is an attempt to create consciousness in a book. You begin. You are trapped in the dark under a great weight. You cannot move. His, her, their, our, your, and my consciousnesses take shape through speculation into your condition. Are you buried alive? Why? Are you alive? Are you accelerating through space in a you-shaped windowless vessel? What is your shape? Are you a flicker of light on the horizon of a black hole? Where is she? Has he lost all he loved? Speculation via thought becomes reality. Including historical, scientific, and found materials and images, ARTIFACT COLLECTIVE is a fictional

and non-fictional exploration of quantum theory, cosmology, possible futures, intellectual property, interwoven presents, the commons, the individual and collective mind, and the self. ARTIFACT COLLECTIVE is a corpus. It is an artifact. ARTIFACT COLLECTIVE is licensed under a Creative Commons Attribution Share Alike 4.0 License (CC BY-SA 4.0).

The authors explain the underlying software development principles behind theRUP, and guide readers in its application in their organization.

Be an Artifact Detective Routledge

Creations of the Mind presents sixteen original essays by theorists from a wide variety of disciplines who have a shared interest in the nature of artifacts and their implications for the human mind. All the papers are written specially for this volume,

and they cover a broad range of topics concerned with the metaphysics of artifacts, our concepts of artifacts and the categories that they represent, the emergence of an understanding of artifacts in infants' cognitive development, as well as the evolution of artifacts and the use of tools by non-human animals. This volume will be a fascinating resource for philosophers, cognitive scientists, and psychologists, and the starting point for future research in the study of artifacts and their role in human understanding, development, and behaviour. Contributors: John R. Searle, Richard E. Grandy, Crawford L. Elder, Amie L. Thomasson, Jerrold Levinson, Barbara C. Malt, Steven A. Sloman, Dan Sperber, Hilary Kornblith, Paul Bloom, Bradford Z. Mahon, Alfonso Caramazza, Jean M. Mandler, Deborah Kelemen, Susan Carey, Frank C. Keil, Marissa L. Greif, Rebekkah S. Kerner, James L. Gould, Marc D. Hauser, Laurie R. Santos, Steven Mithen

[Your New Feeling Is the Artifact of a Bygone Era](#) RosettaBooks

This book uses action research to conduct research activities in information technology and systems. It covers the methodological issues that arise when action research methods are conducted, provides examples of action research in practice, and summarizes the philosophical foundations of action research and its application as a methodology in Information Systems research and research programs.

Plymouth Rock has long stood as a symbol of the Pilgrims'

journey to and settlement in America. But how much of the story surrounding it is true? What did the Pilgrims' arrival mean to the Wampanoag people who were already living there? What were the long-lasting effects of the interactions between the two groups? How did a seaside rock come to be associated with the Pilgrims' landing, and was it really part of their story at all? Readers will find out the answers to these questions and discover more of what Plymouth Rock can tell us about American history.

Artifact Space MIT Press

Combining historical research with a lucid explication of archaeological methodology and reasoning, *Measuring Time with Artifacts* examines the origins and changing use of fundamental chronometric techniques and procedures and analyzes the different ways American archaeologists have studied changes in artifacts, sites, and peoples over time. In highlighting the underpinning ontology and epistemology of artifact-based chronometers-cultural transmission and how to measure it archaeologically-it covers issues such as why archaeologists used the cultural evolutionism of L. H. Morgan, E. B. Tylor, L. A. White, and others instead of biological evolutionism; why artifact classification played a critical role in the adoption of stratigraphic excavation; how the direct historical approach accomplished three analytical tasks at once; why cultural traits were important analytical units; why paleontological and archaeological methods sometimes mirror one another; how artifact classification influences chronometric method; and how graphs illustrate change in artifacts over time. An understanding of the history of artifact-based chronometers enables us to understand how we know what we think we know about the past, ensures against

modern misapplication of the methods, and sheds light on the reasoning behind archaeologists' actions during the first half of the twentieth century. R. Lee Lyman is a professor in and the chair of the Department of Anthropology at the University of Missouri-Columbia. Michael J. O'Brien is a professor of anthropology and an associate dean in the College of Arts and Science at the University of Missouri-Columbia. Lyman and O'Brien are the co-authors of *Archaeology as a Process: Processualism and Its Progeny and Cladistics and Archaeology*, among other books.

[Artifacts and Artificial Science](#) Oxford University Press, USA
Here is the new 11th Edition, all 610 pages! Included here is all the material from "Arrowheads: A Beginner's Guide," with much added information. How were Native American arrowheads made? How were they used? Where can they be found? What other kinds of Indian artifacts can I also find, besides just arrowheads? If you have ever asked any of these questions - if you truly want to learn about the artifacts themselves, beyond just their names - then this is a must-read for you! This fact-filled book is the result of the author's lifelong quest to learn as much as he could about Indian artifacts. Included is almost everything related to artifacts, in simple, easy-to-understand terms. Inside is a beginner's introduction to how arrowheads are made (with both ancient and modern tools) - including heat-treating, water-treating, pressure flaking, percussion flaking, notching, fluting, and much more. No matter whether you have hunted for arrowheads or not, you might have already found some type of artifact, and didn't know it. This book shows you what to be watching for, and where to look. Featured are detailed

illustrations of all sorts of items, from the simplest and crudest of stone tools, to some of the most artistically-made types of ceremonial and exotic pieces ever crafted in the ancient world. There is even information for the collector, on identifying some of the most common types of fake arrowheads, along with a short price guide. In addition, it describes how arrowheads were mounted and used on arrows, atlatl darts, knives, spears, blowgun darts, drills, axes, and many other items. Presented in-depth are several sequences illustrating how drastically an arrowhead's appearance can change with use and resharpening, over the course of its life. Plus, there are suggestions on cataloging and displaying your collection in creative ways, without damaging your artifacts. It even shows you how you can illustrate your own arrowheads. This primer makes an excellent introduction for any beginning Indian artifact enthusiast!

Measuring Time with Artifacts Austin Macauley

When a young female anthropologist is found dead in the Australian outback, the first thought is that it was a tragic accident. It isn't long before there are suspicions that foul play is involved and a murder investigation begins. It transpires that she was in possession of a mystery artifact on the evening before her death. What is this artifact and is it linked to her death? Was it a tragic accident or was she murdered?

Rituals of the Dead Penguin

People who write about history are a lot like detectives. They look for clues in primary sources to understand the past better. Primary sources are things such as photographs, diaries, and items made by people. *Be a Document Detective* teaches young readers how to ask questions and look for clues like a real

historian. Book jacket.

Advances in Patient Safety Springer Science & Business Media

Out in the darkness of space, something is targeting the Greatships. With their vast cargo holds and a crew that could fill a city, the Greatships are the lifeblood of human occupied space, transporting an unimaginable volume - and value - of goods from City, the greatest human orbital, all the way to Tradepoint at the other, to trade for xenoglas with an unknowable alien species. It has always been Marca Nbaro's dream to achieve the near-impossible: escape her upbringing and venture into space. All it took, to make her way onto the crew of the Greatship Athens was thousands of hours in simulators, dedication, and pawning or selling every scrap of her old life in order to forge a new one. But though she's made her way onboard with faked papers, leaving her old life - and scandals - behind isn't so easy. She may have just combined all the dangers of her former life, with all the perils of the new . . .

An Artifact of Interest University of Chicago Press

A museum researcher must solve a decades-old mystery before she becomes the killer's next victim in this riveting dual timeline thriller set in Papua and the Netherlands. Agats, Dutch New Guinea (Papua), 1961: While collecting Asmat artifacts for a New York museum, American anthropologist Nick Mayfield stumbles upon a smuggling ring organized by high-ranking members of the Dutch colonial government and the Catholic Church. Before he can alert the authorities, he vanishes in a mangrove swamp,

never to be seen again. Amsterdam, the Netherlands, 2018: While preparing for an exhibition of Asmat artifacts in a Dutch ethnographic museum, researcher Zelda Richardson finds Nick Mayfield's journal in a long-forgotten crate. Before Zelda can finish reading the journal, her housemate is brutally murdered and 'Give back what is not yours' is scrawled on their living room wall. Someone wants ancient history to stay that way--and believes murder is the surest way to keep the past buried. Can she solve a sixty-year-old mystery before decades of deceit, greed, and retribution cost Zelda her life? Awarded a B.R.A.G. Medallion by indieBRAG's readers in December 2018 One of Amy's Bookshelf Reviews' Top 20 Books of 2018 Winner of a Chill with a Book Readers' Award, June 2018 A Women Writers, Women's Books magazine's Recommended Reads for March 2018 New Apple's 2018 Summer Book Awards, Official Selection Mystery/Thriller category BookLife Prize for Fiction 2018, Mystery/Thriller category, rating 8.50 Art, religion, and history collide in this edge-of-your-seat museum thriller, Book Two of the Zelda Richardson Mystery Series. The novels in this series can be read in any order.

Murder and Walking Spirits Springer Science & Business Media Isaac Wolf can travel through time. But he's also in a race against it. With tensions in Prague rising at the height of World War II, Isaac Wolf is forced to leave home with nothing more than a small backpack and a pendant in the shape of an eternity knot. His parents believe the pendant will keep him safe--if he can discover what it really means. This clue leads him to Rookskill Castle, home of the Special Alternative Intelligence Unit where gifted children can learn to harness their powers to support the

Allies' cause. With the help of his new friends and an antique watch that allows him to travel through time, Isaac must unlock his own powers and uncover the true meaning of the eternity knot. The only way he can do that, though, is by hunting for a series of magical artifacts that are scattered throughout the past . . . and Isaac isn't the only artifact hunter. Soon he finds himself in a race against a threat just as deadly as the war itself--one that his parents had been trying to shield him from all along.

Computed Tomography CreateSpace

"Flawless execution of concept...Takes clinical practice and experience and brings it into the classroom...This book is for the EKG novice to one who just needs a great review text." -Gwen Ferdinand-Jacob, DHSc, MPAS, PA-C Executive Director, Director Physician Assistant Program, Kansas State University Mastering the 12-Lead EKG, Second Edition is the only book to boil down the complexity of learning EKG interpretation into an engaging and approachable tool. This resource uses a step-by-step systematic method, real-world clinical applications, and abundant practice opportunities to teach everything students need to know to provide expert, quality care. The second edition is greatly enhanced with abundant exercises that apply and reinforce chapter concepts. With a clear, approachable writing style, the book delivers extensive opportunities for learning, taking students from the beginning of their EKG journey through mastery of the 12 lead. Woven throughout each chapter is an algorithmic method for mastering EKG interpretation that fosters retention of the content. Hand-drawn illustrations will keep you engaged as you learn everything you need to know about EKGs, beginning with anatomy and physiology and closing with the

latest important 12-lead EKG topics. You will have hundreds of opportunities to practice and apply your knowledge through interpreting sample EKG strips, case studies, and fill-in-the-blank questions. New to the Second Edition: Incorporates over 360 exercises that apply and reinforce chapter concepts Offers hundreds of practice opportunities including EKG strip interpretation, case studies, and questions with detailed explanations Key Features: Utilizes a conversational writing style and abundant images, including more than 500 EKG strips and over 120 illustrations Applies a step-by-step algorithmic method for interpreting 12-lead EKGs Presents real-world examples to connect complex clinical concepts Provides online answers with detailed explanations of important concepts Delivers both the breadth and depth that health care professionals need to provide quality patient care

Is it possible to trace the footprints of the historical Sokrates in Athens? Was there really an individual named Romulus, and if so, when did he found Rome? Is the tomb beneath the high altar of St. Peter's Basilica home to the apostle Peter? To answer these questions, we need both dirt and words—that is, archaeology and history. Bringing the two fields into conversation, *Artifact and Artifice* offers an exciting excursion into the relationship between ancient history and archaeology and reveals the possibilities and limitations of using archaeological evidence in writing about the past. Jonathan M. Hall employs a series of well-known cases to investigate how historians may ignore or minimize material

evidence that contributes to our knowledge of antiquity unless it correlates with information gleaned from texts. Dismantling the myth that archaeological evidence cannot impart information on its own, he illuminates the methodological and political principles at stake in using such evidence and describes how the disciplines of history and classical archaeology may be enlisted to work together. He also provides a brief sketch of how the discipline of classical archaeology evolved and considers its present and future role in historical approaches to antiquity. Written in clear prose and packed with maps, photos, and drawings, *Artifact and Artifice* will be an essential book for undergraduates in the humanities.

Artefacts, Archives, and Documentation in the Relational Museum Harper Collins

Works by Prosek and others are juxtaposed with natural objects in an illuminating interrogation of the artificial boundaries we create between art and nature. Award-winning artist, writer, and naturalist James Prosek (b. 1975) has gained a worldwide following for his deep connection with the natural world, which serves as the basis for his art and numerous popular books. In this cross-disciplinary catalogue, Prosek poses the question, What is art and what is artifact—and to what extent do these distinctions matter? Drawing on the collections of the Yale University Art Gallery and the Yale Peabody Museum of Natural History, Prosek places man- and nature-made objects on equal footing aesthetically, suggesting that the distinction between them is not as vast as we may believe. In more than 150 full-color plates, objects such as a bird's nest, dinosaur head, and cuneiform tablet are juxtaposed with Asian handscrolls, an

African headdress, modern masterpieces, and more. Artists featured include Albrecht Dürer, Helen Frankenthaler, Vincent van Gogh, Barbara Hepworth, Pablo Picasso, and Jackson Pollack, as well as Prosek himself, whose works depict fish, birds, and endangered wildlife. Also included are an incisive essay by Edith Devaney and texts by Prosek that explore the magnificent productions of our wondrous interconnected world.

Ancient Projectile Points From Oregon's CRUMP LAKE Johns Hopkins University Press

Archaeologists have been developing artifact typologies to understand cultural categories for as long as the discipline has existed. Dwight Read examines these attempts to systematize the cultural domains in premodern societies through a historical study of pottery typologies. He then offers a methodology for producing classifications that are both salient to the cultural groups that produced them and relevant for establishing cultural categories and timelines for the archaeologist attempting to understand the relationship between material culture and ideational culture of ancient societies. This volume is valuable to upper level students and professional archaeologists across the discipline.

Alien Artifacts Be a Document Detective

Drama-based Pedagogy examines the mutually beneficial relationship between drama and education, championing the versatility of drama-based teaching and learning designed in conjunction with classroom curricula. Written by seasoned educators and based upon their own extensive experience in diverse learning contexts, this book bridges the gap between theories of drama in education and classroom practice. Kathryn

Dawson and Bridget Kiger Lee provide an extensive range of tried and tested strategies, planning processes, and learning experiences, in order to create a uniquely accessible manual for those who work, think, train, and learn in educational and/or

artistic settings. It is the perfect companion for professional development and university courses, as well as for already established educators who wish to increase student engagement and ownership of learning.
