The magic of witchcraft never dies. Harness

the power of nature-based magick, including herbal charms and remedies, cleansing rituals, crystal healing, astrology, and more with this new guide in the popular Modern Witchcraft series—perfect for millennials. Modern-day interest in witchcraft and wicca isn't surprising—who wouldn't want to focus their energy into rituals of change and healing in today's troubled and chaotic times? Right now, many of the most popular types of magick are nature-based. This fun and practical book includes methods to help you connect with the Earth mother and your own natural self. Each chapter focuses on a different type of nature magick, from seed

magick to the magick of the sun, of water, of the moon, and more—and every topic includes its own accompanying spells, charms, rituals, and meditations. The Modern Witchcraft Book of Natural Magick is your complete guide to everything you'll need to know about nature-based magick to fully embrace your spiritual and natural self.

In the first edition of *A Practical Guide to Stage Lighting*, Steve Shelley cracked open his production book

and showed how to prepare a lighting design and create the paperwork needed to mount a production. In the second edition, he pulled back the curtain and showed the methods and processes that go on before the light plot is finalized and ready to go to into the shop, even dealing with cutting the plot in half. In this third edition, Shelley throws the door wide open and shows step-by-step how to construct every lighting system in the Hokey light plot. Combining his diacritical analysis, killer drafting, and analytic use of the Slinky Method and Slinky Calculations, he presents the Periodic Table of Fundamental Lighting Systems and shows the basic

methods used to create multi-instrument lighting systems. Highlights include: -Over 100 new topics, including analysis and application of the three categories of collaboration; a detailed examination of production meetings and one-on-one meetings; and meeting checklists with management and the creative team. -Over 50 new illustrations, including Shelley's Periodic Table of Fundamental Lighting Systems; groundplans, sections, and front elevations that illustrate basic system wash configurations for each direction of light. -Analysis, calculation, and step-by-step technical construction of each lighting system in the Hokey light plot.

-Explanation of a manufacturer's cut sheet, and how to apply basic formulas to determine the beam size, footcandles, and gel transmission for lighting instruments. - Updated process of pre-programming computer lighting consoles prior to the load-in. - Comprehensive overview of archiving paperwork and softcopy for a production.

Revival happens when passion for God breaks through human restraint and ignites one heart after another with his unquenchable love. Speaking with enthusiasm and vibrancy, Kim Meeder encourages readers to seek transformation of heart, soul, mind, and strength by engaging the holy fire of God's presence. Within this place, fear and pride melt away and the desire burns brightly to reach all who are losing the battle for hope. Through inspiring true encounters, Meeder

challenges each believer to accept Jesus's commission to carry the living flame of his love wherever he leads.

A respected resource for decades, the Guide for the Care and Use of Laboratory Animals has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. The Guide incorporates new scientific information on common laboratory animals, including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal

care and use. The Guide sets the framework for the humane care and use of laboratory animals. Animal care and use program. The Guide discusses the concept of a broad Program of Animal Care and Use, including roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care.

The Guide discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The Guide addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The Guide identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The Guide for the Care and

Use of Laboratory Animals provides a framework for the judgments required in the management of animal facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates.
