Sword Sovereign of Chaos Funstory
 The series Religion and Society (RS) contributes to the exploration of religions as social systems- both in Western and non-Western societies; in particular, it examines religions in their differentiation from, and intersection with, other cultural systems, such as art, economy, law and politics. Due attention is given to paradigmatic case or comparative studies that exhibit a clear theoretical orientation with the empirical and historical data of religion and such aspects of religion as ritual, the religious imagination, constructions of tradition, iconography, or media. In addition, the formation of religious communities, their construction of identity, and their relation to society and the wider public are key issues of this series.

She was the Gu family's notorious ugly girl. Normally, she would pretend to be stupid, but in reality, she was very cunning. He was the most popular man in the city, mysterious and honorable. When her disguise was revealed layer by layer, she pitifully begged for mercy, "Young Master Mu, can we get a divorce?"

However, he forcefully announced, "Divorce, unless I die!" If she wasn't carelessly framed by her elder sister, she wouldn't have voluntarily provoked such a strong man. She had thought that she would live in misery for the rest of her life, but she hadn't thought that he would love her so much. ***

Comparative Religion the Charles Strong Trust Lectures 1961-1970 Funstory

How should Europe cope with the negative and still unfolding economic consequences of the current economic crisis? And why does Europe seem to be more conservative than the USA in dealing with the crisis? Since the outbreak of the current international economic crisis in 2008, the USA and many of the European countries have been tormented by high levels of unemployment and low levels of inflation, interest rates close to zero and fiscal policies of austerity. As such, the modern economic mainstream has been challenged by these empirical facts. Today, several years after the outbreak of the international economic crisis, supply side effects do not seem to be increasing employment as the modern mainstream claimed they would. Aggregate demand has to play a more important role in macroeconomic analysis than hitherto. That is, there is a need for alternative explanations of how a modern macro economy is expected to function and how the macroeconomic outcome could be manipulated by the right economic policy proposals. As expressed by the contents of the present book, a Post Keynesian understanding proposes such an alternative theoretically, methodologically and in terms of policy measures. This book will present new materials and approaches, especially new evidence and new views on the potential problems of public debt, the European Union and the present crisis, Central Banking, hysteresis in an agent based framework, the foundations of macroeconomics and the problems of uncertainty.

Only Don't Know Springer

Religion is the vast sky of existence. Reason is a tiny human phenomenon. The reason has to be lost, has to be dropped. Only by going beyond the mind does one start understanding what is. That's the radical change. No philosophy can bring that radical change - only religion. Religion is non-philosophic, anti-philosophic, and Zen is the purest form of religion. Zen is the very essence of religion. Hence it is irrational, it is absurd. If you try to understand it logically you will be bewildered. It can only be understood illogically. It has to be approached in deep sympathy and love. YOU CANNOT approach Zen through empirical, scientific, objective concepts. They all have to be dropped. It is a heart phenomenon. You have to feel it rather than think it. You have to BE it to know it. Being is knowing. And there is no other knowing.
